

Migration of Automic.com Docs, Downloads & Automation Marketplace sites to Broadcom.com

Customer FAQ

Updated: August 31, 2026

This document outlines the migration of *.automic.com public websites to the consolidated Broadcom support and documentation platforms. Broadcom has merged all automic.com websites, including Automic download, Documentation, and Automation Marketplace sites, onto Broadcom's primary support platforms to provide a more unified experience for accessing product resources.

- **Downloads & Marketplace:** All software downloads, integrations and extension packages have been moved to the [Broadcom Support Portal](#).
- **Documentation:** All online product documentation has transitioned to [Broadcom Tech Docs](#).
- **Docker Registry:** The gcr.io registry has migrated to packages.broadcom.com.

The shutdown of all *.automic.com public services affects the following sites and products:

- [downloads.automic.com](#) products & component download for
 - Automic Automation (incl. Kubernetes Edition)
 - Automic Continuous Delivery Automation
 - Automic Applications Manager
 - Automic Dollar Universe
- [docs.automic.com](#) online and offline documentation (including context sensitive help) for
 - Automic Automation (incl. Kubernetes Edition)
 - Automic Continuous Delivery Automation
- [marketplace.automic.com](#) action packs, plugins, integrations and plugin extensions for
 - Automic Automation
 - Automic Continuous Delivery Automation
 - AutoSys Workload Automation
 - ESP dSeries Workload Automation
 - CA 7 Workload Automation
 - ESP Workload Automation

Impacted Products, Services by URL

Q: Which products are affected by the changes?

A: This change will affect:

- Automic Applications Manager
- Automic Automation
- Automic Continuous Delivery Automation
- Automic Dollar Universe
- Automic Release Automation For Z Systems
- Automic SaaS
- Autosys Workload Automation
- CA Automic Sysload
- CA Workload Automation Advanced Integration
- CA Workload Automation Advanced Integration for Hadoop
- ESP dSeries Workload Automation
- Workload Automation Agent
- ESP Workload Automation
- CA 7 Workload Automation
- Automation Analytics & Intelligence

Q: Which services are affected by the decommissioning of downloads.automic.com?

A: The transition impacts the following services and tools:

- Downloads > Product Downloads
- Downloads > Component Downloads
- Downloads > Product Support Lifecycle
- Downloads > Component Support Lifecycle
- Downloads > Third-Party Licenses
- Tools > Compatibility Matrix
- Tools > Release Notes
- Tools > Automic DB Metric Visualization
- Downloads > Download API Documentation
- Docker registry hosted on gcr.io
- Docker registry access token management for gcr.io
- In-Product changes
- Automic Github Index

Q: Which services are affected by the decommissioning of docs.automic.com?

A: The transition impacts all documentation delivery methods:

- Online and offline product documentation
- In-Product documentation (context-sensitive help in Automic Web Interface, script editor help)

Q: Which products & services are affected by the decommissioning of marketplace.automic.com?

A: Downloads of product extensions and integrations such as:

- Automic Integrations
- Automic Action Packs
- Plugin Extensions for AutoSys, dSeries, CA 7, ESP

Q: Where can I find items formerly hosted on Automation Marketplace?

A: Broadcom-supported downloads from Marketplace are available on <https://support.broadcom.com> under their corresponding products & SKUs.

- **Automic Action Packs:** [Automic Automation](#) & [Continuous Delivery Automation](#)
- **Automic Integrations:** [Automic Automation](#) & [Continuous Delivery Automation](#)
- **Plugin Extensions:**
 - [AutoSys Workload Automation Server](#)
 - [AutoSys Workload Automation Production Server](#)
 - [AutoSys Workload Automation Test/Development Server](#)
 - [AutoSys Workload Automation Agent for z/Linux](#)
 - [ESP dSeries Workload Automation Agent for z/Linux](#)
 - [Workload Automation Agent SE \(Mainframe\)](#)
 - [Workload Automation Agent EE \(Mainframe\)](#)
 - [Workload Automation Agent for SAP](#)
- [How to access Cloud Integrations for Automic Automation \(KB 451454\)](#)
- [How to access Cloud Integrations for AutoSys Workload Automation and dSeries ESP Workload Automation \(KB 452316\)](#)
- [How to access Cloud Integrations for Mainframe CA 7 Workload Automation and ESP Workload Automation \(KB 451846\)](#)

Downloads, APIs, & Release Notes

Q: Where can I download products and components?

A: Product and component downloads are available on the Broadcom Support Portal.

To locate your files, follow the steps below, detailed instructions on [Downloading Automic Products \(KB 451454\)](#) or [view a video walkthrough of the download process](#).

