Chapter 1: Scripting Reference

CA DMM uses scripts to migrate system settings and application settings.

This guide is reference of all the scripts provided with CA DMM. The guide is divided into two chapters: System Scripts and Application Scripts. For each script, we identify some or all of the following:

- Name of the script
- Release date
- Settings description
- Important Notes
- Migration Paths
- Limitations

Chapter 2: System Scripts

The scripts in this chapter apply to the operating system. You can go through this chapter to get information on the system scripts.

Appearance

System Script

Appearance manages the Microsoft Desktop appearance.

Release Date

11/16/2006

Settings Description

The Appearance script migrates the following:

- The Appearance option migrates the appearance of the Desktop icons such as shape, size, image, and font size.
- The Desktop Icons option migrates the list of icons that are displayed on the Desktop such as My Computer, My Documents, My Network Places, Internet Explorer, and Recycle Bin.
- The Fonts option migrates the appearance-related fonts.
- The Scheme option migrates the button appearance and color scheme.
- The Theme option migrates the Desktop themes.

Notes

- Migration of Icon Size may also migrate some of the related Visual Effects settings.
- Migration of Icon Dragging may also migrate some of the related Visual Effects settings.
- The trash icons will be refreshed the first time you add or remove anything from the trash.
- The migration of Themes between different operating systems is supported only from Windows Vista onwards to Windows Vista or higher versions.
- After migration is complete Personalization window pops up from Windows 7 onwards. User can simply close the window and start using the system.

Limitations

Following are the limitations:

- The Use Large Icon setting is interlinked to the Icon Size in the Appearance tab.
- The migration of the scheme names across different operating systems cannot be supported. But, the attributes are migrated.
- The migration of the custom scheme names to Windows XP cannot be supported. But, the attributes are migrated.
- The migration of Themes between different operating systems is supported only if the themes are available in default location. If themes are saved at a custom location, they need to be migrated as part of data to the destination computer.
- The check boxes for Desktop Icons (such as My Computer, My Network Places) cannot be migrated when the settings at the source are default.
- You cannot migrate View and Sortby settings from XP to Windows 8 on the desktop.
- If Aero theme is not enabled you cannot migrate the colors under the path Control Panel, Appearance and Personalization, Personalization.

Arrange Icons

System Script

Arrange Icons manages the arrangement of Desktop icons.

Release Date

7/25/2005

Settings Description

This script migrates the settings available under the Arrange Icons By option. This option can be set by right-clicking the Desktop and then selecting Arrange Icons By (View and Sort by in Vista).

Notes

You must restart the source system before starting the migration.

Limitations

- The sorting of desktop icons cannot be migrated to Windows Vista when migrating from Windows XP to Windows Vista.
- You cannot migrate the Auto arrange icons, Align icons to grid, Show desktop icons, Large icons, Medium icons, Small icons by right clicking on the Desktop and selecting View, for the new user in multiple users scenario from Windows Vista or higher version to Windows 8.
- You cannot migrate the Name, Size, Item type, Date modified by right clicking on the Desktop and selecting Sort by, for the new user in multiple users scenario from Windows Vista or higher version to Windows 8.

Background

System Script

Background manages the settings of the Display Properties for the background that displays on the Desktop.

Release Date

10/19/2006

Settings Description

The Background script migrates the following:

- The Pattern option migrates the pattern settings.
- The Wallpaper option migrates the Wallpaper displayed on Desktop.
- The Wallpaper Position option migrates the Wallpaper positions such as Center, Tile, and Stretch.

Notes

The background images in the JPEG format and web contents cannot be migrated if Active Desktop is not installed.

Command Prompt

System Script

Command Prompt (executable name cmd.exe) is the Microsoft-supplied command-line interpreter on OS/2, Windows CE and on Windows NT-based operating systems (including Windows 2000, XP, Vista, 7, 8, Server 2003, Server 2008, Server 2008 R2 and Server 2012). It is the analog of COMMAND.COM in MS-DOS and Windows 9x systems (where it is called MS-DOS Prompt), or of the Unix shells used on Unix-like systems.

Release Date

4/22/2004

Settings Description

This script migrates the properties of the Command Prompt window. The Command Prompt window allows you to type DOS level commands rather than using the GUI. Settings for the Command Prompt may be set by right-clicking on the window and selecting Properties. The settings that are migrated are: Command History, Cursor Size, Display Options, Edit Options, Font, Layout and Colors.

When selecting system settings for migration, command prompt settings are available for selection.

Dial Up

System Script

Dial up manages Microsoft Windows Dial-Up Networking settings.

Release Date

8/18/2006

Settings Description

The Dial Up script migrates the following:

- The TCP/IP Settings migrates the TCP/IP network settings associated with the Dial-up connections.
- The Remote Administration Service Settings migrates the settings for a Dial-up connection where your computer will be receiving phone calls, and allowing the caller onto your network.
- The Phonebooks option migrates the dial-up phone numbers settings. These can be selected for the current user or all users.
- The Current User option under the Phonebooks option migrates the user-specific dial-up phone numbers.
- The Common option migrates the global dial-up phone numbers settings.
- The Calling Cards option migrates the saved calling card information.
- The Locations option migrates the Saved country and zip codes.

Limitations

Following are the limitations:

- If you migrate a phonebook with the same name as the one that exists on the destination, you will not be able to change that phonebook's settings until you rename one of the phonebooks.
- The Dial-up Remote Networking Server will be closed before migration. If you are connected to the destination computer through Dial-up Networking, you must create a DNA file to complete the migration.
- The custom script files will not migrate, you must reselect login scripts.
- If the phonebook setting contains the modems from the source system, you must select the appropriate modem for the destination system.

- You cannot migrate the Dial-up username, password, and domain settings. You must reset them manually.
- When the migration is complete, you will not be able to undo any of the migrated connections.
- If the source system has an old set of country codes, you may need to reselect your country code.
- The passwords for remote networking server may not have migrated completely. You must re-enter passwords for any invalid passwords.
- You cannot migrate the Internet Connection Firewall settings.
- You cannot migrate the Internet Connection Sharing settings.
- You cannot migrate the Calling Card PINs cross-platform.
- Prior to the migration of settings, you must install the Dial-up Networking and Remote Administration Server.
- The user settings are not migrated, you must select the Dial-up User Settings and Permissions.
- You cannot migrate the general password settings in Windows 2000 Advanced Server. You must reselect the general password settings.
- After rebooting, you may receive a message regarding new hardware. Windows will search unsuccessfully for any new hardware. After a reboot, remove the unknown devices from the device manager.

Ease of Access Center

System Script

The Ease of Access Center is a central location where you can modify the accessibility settings and programs available in Windows.

Settings Description

The Ease of Access Center script migrates the settings of Use the computer without a display, Make the computer easier to see, Use the computer without the mouse or keyboard, Make the mouse easier to use, Make the keyboard easier to use, Use text or visual alternatives to sounds, Make it easier to focus on tasks.

