	ENHANCE THE SAMPLE SAMT ACF2 / TOPS / RACF / SAF TABLES				
	ENHANCEMENT DESCRIPTION:				
	The sample SAMT ACF2 / TOPS / RACF / SAF tables in hlq.CBOVDATV(ADMIN1) have been updated to change the default message (#DFLTMSG) action from A (allow) to R (reject). This change mitigates the potential security risk caused by new messages from an External Security System (ESM) during TPX signon.				
	New return codes and message IDs have also been added to the sample SAMT tables. These return codes and message IDs are related to generic signon credentials and multi-factor authentication messages generated from different ESMs.				
	The following tables show the updated #DFLTMSG and the new return codes and message IDs.
