Chapter 1: About the CA Clarity PPM Accelerator for PRINCE2 Release Notes

Welcome to the CA Clarity PPM Accelerator for PRINCE2 add-in (PRINCE2 Accelerator) release notes. This add-in is based on CA Clarity PPM. This document can help you get started with this add-in.

Features and Enhancements

The following features are included in this version:

- A PRINCE2 project template that allows PRINCE2 project managers the option to select a PRINCE2 template and includes the various PRINCE2 stages and project sub-pages.
- A set of PRINCE2 controls (project subpages) that includes a base set of eight controls that serve as a starting point for PRINCE2 project methodology adoption. The controls are based on the PRINCE2 template and are associated with a submission, review, and approval process.
- A project level dashboard that includes a base set of eight controls based on the PRINCE2 template. A link to the PMO Dashboard allows the PRINCE2 user to quickly switch to the PMO Project Dashboard without having to change the dashboard layout.
- An executive dashboard that allows the senior executives to view at-a-glance various information regarding all PRINCE2 projects within the organization. It includes portlets for issues, project status, and PRINCE2 stage reporting.
- A set of dashboards for PRINCE2 controls that allow the senior executives to quickly access and view an aggregation of reports, risks, issues, and change requests for all PRINCE2 projects in the organization.
- A set of group access rights that allow you to easily and quickly assign access rights to various users based on PRINCE2 definitions.
- A product check box that allows the PRINCE2 project manager to create a product breakdown structure and perform product based tracking.

Certified and Supported Versions