Notes

- In multiple users scenario, if a user exists on source but does not exist on the destination while migration, the migrated settings can be effective for that user only after restarting and logging-off the computer.
- After migration, Mouse settings will be effective only after clicking OK under the path Control Panel, Ease of Access, Ease of Access Center, Make the mouse easier to use on the destination computer.
- After migration completes the following settings take effect only after restarting and logging-off the respective user:
 - Remove background images (where available) settings under the path Control Panel, Ease of Access, Ease of Access Center, Make the computer easier to see, Make things on the screen easier to see, will take effect only if you logs-off after first log-on. That means after the migration, you should log-off and log-on to your computer.
 - Turn off all unnecessary animations (when possible) settings under the path:
 - Control Panel, Ease of Access, Ease of Access Center, Use the computer without a display, Adjust time limits and flashing visuals.
 - Control Panel, Ease of Access, Ease of Access Center, Make the computer easier to see, Make things on the screen easier to see.
 - Control Panel, Ease of Access, Ease of Access Center, Make it easier to focus on tasks, Adjust time limits and flashing visuals.
 - Activate a window by hovering over it with the mouse settings under the path Control Panel, Ease of Access, Ease of Access Center, Make the mouse easier to use, Make it easier to manage windows.

Limitations

- You cannot migrate, Run Speech Recognition at startup settings from Windows 7 to Windows 8, under the path Control Panel, Ease of Access, Easeof Access Center, Use the computer without display, Set up Text to Speech, Speech Recognition, User settings.

Folder Options

System Script

Folder Options manages a computing entity (such as a directory, a catalog, or a folder) in a file system that contains a group of files, other folders, or both.

Release Date

04/29/2013

Settings Description

The Folder Options script migrates all the settings that are found in the Control Panel\Folder Options. From Windows Vista onwards, you can also migrate Favorites and Libraries in Windows Explorer.

Notes

This script does not support the migration of the file types.

Limitations

Following are the limitations:

- You cannot migrate the Offline Files options from previous versions to Windows Vista.
- You cannot migrate the temporary Offline Files disk space option from Windows 2000 to Windows Vista.

UITDNA--General

System Script

General script (formerly, Vista OS Settings) manages Windows Vista specific settings such as People Near Me, Ease of Access, Sideshow, and so on.

Release Date

04/29/2013

Settings Description

The script migrates the following settings:

- Ease of Access settings related to Magnifier, Narrator, On-screen Keyboard, Sideshow, Speech recognition.
- Auto Play settings related to the plug and play devices.
- Windows Firewall settings.
- Indexing and Search settings related to the indexing of the folders and search options.
- People Near Me settings which include login and security settings.

Notes

- The iSCSI service must be running on the destination to apply the settings.
- The advanced settings of the Windows Firewall are not migrated.
- Windows 8 does not support People Near Me feature and is not available for migration.

Limitations

- When you are migrating from Windows 8 32 bit to Windows 8 64 bit, Allowed apps and features setting under the path Control Panel, System and Security, Windows Firewall, Allowed apps cannot be migrated.

Icons

System Script

Icons

Release Date

4/22/2004

Settings Description

The Icons script migrates the following:

- The script migrates the Effects tab settings and the icon information on the Appearance tab of the Desktop Properties control panel. Desktop Icons migrates the system icons such as My Documents and Recycle Bin that appear on the Desktop.
- Other settings migrated: the size of icons and icon spacing.
- Image migrates which icons are used for My Computer, Network Neighborhood, My Documents and the Recycle Bin and whether to run Desktop Cleanup Wizard.

The settings granularities are as follows:

- Icons
- Desktop Cleanup Wizard (Windows XP only)
- Desktop Icons (Windows XP only)

Notes

- To migrate the auto arrange setting, the system must be restarted before migration.

Limitations

Following are the limitations:

- The trash icons will be refreshed the first time you add or remove something from the trash.
- To migrate the auto arrange setting, the system must be restarted before migration.

IMESettings

System Script

The IMESettings script migrates the configuration for the Input Method Editor (IME). The IME is a program that allows computer users to enter complex characters and symbols, such as Japanese characters, using a standard keyboard.

Release Date

4/22/2004

Settings Description

The IMESettings script supports the following settings:

- Japanese Input System
- Korean Input System
- Shared Settings
- Simplified Chinese Input System
- Traditional Chinese Input System (Array, Big5 Code, ChangJie, DaYi, New ChangJie, New Phonetic, Phonetic, Quick, and Unicode).

When performing a migration, you are able to select from any of the following check boxes under Microsoft IME:

- Japanese input System Settings
- Korean Input System Settings
- Shared Settings
- Simplified Chinese Input System Settings
- Traditional Chinese Input System Settings (Array, Big5 Code, ChangJie, DaYi, New Changjie, New Phonetic, Phonetic, Quick, Unicode).

Limitations

Following are the limitations:

- Simplified Chinese IME for locales MS PinYin. NeiMa, QuanPin, ShuangPin, and ZhengMa cannot be migrated.
- The migration of the CAPS and KANA toolbar buttons cannot supported.
- The custom template color cannot be migrated from Windows 2000 to Windows XP.
- The settings from Chang Jie version 5.02 cannot be migrated to Windows 2000 or Windows XP.

- Dictionaries cannot be upgraded.
- Toolbar Minimization setting cannot be migrated.

Keyboard

System Script

Keyboard

Release Date

10/19/2006

Settings Description

The Keyboard script migrates the following:

- Configuration settings such as Keyboard Repeat Delay, Repeat Rate, and Cursor Blink Rate found in the Keyboard properties.
- Keyboard layouts, languages, and settings such as Advanced Key Settings.

Notes

To migrate an individual locale, it must be available on the destination system.

Limitations

Following is the limitation for the Keyboard script:

- You can migrate the LanguageBar settings given in the Keyboard properties by selecting the Regional Settings option.

Mouse

System Script

Mouse

Release Date

11/02/2006

Settings Description

The Mouse script migrates the following:

- Settings such as Mouse Repeat Button Configuration, Double-Click Speed, Click Lock, Mouse Motion, Pointer Trails, and Wheel Scrolling. These are present in the Mouse properties.
- Mouse Schemes and changes in the Customize option for Mouse Schemes.

Notes

The Single or Double-Click option buttons in the Files and Folders menu present in the Mouse options in Windows 2000 can be migrated by selecting the Folder Options option.

MUI

System Script

MUI represents Microsoft Windows Multilingual User Interface settings.

Release Date

08/18/2006

Settings Description

The MUI script migrates Multilingual User Interface settings.

Notes

The MUI languages need to be installed on both the source and the destination to migrate the MUI settings.

Networking

System Script

The Networking script manages Microsoft Networking settings.

Release Date

8/18/2006

Settings Description

The Networking script migrates the following:

- The Identification option migrates the computer name and domain or workgroup information.
- The Access Control option determines whether the system shares are secured by passwords on a single share or by having a list of users who can log on.
- The Protocol Settings migrate the settings associated with the configuration of TCP/IPv4.
- The Authentication option migrates the settings in the Authentication tab.

Notes

You must shut down the source system after the migration to avoid IP conflicts.

ODBC

System Script

ODBC

Settings Description

The ODBC script migrates the following:

- ODBC settings defined in the Control Panel's Administrative Tools section.
- Tools for NT like systems. The ODBC script supports all the general settings and all database settings.

When selecting system settings for migration, Data Sources (ODBC) settings are available for selection.

Limitations

Following are the limitations:

- Settings for the databases are migrated only if the database driver (dll) exists on the destination.
- If specific drivers need to be installed in order to migrate a database setting, you will be informed with a message in the destination event log.
- When setting up a new database using MS VFoxPro driver on a Windows XP system, you will receive a warning indicating to use the specified driver, you need to upgrade the driver to the latest version available on the MS website.

Offline Files

System Script

Offline Files

Release Date

04/29/2013

Settings Description

This script migrates the settings of the Offline Files.