1. Go to the [Broadcom Download Portal](#).
2. Select “Enterprise Software” in the dropdown on the top right

3. Click “My Downloads” in the navigation on the left

- Search for "**Automic**" to display all products associated with your entitlements.
Automic Automation - will be entitled for AA and AAKE product bundles
Automic Continuous Delivery Automation - will be entitled for CDA product bundles
Automic Applications Manager - will be entitled for AM product bundles
Automic Dollar Universe - will be entitled for DU product bundles

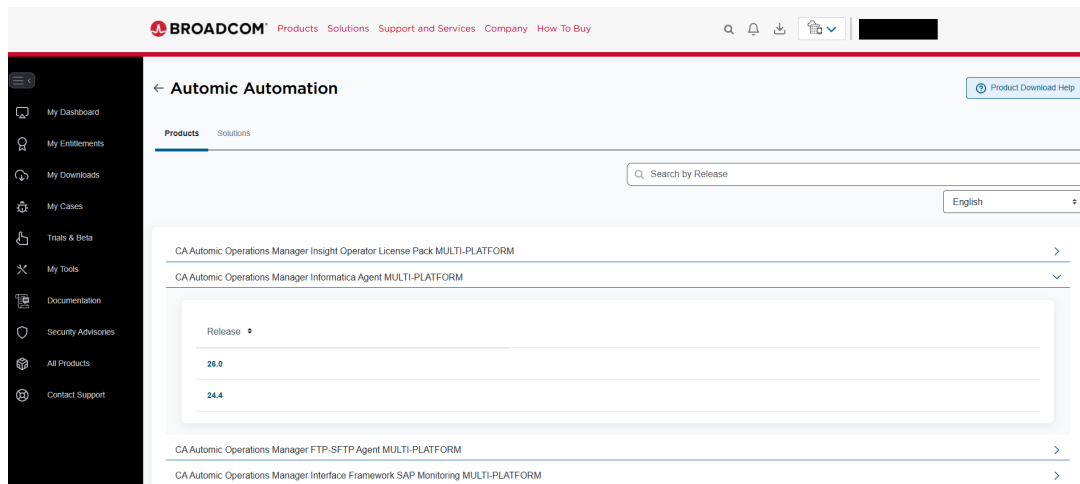

- Select the product that you are entitled to download

Q: What's the difference between Products and Solutions Tab?

- Under the **Products** Tab you will find the Automic Product Bundles for download
E.g.
Automic Automation
Automic.Automation_26.0.0_2026-07-27.zip
- Under the **Solutions** Tab you will find the individual component downloads
E.g.
Automation Engine > Agent AS400
Automation.Engine_Agent_AS400_26_0_0+build.1774201500804.zip

Q: Where can I download Automic Offering bundles?

- Go to the [Broadcom Download Portal](#).
- Search for "**Automic**" to display all products associated with your entitlements.
- Click on the specific product you wish to download. E.g. Automic Automation
The latest released major.minor versions that are under maintenance for the product should be listed
- Make sure to select the **Products** Tab on top of the page

5. Products Tab:

Select this tab to download a large comprehensive bundle containing all components for the latest version.

E.g. Automic.Automation_26.0.0_2026-07-27.zip

Q: Where can I download Automic components?

1. Go to the [Broadcom Download Portal](#).
2. Search for "**Automic**" to display all products associated with your entitlements.
3. Click on the specific product you wish to download. E.g. Automic Automation
The latest released major.minor versions that are under maintenance for the product should be listed
4. Make sure to select the **Solutions Tab** on top of the page

5. Solutions Tab:

Select this tab to download individual components in their latest versions.

Again you will have to select the desired product and major.minor version to enlist all individual components associated with the product

6. Solutions Download Page:

This page is divided into multiple sections:

- Solution Details
- Solution Description
- Solution Downloads

Solution Details

This section lists general details about the component release.

Solution Description

This section lists the filenames and fixlist (former release notes) for the component release.

Solution Downloads

This section lists the files that can be downloaded for the component release.

File Name	File Size	File Description	Download	MD5 Checksum	SHA256 Checksum

Q: How can I install action packs?

The Automic Github Index <https://github.com/Broadcom/automic-index> has been retired without a replacement. All action packs are now included in the product bundles and can be installed locally via Package Manager.

Q: Will I be able to download software artifacts via a REST API?

A: No. Unfortunately, support.broadcom.com does not provide REST API capabilities for downloading software artifacts. The downloads REST API has been retired without a replacement.

Q: Where can I find the Release Notes Tool?

A: The standalone Release Notes Tool has been retired without a direct replacement. Instead, release notes are now published directly alongside the corresponding product (PDF) and component downloads (Text).

Q: What can I do if I can't access support.broadcom.com or can't see any downloads?

If you experience any issues accessing the new support portal, please make sure that your user account is correctly entitled for downloads. See KB article about [Using your Broadcom Site ID\(s\) for full support portal access](#).

Docker Registries & Tokens

Q: What happened to the docker registry hosted on gcr.io?

A: Docker images of the latest released version (24.4.4, 24.4.5 and 26.0.0) previously hosted on [gcr.io](#) have been migrated to the automic-docker registry hosted at [packages.broadcom.com](#).

The [gcr.io](#) registry utilized Google Artifact Registry, requiring authentication through a GCP service account JSON. The new registry uses JFrog Artifactory, which requires JWT tokens. Consequently, both the Kubernetes pull secret and the registry URLs within the values.yaml file require updates.

