Chapter 1: About the CA Clarity PPM Connector for Microsoft SharePoint Release Notes

These release notes describe the CA Clarity PPM Connector for Microsoft SharePoint add-in v2.0 and contains the following sections:

- New Enhancements
- Installation Requirements
- Certified and Supported Versions
- Known Issues
- Documentation

Chapter 2: New Enhancements

The user interface has a better look-and-feel. This release supports the CA Clarity PPM-supported languages.

You would see some difference in the behavior of SharePoint 2010. For example, when you select Create view in Gantt view and View the List Web Part, the Gantt view is displayed differently. In SharePoint 2010, Gantt view is displayed with the Standard view and in SharePoint 2007 only the Gantt view is displayed.

Also, Synchronize with Clarity is now changed to Sync with Clarity and it is not in the same toolbar.

Chapter 3: Installation Requirements

New CA Clarity PPM Customers

Before you can install CA Clarity PPM Connector for Microsoft SharePoint v2.0, you must have a certified version of CA Clarity PPM installed.

You can get CA Clarity PPM from <http://support.ca.com>.

See the *CA Clarity PPM Connector for Microsoft SharePoint Product Guide* for more information.

Existing CA Clarity PPM Customers

For existing CA Clarity PPM customers, you must have a certified version of CA Clarity PPM installed before you can install the add-in. See the *CA Clarity PPM Connector for Microsoft SharePoint Product Guide* for more information.

SharePoint 2007 and SharePoint 2010 web parts are incompatible. Therefore, upgrade from prior versions of CA Clarity PPM Connector for Microsoft SharePoint (such as v1.1 and v1.2 available on the support site) to v2.0 is not supported.

Chapter 4: Certified and Supported Versions

Only the following CA Clarity PPM Connector for Microsoft SharePoint and CA Clarity PPM combinations are certified and supported. Use this table to check that you have the correct CA Clarity PPM Connector for Microsoft SharePoint and CA Clarity PPM combination:

CA Clarity PPM Connector for Microsoft SharePoint Version	CA Clarity PPM Version

Chapter 5: Known Issues

For information about known issues, visit CA Support Online <http://support.ca.com/>.

Note the following known issues:

CLRT-65699

The upgrade and migration testing for CA Clarity PPM SharePoint Connector v 2.0 is blocked due to compatibility issues with SharePoint 2007 and 2010 versions.

MSSP-232

Change the password in Clarity and enter the correct password in binding parameters. When you click Edit Web Part, an error message "Enter the Proxy Password" is displayed and the non-CPS Site List Web Part binding parameters are enabled.