- Settings for the Offline Files can be selected from Control Panel, All Control Panel Items, Sync Center, Manage offline files. You can migrate settings present under the tabs General, Disk Usage, Encryption and Network.
- When selecting system settings for migration, Offline Files Settings are available for selection.

Notes

- Previously Offline Files settings are part of folder option settings. From Windows Vista onwards these settings are moved to Control Panel, All Control Panel Items, Sync Center, Manage offline files. So from Windows Vista onwards a new node appears in system settings to migrate Offline files settings.

Limitations

Following are the limitations:

- You cannot migrate Disk Usage settings under the path Start, All Programs, Accessories, Sync Center, Manage Offline files, from windows vista to higher versions.

Printers

System Script

The Printers script manages Microsoft Windows installed printers and their settings.

Release Date

07/30/2007

Settings Description

The Printers script migrates the following:

- The Local Printers option displays and migrates all the local printers available on the computer.
- The Network Printers option displays and migrates all the network printers for the selected user.

When selecting system settings for migration, Printers is available for selection under the Desktop Settings branch of the System Settings tree.

Notes

- After printer settings are migrated, default printer set on the source may not reflect as default printer on the destination. In such case, you have to manually set the default printer on the destination.

Limitations

Following are the limitations:

- If your printer ports are mapped network paths, you must remap the network paths on the destination system.
- After migration, the scheduling settings may change, and will need to be reset.
- For LPR printers to operate correctly on the destination system, you may need to install appropriate network DLC protocol.
- Printers whose drivers do not come bundled with Windows, will need their drivers installed on the destination before the migration.
- To migrate printers, the user must have at least power user access.

QuickLaunchToolbar

System Script

The Quick Launch Shortcut contains shortcuts to applications. A single click on the application's icon in this area launches the application.

Release Date

12/18/2006

Settings Description

The QuickLaunchShortcut script migrates the Quick Launch Shortcut icons and enables or disables the Quick Launch Shortcut.

Notes

- The source system must be restarted prior to starting the migration.
- If the shortcut target does not exist or is different from the source computer shortcut target, the Quick Launch shortcuts will be broken.
- The Quick Launch Shortcut is removed from the default toolbars list in Windows 7. However, for backward compatibility, Windows 7 still contains the Quick Launch folder. For more information, see the link <http://msdn.microsoft.com/en-us/library/aa511448.aspx>.

To add the Quick Launch Shortcut to the taskbar, right-click the taskbar and select Toolbars, New Toolbar from the context menu. Then, enter %AppData%\Microsoft\Internet Explorer\Quick Launch in the Folder field. These steps restore the Quick Launch shortcut.

Regional

System Script

The Regional settings are used to change the way computer displays numbers, currencies, date, and time.

Release Date

11/27/2006

Settings Description

The Regional script migrates the Regional settings such as Numbers, Currency, Time, Date, Location and Input Locale present in Regional and Language Options.

Notes

To migrate an individual locale, it must be available on the destination system.

Limitations

Following is the limitation for the Regional script:

- The Supplemental language support and the Code page conversion tables settings are not migrated.

Remote Desktop Connection

System Script

Remote Desktop connects two computers over a network or the Internet. Once connected, you can see the remote computer's desktop, and have access to all its programs and files.

Release Date

04/29/2013

Settings Description

Remote Desktop Connection script migrates all the options that are available in the remote desktop Connection window. These options include Logon settings, Connection settings, Display configuration, Colors, Remote audio, Keyboard, Local devices and resources, Start a program, Performance, Server Authentication and Connect from anywhere.

Notes

The performance settings defaults to Detect Connection Quality Automatically, under the path Start, All Programs, Accessories, Remote Desktop Connection, Experience, in case of migrations from any older OS to Windows 8.

ScreenSaver

System Script

Windows Desktop screen saver is an animated picture or pattern that is automatically displayed when the computer is kept idle for a predetermined period of time.

Release Date

11/15/2006

Settings Description

The ScreenSaver script migrates the following:

- The Current Screen Saver option migrates the currently selected screen saver.
- The Energy Options migrates all power settings to maximize the computer performance by adjusting the display brightness and power settings.
- The Password option migrates the screen saver password.
- The Wait Times option migrates the predetermined period of time to set the screen saver.

Notes

- Migration of the APM settings is not supported.
- Migration of the UPS settings is not supported.
- Migration of the Custom Energy settings between different versions of Windows is not supported.
- When you are migrating from a 64-bit operating system to another 64-bit operating system using Real-time migration, manually copy the custom screen saver files to the destination computer.

Limitations

Following are the limitations:

- The Current Screen Saver file on the source computer cannot be overwritten on the destination computer.
- The Screen Saver\Change Power settings cannot be migrated.

SendTo

System Script

SendTo is a Desktop setting.

Release Date

6/27/2005

Settings Description

The SendTo script migrates the contents of the SendTo folder.

SharePoints

System Script

SharePoints migrates share points for the folders, not including the folder or its contents, which need to be moved using the file selection tree.

Release Date

8/21/2006

Settings Description

The SharePoints script migrates the share points created for folders.

Notes

- The shared folders must be manually moved from the source system to the destination system.
- If share points are being migrated to a computer in a different domain, the permissions may have to be reset.

Limitations

Following is the limitation for the SharePoints script:

- Migration of permissions from Windows 2000 systems cannot be supported. You must reset the permissions.

SideBar

System Script

SideBar manages Windows Vista specific desktop settings for SideBar.

Release Date

7/25/2008

Settings Description

This script migrates the SideBar settings such as position, gadgets, and appearance. This script is applicable only for Windows Vista Desktop.

Sounds

System Script

Sounds manages the sounds settings.

Release Date

7/25/2005

Settings Description

The Sounds script migrates the settings related to the sounds. The Sounds settings are set in the Sounds option in Control Panel.

Notes

- Only the schemes are migrated to the destination.
- In Windows Vista, if the name of the sound file is not seen, change the option in Folder Option to show the extension of known file types (check the option Hide Extensions for known file types) after migration.
- When you migrate sounds, some errors appear in the event log saying that access is denied. This does not impact the migration.

Taskbar

System Script

Taskbar is a Desktop setting.

Release Date

04/29/2013

Settings Description

The Taskbar script migrates the settings such as Taskbar, Start menu, Pin this program to taskbar, and Notification area found in the Taskbar properties.

Notes

- You must restart the source computer to store any changes made to the Taskbar settings before starting the migration.
- The application sections of the start menu will migrate. However, the migration of the settings to show your browser and email applications in the Start menu cannot be supported.
- The Address, Links, and Quick Launch tool bar configurations in the Taskbar are not migrated.
- Pinned items will migrate only for applications whose executable name remains same on both source and destination machine.
- If the user has pinned a standalone application exe in the taskbar, then the corresponding pinned item, does not migrate.

Limitations

Following are the limitations:

- Customizing Hide Inactive Icons in the Notification area cannot be migrated.
- The pinned items will not migrate in case the application is not installed on the destination before migration.
- The pinning of items in the taskbar cannot be undone using Undo feature of DMM.

Time Zone

System Script

Time Zone represents the operating system time zone settings.

Release Date

10/12/2006

Settings Description

The Time Zone script migrates all the system time zone settings with their Additional clock settings available in Vista.

Notes

The system time and date migration does not come in the scope of this script.