The [gcr.io](#) registry remains available until November 20, 2026 in order to allow transition to the new registry. It is not possible to renew access to [gcr.io](#).

Q: Where can I obtain a token for the new registry replacing gcr.io?

A: You can generate a new token on the Broadcom Support Portal:

1. Navigate to the [Broadcom Download Portal](#).
2. Look for the "Registry Tokens" button > <https://support.broadcom.com/group/ecx/registry-token>

3. Your generated token will remain valid for the duration of your active contract.

Q: I am using my own docker registry to host Automic images for my Kubernetes Deployments. Do I have to change my Deployments?

A: No, if your values.yaml overrides and your Deployments in Kubernetes already point to your own docker registry you don't have to change them. Be aware that you'll have to pull images for newer versions from automic-docker.packages.broadcom.com and push them to your own docker registry when preparing for your next upgrade.

Q: My Kubernetes Deployments are pointing to Automic's gcr.io Registry. How do I update from gcr.io to the Broadcom package host?

A: You have two migration paths, both fully documented in [KB 450468](#).

1. **Start using your own docker registry to host Automic Images.** This is the recommended way for OnPrem Kubernetes Deployments.
 - Pull the required docker images from [gcr.io](#) or automic-docker.packages.broadcom.com and push them to your private docker registry.
 - Update your image pull secrets -> add credentials for your docker registry.
 - Update image references in HELM charts / values.yaml overrides to point to your own docker registry.
2. **Reconfigure your deployments to point to automic-docker.packages.broadcom.com**
 - Generate a Registry Token on <https://support.broadcom.com/group/ecx/registry-token> .
 - Download updated HELM charts and reconfigure values.yaml overrides.
The image references in the HELM charts available for download already point to automic-docker.packages.broadcom.com. Please update/replace your local copies accordingly.
 - Also make sure your values.yaml overrides are updated to point to the new Automic repository.
 - Image pull secrets in your Kubernetes namespace(s) have to be adapted accordingly, adding the registry token for packages.broadcom.com.

Lifecycle, Licensing, & Extensions

Q: Where can I find details about the Product Support Lifecycle?

A:

- [Product support lifecycle information for Automic](#)
- [End of Service dates](#)
- [KB article with instructions on product lifecycle and end of service](#)

Q: Where can I find details about Third-Party Licenses?

A: Information about Third-Party Licenses on product level can be found [here](#).

Documentation & Compatibility

Q: Where can I find online and offline product documentation for Automic?

A: Links to available documentation for the affected products are below:

- [Automic Automation](#)
 - [Automic Reference Guides](#)
 - [Continuous Delivery Automation](#)
 - [Automation Analytics & Intelligence](#)
 - [Automic Cloud Integrations](#)
 - [RA Agents](#)
 - [Automic Automation Archive Browser](#)
 - [Automic Automation ServiceNow Service Catalog](#)
 - [Restart Plus](#)
-
- **Online Documentation:** Now hosted on [Broadcom Tech Docs](#).
 - **Context-Sensitive Help:** In-product documentation links must be reconfigured to point to the new [Broadcom Tech Docs](#) URLs. Details on how to update the configuration are described in [Configuring Documentation URL for TechDocs Migration \(KB435454\)](#).
 - **Offline Documentation:** Available as PDF downloads from [Broadcom Tech Docs](#). Offline documentation is no longer available as downloads from support.broadcom.com.

Additional details on Documentation is available in [Migration of automic.com Digital Platforms - Downloads & Documentation](#).

URLs to docs.automic.com redirect to a landing page for the corresponding product and version, not to individual pages in the new location. **Direct links to specific documentation URLs as browser bookmarks or in your in-house documentation require manual updates to point to the new individual page URLs.**

Broadcom Tech Docs does not support syntax color-coding in example scripts at this time but will be implemented in future updates.

If you find missing images or other errors in the documentation, please use the “Documentation Feedback” button at the right on the affected documentation page to let us know.

Q: Where can I find Compatibility Matrix details for my products?

A: The data previously provided by the standalone compatibility matrix is integrated directly into the new product documentation hosted on [Broadcom Tech Docs](#).

- [Automic Automation - Compatibility](#)
- [Continuous Delivery Automation - Compatibility](#)
- [Automation Analytics & Intelligence - Compatibility](#)
- [Cloud Integrations - Compatibility](#)

In-Product changes

Q: What changes are required for AWI's online help?

A: Documentation can no longer be hosted on premises, as help files can no longer be downloaded — all users must have access to techdocs.broadcom.com.

Note on Scope (Classic Help vs. ICE):

These configuration settings apply to Classic Online Help (external help opened in a browser window) and when IPCE (In-Product Content Experience / Inline Help) is turned off. When IPCE is enabled (default in modern versions), AWI uses the embedded inline help sidebar connecting directly to Broadcom's IPCE service.

Details on how to update the configuration are described in [Configuring Documentation URL for TechDocs Migration \(KB435454\)](#).

Q: What changes are required for Package Manager?

A: Package Manager is no longer able to install packages from downloads.automic.com via index update. All action packs are now included in the product bundles and can be installed locally via Package Manager instead.