UserAccounts

System Script

UserAccounts

Settings Description

This script supports the appearance settings for Windows XP users at the login screen if the computer is not attached to a domain. The settings include: the graphic associated with the user at login allowing fast switching of users and the type of login window, either Windows classic or Windows XP type. The graphic file displayed for the user is migrated.

Limitations

Following are the limitations:

- User account pictures cannot be migrated for non-Domain users when destination is Windows 7 computer.

Web Settings

System Script

WebSettings for Active Desktop enable users to use their Desktop as a web page. Thus, enabling the users to get content from the Internet and display it on their Desktop.

Release Date

11/16/2006

Settings Description

The WebSettings script migrates the Active Desktop settings.

Notes

- The migration of the security information cannot be supported.
- The background images in the JPEG format and web contents will only migrate if Active Desktop is installed.

Limitations

Following are the limitations:

- Unable to migrate passwords for any web pages in Desktop Items, You need to reset them manually.
- The Web schedule settings cannot be migrated if the user name and domain are different.
- Undo for Active Desktop migration is not supported.

Wireless

System Script

A wireless network is a telecommunication or computer network that uses radio for the carrier or physical layer.

Release Date

12/14/2006

Settings Description

Migrates all the Wireless Adapter settings and the AccessPoint settings.

Notes

- Use the Authentication option under Networking to migrate the Authentication of the AccessPoint.
- The migration will be successful only when the cards are of same type on both source and destination.
- The migration of driver settings will not be successful when the source has default and the destination has non-default.
- The settings of This Connection uses Following Items, will not be migrated using the wireless option.
- Firewall Settings are not migrated.
- Only Windows wireless agent is supported.
- You must stop the Wireless Zero Configuration Service before performing the undo for the Wireless settings in Windows XP.
- You must stop the WLAN AutoConfig Service before performing the undo for the Wireless settings in Windows Vista.

Limitations

Following are the limitations:

- Wireless Network properties can not be undone for Windows Vista.
- In Wireless Network Connection Properties, under the Sharing tab the following settings are not migrated:
 - Allow other network users to connect through this computer's internet connection.
 - Settings, Services when selected Allow other network users to connect through this computer's internet connection.

- Wireless settings under WINS tab from the path Control Panel, Network and Internet, Network and Sharing Center, Manage Wireless Networks, Adapter Properties, Wireless Network Connection Properties, Networking, Internet Protocol Version 4 (TCP/IPv4), Properties, General, Advanced, Advanced TCP/IP Settings, cannot be migrated.

Chapter 3: Application Scripts

The scripts in this chapter apply to applications.

Act!

Application Script

Act!

Release Date

4/22/2002

Settings Description

Most settings are supported including:

- User information
- Passwords
- File Types
- Layout Settings
- Database Name
- Email Settings
- Macro Names

Migration Paths

The migration paths are as follows:

- From 4 to 4
- From 4 to 2000
- From 2000 to 2000

Limitations

Following are the limitations:

- Migrating 4.0 toolbars is not supported.
- Migrating 4.0 menu modifications is not supported.

Acrobat

Application Script

Adobe Acrobat

Release Date

11/15/2002

Settings Description

Migration of all settings is supported. When selecting items for migration, you are able to select all supported Adobe Acrobat settings.

Migration Paths

The migration paths are as follows:

- From 3.01 to 3.01
- From 4.0 to 4.0

Limitations

Following are the limitations:

- Web Capture and Weblink settings cannot be migrated.
- Distiller and PDF Writer may be migrated by selecting Printers migration.
- Uninstall will no longer be functional when you migrate the application to a new directory.
- Adobe font folders and the watched folder list cannot be migrated to a newer version of Adobe Acrobat.
- When migrating Adobe Acrobat settings from version 3.01 to 4.0, approximately 10% of settings support migration.

Adobe Acrobat Reader

Application Script

Adobe Acrobat Reader is a PDF document reader.

Release Date

08/01/2007

Settings Description

This script includes all the settings of Adobe Acrobat Reader.

Migration Paths

The migration paths are as follows:

- From 4.0 to 4.0
- From 4.0 to 5.0
- From 4.0 to 6.0
- From 4.0 to 7.0
- From 4.0 to 8.0
- From 5.0 to 5.0
- From 5.0 to 6.0
- From 5.0 to 7.0
- From 5.0 to 8.0
- From 6.0 to 6.0
- From 6.0 to 7.0
- From 6.0 to 8.0
- From 7.0 to 7.0
- From 7.0 to 8.0
- From 8.0 to 8.0
- From 8.0 to 9.0
- From 9.0 to 9.0
- From 9.0 to 10.0
- From 10.0 to 10.0

Notes

- To migrate files added to My Digital Editions or My BookShelves, either select the files in File Tree or create a filter for *.pdf files.
- To migrate the preferred multimedia Player settings in the Multimedia options, the required player must be installed on the destination.
- The Digital ID file settings and Digital IDs created through the Digital ID file mechanism are migrated if the versions on the source and the destination are same and are specific to user profiles. However, the Digital Id files are not migrated. They must be migrated using the filters for the *.pfx files.

Application Limitations

The following settings cannot be migrated due to the limitations in the application:

- Setting under the Edit, Preferences, Forms, Automatically calculate field values path does not retain unchecked value from 5.0 to 5.0, 6.0, 7.0, from 6.0 to 6.0, 7.0, from 7.0 to 7.0, and from all previous version to 8.0.
- Setting under the Edit, Preferences, Security, Advanced Preferences, Windows Integration, Validating Signatures path does not retain unchecked value from 7.0 to 7.0.
- Setting under the Edit, Preferences, Trust Manager path cannot change permissions for selected Multimedia player from 6.0 to 6.0, 7.0 and from 7.0 to 7.0.
- Setting under the View, Task Buttons, "Digital Editions" and "Show all Task Buttons" path, either both are checked or unchecked from 7.0 to 7.0.
- Setting under the Edit, Preferences, International, Application Language path has by default English selected, and it does not retain the changed values from 7.0 to 7.0.
- Setting under the Edit, Preferences, Display, Application Language path has by default English selected, and it doesn't retain the changed values from 5.0 to 5.0, 6.0, 7.0.
- Hide Tool Bar setting is not functioning, but upgrade migration functions well from 5.0 to 6.0, 7.0 and from 6.0 to 7.0.
- Setting under the View, Task Buttons, "ebooks" and "Show all Task Buttons" path, either both are checked or unchecked from 6.0 to 6.0, 7.0.
- Setting under the Edit, Preferences, Trust Manager path cannot change permissions for trusted documents from 6.0 to 6.0, 7.0 and from 7.0 to 7.0.
- Setting under the Edit, Preferences, Startup Application Language path has by default English selected, and it doesn't retain the changed values from 6.0 to 6.0, 7.0.
- Setting under the Edit, Preferences, Digital Signatures, Advanced Preferences, Windows Integration, Validating Signatures path doesn't retain unchecked value from 6.0 to 6.0, 7.0.
- Setting under the Edit, Preferences, Full Screen, Ignore all transitions path doesn't retain checked value from 6.0 to 6.0, 7.0.

- Setting under the Edit, Preferences, Forms, Highlight Color cannot be migrated from 5.0 to 8.0.
- Setting under Edit, Preferences, Page Display, Page Layout mapping may differ while migrating from 6.0 to 8.0 and from 7.0 to 8.0.
- Setting under the Edit, Preferences, Reviewing, Show Review Tracker Alerts path cannot be migrated from 8.0 to 8.0.

Script Limitations:

The following Acrobat settings cannot be migrated:

- Display PDF Browser from 4.0 to 4.0, from all versions to 5.0, from all versions to 6.0, from all versions to 7.0, and from all versions to 8.0.
- Certified Plug-ins from 4.0 to 4.0, from all versions to 5.0, from all versions to 6.0, from all versions to 7.0, and from 5.0 to 8.0.
- Settings under the path File, Adobe Online, Preferences are not migrated from 4.0 to 4.0, 5.0, 6.0, 7.0.
- Highlight Form fields from 5.0 to 7.0.
- Digital ID File settings are not migrated from 6.0 to 7.0.
- My BookShelf to My Digital Editions from 6.0 to 7.0.
- Undo cannot be performed for Digital signatures appearances for a particular case when the appearances list at the source is empty, but exists on the destination. This cannot be migrated from 6.0 to 6.0, 7.0 and from 7.0 to 7.0.
- Application window size and position may not get migrated from all previous versions to 8.0.

Adobe Illustrator

Application Script

Adobe Illustrator

Release Date

4/23/2002

Settings Description

The Adobe Illustrator script migrates the following:

- General Settings
- Type and Auto Tracing
- Keyboard Increments (7.0)
- Unit & Undo
- Guides & Grid
- Hyphenation options
- Plug-ins & Scratch Disk
- Files & Clipboard
- Workgroup (10.0)

- View and Window

It will not migrate between versions.

Migration Paths

Following are the migration paths:

- From 7.0 to 7.0
- From 7.0 to 9.0
- From 7.0 to 10.0
- From 9.0 to 9.0
- From 9.0 to 10.0
- From 10.0 to 10.0

Limitations

Following are the limitations:

- If the application directory on the destination computer differs from that of the source, migration of the Plug-in settings is not done.
- Adobe Online preferences cannot be migrated.
- In 7.01, the Document Setup settings are not migrated.

Adobe InDesign

Application Script

Adobe InDesign is a desktop publishing (DTP) software.

Release Date

06/28/2000

Settings Description

This script includes all the settings of Adobe InDesign.

Migration Path

- From 1.0 to 1.0
- From 1.0 to 1.5
- From 1.0 to 2.0
- From 1.5 to 1.5
- From 1.5 to 2.0
- From 2.0 to 2.0

Notes

- Depending on the system configuration, the toolbar positioning may return to the default location.
- Migration of the dictionary language between different Windows versions is not supported.

Limitations

Following are the limitations:

- Adobe Online preferences can not be migrated.
- Migration between different versions is not supported.

Adobe PageMaker

Application Script

Adobe PageMaker

Release Date

4/23/2002

Settings Description

This script migrates the following:

- Application
- Cross-Platform Converter
- Publisher Converter
- QuarkXpress Converter
- Version 3 Converter

Migration Paths

Following are the migration paths:

- From 6.5 to 6.5
- From 6.5 to 6.5.2
- From 6.5.2 to 6.5.2

Limitations

Following are the limitations:

- If the resolutions differ between the source and destination monitors, the toolbar locations may not remain the same.
- In some instances, uninstall features may not migrate.
- Migration of Pagemaker's target printer is not supported. Follow the directions of Pagemaker to load your target printer.
- Font selection is not migrated.

Adobe PageMill

Application Script

Adobe PageMill

Release Date

6/10/2002

Settings Description

The Adobe PageMill script migrates the following:

- Recent File List
- All Preferences
- View and Pasteboard settings

Migration Paths

- From 3 to 3

Limitations

The Switch to Apps settings may be lost if the corresponding applications are not installed on destination computer.

Adobe PhotoShop

Application Script

Adobe PhotoShop

Release Date

4/29/2002

Settings Description

The Adobe Photoshop script migrates the following:

- Import
- Automate
- Create Droplet
- Contact Sheet

- Multi-Page PDF to PSD
- Picture Package
- Web Photo Gallery
- Color Settings
- Preferences
- Purge and Windows settings

Migration Paths

The migration paths are as follows:

- From 4 to 4
- From 5 to 5
- From 5.5 to 5.5
- From 6 to 6

Limitations

Following are the limitations:

- The migration of some Adobe Online settings is not supported.
- If the resolution of the destination monitor differs from the source monitor, the toolbar location may not remain the same.

5.0 settings that do not migrate from Windows 2000 to Windows 2000 or Windows XP:

- Interpolation & Option, Painting Cursors, Columnsize/Width, Guides Color & Style and Memory & Image Cache.

4.01 settings that do not migrate from Windows 2000 or Windows XP:

- General, Display & Cursors, Transparency & Gamut, Units & Rules, Plug-Ins settings, and CMYK setup settings.
- When migrating the application, you need to reset the path to the Plug-in directory. Go to Edit, Preferences, Plug-Ins and check the box Additional Plug-ins.

Adobe Type Manager

Application Script

Adobe Type Manager

Release Date

3/18/2002

Settings Description

The Adobe Type Manager script migrates all of the settings of the program except those listed in limitations.

Migration Paths

- From 4 to 4

Limitations

Following is the limitation for the Adobe Type Manager script:

- Custom font sets, Deactivated Font settings are not migrated.

America Online

Application Script

America Online (AOL) is a communication service that provides users with access to both the Internet and special AOL content such as news and entertainment.

Release Date

07/09/2002

Settings Description

The America Online script includes the following:

- The Settings option includes all the settings of America Online.
- The File Cabinet option migrates the cabinet files of America Online.
- The My Calendar option migrates the Calendar.

Migration Path

- From 7.0 to 7.0

Notes

- Custom download paths may not migrate.
- Passwords will not be migrated. AOL will ask you to re-enter them the first time it is launched.
- Make sure that the AOL application settings is checked. If the file cabinet is locked, it will be permanently locked unless you include AOL settings.
- If filing cabinet is password protected, you will need to re-enter your password and restart AOL to access it for the first time.

AOL Instant Messenger

Application Script

AOL Instant Messenger is an instant messaging client.

Release Date

8/16/2005

Settings Description

The AOL Instant Messenger script migrates all the general settings.

Migration Paths

The migration paths are as follows:

- From 5.0 to 5.0
- From 5.0 to 5.1
- From 5.0 to 5.2
- From 5.0 to 5.5
- From 5.0 to 5.9
- From 5.1 to 5.1
- From 5.1 to 5.2
- From 5.1 to 5.5
- From 5.1 to 5.9
- From 5.2 to 5.2
- From 5.2 to 5.5
- From 5.2 to 5.9
- From 5.5 to 5.5
- From 5.5 to 5.9
- From 5.9 to 5.9

Notes

- The settings stored at the server are not migrated through the scripts. The server stores the latest changes done to the settings and are available whenever the client connects to the server.
- You must sign out and exit AOL Instant Messenger before migration at the source and the destination.

- You must restart your computer after migration.
- My AIM, Edit Options, Edit Preferences, Live video, Video/Audio Tuning settings are related to the system sounds. These settings must be migrated using the system sound scripts.
- My AIM, Save Buddy List Contact list can be saved. This list can be migrated using the filter option for the *.blt files.
- The list is migrated for Add-Ins Manager, but Add-Ins must be installed on the destination.

Limitations

Following are the limitations:

- Under the path My AIM, Edit Options, Edit Preferences, Stock Ticker, Edit Stocks, Symbols, Edit Alerts for AOL, the two check boxes cannot be migrated from 5.2 to 5.5.
- My AIM, Edit Options, Edit Preferences, Security scripts do not deal with certificates.

Backup Exec Desktop Pro

Application Script

Backup Exec Desktop Pro

Release Date

7/6/2001

Settings Description

The Backup Exec Desktop script migrates all the settings.

Migration Paths

- From 4.5 to 4.5

BlackBerry

Application Script

BlackBerry Desktop

Release Date

4/23/2002

Settings Description

Migrates all the settings.

Migration Paths

- From 1.6 to 1.6

BrightStor ARCserve Backup for Laptops and Desktops

Application Script

BrightStor ARCserve Backup for Laptops and Desktops is an application for taking backup of the data.

Release Date

4/06/2005

Settings Description

Migrates all the settings of BrightStor ARCserve Backup for Laptops and Desktops.

Migration Paths

The migration paths are as follows:

- From 4.0 to 4.0
- From 4.0 to 11.0
- From 4.0 to 11.1
- From 11.0 to 11.0
- From 11.0 to 11.1
- From 11.1 to 11.1

Notes

- Make sure that the client is not running when the migration is being performed.
- Make sure that the type of installation on the source and the destination is of the same type. This means that it should be either custom on both or typical on both.
- The user should migrate the files and folder related to the backup sets in the source on to the destination, if not present, using the filters option.
- The user data will not be moved to the same location on the destination in which it is in the source. Once the migration is done, the user data can be moved to the new location using Configuration, Local Configuration, Move User Data.
- If the drives that are selected on the source do not exist on the destination for the exclusion option, then these drives will not appear on the destination.

Limitations

Following are the limitations:

- The settings related to the server connection cannot be migrated, and you must fill in the details manually.

- The Typical settings of 4.0 will be migrated to the Custom settings of 11.0 and 11.1 and not to the Typical settings, because now the settings are related to the Custom settings of 11.0 and 11.1.
- The path in Restore Location will not be mapped to the new path on the destination.

Conversion Plus

Application Script

Conversion Plus converts Mac OS and other files into a format that you can use.

Release Date

05/11/2001

Settings Description

This script includes all the settings of Conversion Plus.

Migration Path

- From 6.0 to 6.0

Notes

- Make sure Outlook is installed on the destination computer before using Conversion Plus for Outlook.
- Conversion Plus must be run at least once before performing the migration.

Limitations

- Any folders set to be used on the source computer that do not exist on the destination computer will not be migrated.

CorelCENTRAL

Application Script

CorelCENTRAL

Release Date

12/23/2002

Settings Description

This script migrates the following:

- Address Book
- Alarms
- Calendar
- Card File
- Day Planner
- Mail
- Memos

Migration Paths

Following are the migration paths:

- From 8.0 to 8.0
- From 8.0 to 9.0
- From 8.0 to 10.0
- From 9.0 to 9.0
- From 9.0 to 10.0
- From 10.0 to 10.0

Limitations

Following are the limitations:

- Your mail file will only migrate if you select the .CMS document extension either on the Select Applications and Settings page or by creating a filter.
- If you have started CorelCENTRAL Calendar at the time of migration, then you must restart the source computer before migration.
- You must migrate Netscape Mail to move CorelCENTRAL 8.0 Mail settings.
- You must update the path to your mailbox file before starting CorelCENTRAL Mail.

To do this:

1. Launch CorelCENTRAL Profile Manager.
 2. Select your account and select Properties.
 3. Switch to the Storage tab.
 4. Select Change and then browse to the new location of your mailbox.
- CorelCENTRAL 8.0 Address Book, Calendar and Card Files will not migrate to a newer version.
 - CorelCENTRAL 9.0 Calendar needs to be imported manually into version 10.0 by clicking File, Import, Version 9 Calendar.
 - CorelCENTRAL Alarms will not migrate from version 9.0 to 10.0.
 - You must relink any Corel Card File linked paths.

Corel Paradox

Application Script

Corel Paradox

Release Date

8/19/2002

Settings Description

All settings including:

- View settings
- Toolbars
- Ruler Settings
- Autoselect
- Grid/Guide Settings
- Quick Connect Options

Migration Paths

Following are the migration paths:

- From 8.0 to 8.0
- From 8.0 to 9.0
- From 8.0 to 10.0
- From 9.0 to 9.0
- From 9.0 to 10.0
- From 10.0 to 10.0

Limitations

Following are the limitations:

- Clipbook, Connector and Desktop Application Director must be closed on the source and the destination systems before migrating.
- If the destination directory is different from the source the Clipbook Application Specific Shortcut Keys and QuickFinder will not be reset to the new directory.

Corel Presentations

Application Script

Corel Presentations

Release Date

6/10/2002

Settings Description

This script migrates the following:

- View settings
- Toolbars
- Ruler Settings
- Autoselect
- Grid/Guide Settings
- Quick Connect Options

Migration Paths

The migration paths are as follows:

- From 8 to 8
- From 8 to 9
- From 8 to 10
- From 9 to 9
- From 9 to 10
- From 10 to 10

Limitations

Startup Options, location of data folders and toolbars may not migrate correctly.

Corel Quattro Pro

Application Script

Corel Quattro Pro

Release Date

8/19/2002

Settings Description

All settings including:

- Toolbar Options
- Display Settings
- International Options
- Macro Settings
- File Settings
- General Set

Migration Paths

Following are the migration paths:

- From 8.0 to 8.0
- From 8.0 to 9.0
- From 8.0 to 10.0
- From 9.0 to 9.0
- From 9.0 to 10.0
- From 10.0 to 10.0

Limitations

Following are the limitations:

- Toolbars and Keyboard Shortcuts customization is not migrated between versions.
- Migration of toolbar buttons that point to external programs is not supported.
- Migration of non-US currency selection from version 8.0 or 9.0 is not supported.
- The default file extension does migrate with Corel 10. Corel 10's options pane does not support alternative extensions other than the four settings in its drop-down list (XLS, QPW, WB3, WK4). If you subsequently save the options screen, then the setting will be changed to one of these.

Corel WordPerfect

Application Script

Corel WordPerfect is a simple text editor application.

Release Date

4/04/2008

Settings Description

The Corel WordPerfect script migrates all the settings, Word Lists, WP templates, XML templates, Macros, and Labels of Corel WordPerfect.

Migration Paths

Following are the migration paths:

- From 12.0 to 12.0
- From 12.0 to 13.0
- From 12.0 to 14.0
- From 13.0 to 13.0
- From 13.0 to 14.0
- From 14.0 to 14.0

Notes

- The application must be opened at least once before all the mandatory keys are generated.
- The Toolbar Settings are migrated only if the source and the destination application versions are the same.
- The entries in the address book on the destination computer are completely removed after migration. Only the entries made in the source system are available after migration.
- On the destination computer, the files related to the Tool, Legal Tools, Pleading Expert option are completely removed after migration. Only the entries made in the source system are available after migration.

Limitations

Following are the limitations:

- File Settings for the WP templates, XML, Graphics, and Macro file locations are not migrated. Only the files from 12.0 are copied to these locations so that the user can access the modified files. This is applicable while migrating from 12.0 to 13.0 and 12.0 to 14.0.
- The custom WP templates and settings related to Project and Category relations are not migrated. Only the Default WP templates are migrated. This is applicable while migrating from 12.0 to 13.0 and 13.0 to 14.0.
- The user and main word lists from 12.0 are just appended to the existing word lists. So the user can access both the word lists— which are created in 13.0 and which are migrated from 12.0. This is applicable while migrating from 12.0 to 13.0 and 12.0 to 14.0.
- File Settings for the WP templates, XML, Graphics, and Macro file locations are not migrated. Only the files from 13.0 are copied to these locations so that the user can access the modified files. This is applicable while migrating from 12.0 to 14.0 and 13.0 to 14.0.
- The user and main word lists from 12.0 are just appended to the existing word lists. So the user can access both the word lists— which are created in 14.0 and which are migrated from 13.0. This is applicable while migrating from 13.0 to 14.0.

eTrust Antivirus

Application Script

eTrust Antivirus is an Anti-virus software.

Release Date

08/31/2007

Settings Description

The eTrustAntivirus script migrates the following:

- The Alert Manager option migrates the alert manager settings that are available in the Alert Manager window. This is applicable for the 7.1 and 8.1 versions.
- The Alert Options option migrates the alert settings that are available under the path Scanner, Alert Option. This is applicable for the 7.1 version.
- The Contact Information option migrates the contact settings that are available under the path Scanner, Contact Options. This is applicable for the 7.1 version.
- The Local Scanner option migrates the local scanner settings that are available under the path Scanner, Local Scanner. This is applicable for the 7.1 version.
- The Miscellaneous option migrates the miscellaneous settings that include Display Logo, Policy Job Delay Settings, and My Folders. This is applicable for the 7.1 version.
- The Realtime Monitor option migrates the real-time monitor settings that are available under the path Scanner, Realtime Monitor Options, Realtime Monitor, Animated Icon. This is applicable for the 7.1 version.
- The Scheduled Jobs option migrates the scheduled jobs settings that are available under the path Scanner, Scheduled Jobs. This is applicable for the 7.1 version.
- The Signature Update option migrates the signature update settings that are available under the path Scanner, Signature Update. This is applicable for the 7.1 version.
- The Realtime Monitor option migrates the real-time monitor settings that are available under the path Settings, Realtime Monitor Options. This is applicable for the 8.1 version.
- The Contact Information option migrates the contact settings that are available under the path Settings, Contact Options. This is applicable for the 8.1 version.
- The Email Options option migrates the email settings that are available under the path Settings, Email Options. This is applicable for the 8.1 version.
- The Scheduled Jobs option migrates the scheduled jobs settings that are available under the path Scan, Scheduled Jobs. This is applicable for the 8.1 version.

Migration Paths

- From 7.1 to 7.1
- From 7.1 to 8.1
- From 8.1 to 8.1

Notes

- You must restart the destination computer after completing the migration. This is applicable for both 7.1 and 8.1.
- In multi-user environment, undo will be performed only when all the users are selected except for the Local Scanner option. This is applicable for 7.1.
- In multi-user environment, undo will be performed only when all the users are selected. This is applicable for 8.1.
- In Alert Manager, the MS Exchange settings will not be migrated if they are not configured on the source. This is applicable for both 7.1 and 8.1.
- The Virus Signatures will not be migrated and must be downloaded manually. This is applicable for both 7.1 and 8.1.
- The path mapping of Realtime Monitor option for the real-time migration is possible in Unicenter Desktop DNA r11 SP2. This is applicable for both 7.1 and 8.1.
- Only the Job scheduled at startup can be migrated from eTrust Anti-virus 7.1 to eTrust Anti-virus 8.1.

Limitations

Following are the limitations:

- Only the list is migrated for the Exclusions and Exemptions, the file or folder is not migrated physically. If any file or folder (which the Exclusions and Exemptions refer to) exists on the destination computer, eTrust Anti-virus will exclude or exempt the same file or folder. This is applicable for 7.1 and 8.1.
- For multi-user migration, the user specific paths in Realtime Options, Signature Update Options, and Schedule Jobs cannot be mapped for all the users. This is applicable for 7.1.
- For multi-user migration, the user specific paths in Real-time options cannot be mapped for all the users. This is applicable for 8.1.
- The paths in Alert Manager cannot be mapped. This is applicable for 7.1 and 8.1.
- Schedule Jobs cannot be migrated when eTrust Anti-virus is installed on the default location on the source and on the custom location on the destination. This is applicable for 7.1.
- Schedule scans cannot be migrated from eTrust Anti-virus 7.1 to eTrust Anti-virus 8.1.

eTrust PestPatrol

Application Script

eTrust PestPatrol detects and removes spyware.

Release Date

08/31/2007

Settings Description

The eTrust PestPatrol script migrates the following:

- The General option migrates all the settings such as ActiveProtection and Scans that are part of the general settings. This applicable for version 5.0.
- The Proxy option migrates the proxy settings that come under the path ActiveProtection, Updates Options, Configure Proxy. This applicable for version 5.0.
- The Scheduled Tasks option migrates the scheduled tasks that come under the option Scan, Schedule a Scan. This applicable for version 5.0.
- The Realtime option migrates the real-time settings available under the path Settings, Realtime Settings. This applicable for version 8.1.
- The Exclusion option migrates the settings available under the path Settings, Exclusion. This applicable for version 8.1.

Migration Paths

- From 5.0 to 5.0
- From 5.0 to 8.1
- From 8.1 to 8.1

Notes

- You must reboot the computer after the migration is completed.
- You must update the signatures after the migration. You can use the Update window that appears after migration and restart on the destination for this purpose.
- If the network settings are changed on the new computer, the proxy settings must be configured manually. This is applicable only for 5.0.
- Only the Exclusion list under the Advanced Settings, Manage, Exclusions path (for 8.1, the path is Settings, Exclusions) is migrated. The files and folders referred to by the exclusion list are not migrated physically. However, if any file or folder referred to by the exclusion list exists on the destination, PestPatrol will exclude it.
- The Quarantined pests will not be migrated to the destination for security reasons, as they are the pests detected on the source.

- The scheduled tasks will function only when the user for whom the scheduled scan is created logs in. Also the functioning is based on the settings of the scheduled scan. This is applicable only for 5.0.
- All the settings of PestPatrol are user independent and in the case of multi-user migration, undo will happen only when all the users are selected.

Limitations

Following are the limitations:

- You cannot migrate the updated signatures from 5.0 to 5.0.
- You cannot undo the Scheduled Tasks from 5.0 to 5.0.
- The proxy settings can be migrated only when they are configured on the source; otherwise, the settings remain unchanged on the destination from 5.0 to 5.0.
- You cannot perform the undo action for the Start Active Protection Now option in all the cases from 5.0 to 5.0.
- You cannot map the user specific paths for all the users in the case of multi-user migration from 5.0 to 5.0.

eTrust Threat Management (eITM)

Application Script

eTrust Threat Management (eITM) is an integrated threat management software.

Release Date

08/31/2007

Settings Description

The eTrustThreatManagement script migrates the following:

- The Alert Notifications option migrates the alert notification settings that are common for both PestPatrol and Anti-virus. These settings are available under the path Settings, Alert Notifications.
- The Phone Home option migrates the phone home settings that are common for both PestPatrol and Anti-virus. These settings are available under the path Settings, Phone Home.
- The Log Options option migrates the log settings that are common for both PestPatrol and Anti-virus. These settings are available under the path Settings, Log Options.
- The Schedule option migrates the schedule settings that are common for both PestPatrol and Anti-virus. These settings are available under the path Update, Schedule.
- The Select Components option migrates the select component settings that are common for both PestPatrol and Anti-virus. These settings are available under the path Update, Select Components.
- The Download option migrates the download settings that are common for both PestPatrol and Anti-virus. These settings are available under the path Update, Download Settings.
- The Licensing option migrates the licensing settings that are common for both PestPatrol and Anti-virus. These settings are available under the path Advanced, Licensing.

Migration Paths

- From 8.1 to 8.1

Notes

- You must restart the destination computer after migration.
- In the multi-user environment, undo will be performed only when all the users are selected.

Limitations

Following are the limitations:

- The Update, Download Settings, Proxy settings and Advanced, Licensing, Proxy settings are migrated only when they are configured on the source; otherwise, the settings remains unchanged on the destination.

Eudora Pro

Application Script

Eudora Pro

Release Date

11/2/2002

Settings Description

This script migrates the following:

- Application appearance
- Filters
- User Settings
- Attachments
- User Folders
- Address book
- Email accounts

Migration Paths

The migration paths are as follows:

- From 3.x to 3.x
- From 3.x to 4.1
- From 4.1 to 4.1

Exceed

Application Script

Exceed

Release Date

11/14/2002

Migration Paths

- From 6 to 6

Limitations

Following are the limitations:

- Migration of HOSTS file is not supported.
- The Printer settings do not migrate.
- You must move your .src and .cfg files manually.
- Migration of the debug logs for WyseTerm is not supported.

Executive Software Diskeeper Workstation

Application Script

Executive Software Diskeeper Workstation

Release Date

11/7/2001

Settings Description

All settings are migrated.

Migration Paths

- From 5 to 5

File Maker Pro

Application Script

File Maker Pro

Release Date

2/13/2002

Settings Description

The File Maker Pro script migrates all the settings.

Migration Paths:

The migration paths are as follows:

- From 4.1 to 4.1
- From 4.1 to 5
- From 5 to 5

Flash

Application Script

Flash

Release Date

9/6/2001

Migration Paths

- From 4 to 4

Limitations

If the resolutions differ between the source and destination monitors, the toolbar locations may not remain the same.

FTBAB

Application Script

FTBAB

Release Date

5/21/2002

Settings Description

Converts IE Favorites to Netscape Bookmarks and Bookmarks to Favorites.

Migration Paths

Following are the migration paths:

- From 4.0 to 4.0
- From 4.0 to 5.0
- From 4.0 to 6.0
- From 5.0 to 5.0
- From 5.0 to 6.0
- From 6.0 to 6.0

Limitations

Following are the limitations:

- Multiple user profiles are not migrated.
- Internet Explorer 6 and Netscape 6+ bookmarks are not supported.

Gold Mine

Application Script

Gold Mine

Release Date

11/12/2001

Migration Paths

The migration paths are as follows:

- From 5 to 5
- From 5 to 5.5
- From 5.5 to 5.5

Limitations

Following are the limitations:

- The alarms cannot be turned off on destination computer.
- If the resolution of the destination monitor differs from the source monitor, the toolbar location may not remain the same.
- Databases may not be properly mapped for initial startup. When choosing a database to open verify the correct path is shown. If the path is incorrect, you need to right-click the database and change the path under properties.

Google Chrome

Application Script

Google Chrome is a freeware web browser developed by Google that uses the WebKit layout engine.

Release Date

12/11/2008

Settings Description

The Google Chrome script includes all supported Google Chrome settings.

Migration Path

- From 7.0 to 7.0
- From 7.0 to 8.0
- From 8.0 to 8.0
- From 8.0 to 9.0
- From 9.0 to 9.0
- From 9.0 to 10.0
- From 10.0 to 10.0
- From 10.0 to 11.0
- From 11.0 to 11.0
- From 11.0 to 12.0
- From 12.0 to 12.0
- From 12.0 to 13.0
- From 13.0 to 13.0
- From 13.0 to 14.0
- From 14.0 to 14.0
- From 14.0 to 15.0
- From 15.0 to 15.0

HomeSite

Application Script

HomeSite is a professional HTML editor.

Release Date

02/23/2001

Settings Description

The HomeSite script includes the following:

- The HomeSite option includes all the settings of HomeSite.
- The TopStyle option Includes all the settings of TopStyle, a CSS/XHTML/HTML editor for Microsoft Windows.

- From 4.5 to 4.5

Notes

- Any custom buttons on the toolbars that point to an external application may need to be reset.
- The Make TopStyle Dreamweaver's CSS Editor setting will be migrated with Dreamweaver.

ICQ

Application Script

ICQ is an instant messaging computer program.

Release Date

05/11/2004

Settings Description

This script migrates all the settings of ICQ.

Migration Path

- From 2000b to 2000b
- From 2000b to 2003b
- From 2000b to 4.0
- From 2003b to 2003b
- From 2003b to 4.0
- From 4.0 to 4.0

InoculateIT Anti-Virus Protection

Application Script

InoculateIT Anti-Virus Protection

Release Date

6/10/2002

Settings Description

All settings are migrated.

Migration Paths

- From 4.53 to 4.53

Limitations

Autodownload Manager, Domain Manager, Scheduled Scans, Real-time Monitor, and Service Manager settings cannot be migrated cross-platform.

Internet Explorer

Application Script

Internet Explorer is a web browser.

Release Date

10/09/2006

Settings Description

The Internet Explorer script migrates the following:

- The Addressbook option migrates the address book settings which is a list of contact information also known as address profiles.
- The Certificates option migrates the certificates found under the path Tools, Internet Options, Content Tab.

- When you migrate from IE 7 to IE8, IE 7 to IE 9, IE 7 TO 10, IE 8 to IE 9, IE 8 to IE 10, the following settings cannot be migrated:
 - Tools, Internet Options, Connections, LAN Settings, Automatically Detect Settings
 - Tools, Internet Options, Advanced, Browsing, Disable script debugging (Other)

Lotus 1-2-3

Application Script

Lotus 1-2-3

Release Date

11/12/2002

Settings Description

The Lotus 1-2-3 script migrates the following:

- General Settings
- New Workbook Defaults
- File Locations
- Recalculation
- Classic Keys
- User Setup

When selecting items for migration, you are able to select to migrate all supported Lotus 1-2-3 settings, as well as selecting to migrate the application.

Migration Paths

- From 97 to 97

Limitations

When migrating the application, the Lotus 1-2-3 Work folder on the source system must be created manually on the destination computer in order for the shortcuts in the SmartSuite drawer to work correctly.

Lotus Approach

Application Script

Lotus Approach

Release Date:

11/12/2002

Settings Description

The Lotus Approach script migrates the following:

- Internet Settings
- User Set-up
- Preferences
- SmartIcons
- Display Settings
- Order Settings
- Password

Migration Paths

- From 97 to 97

Limitations

When migrating the application, if the Lotus Approach Work folder on the source system is empty, and not created manually on the destination computer, the shortcuts in the SmartSuite drawer will not work correctly.

Lotus Freelance Graphics

Application Script

Lotus Freelance Graphics

Release Date

6/10/2002

Settings Description

The Lotus Freelance Graphics script migrates the following:

- Internet Settings
- Preferences
- Drawing Tools Settings
- SmartIcons
- Set-up for 35mm Slides
- Check Spelling

- From 97 to 97

Limitations

When migrating the application, if the Lotus Freelance Work folder and Freelance Backup folder on the source computer are empty, and not created manually on the destination system, the shortcuts in the SmartSuite drawer will not work correctly. The folder can be located in FLWORKDIR and FLWBACKUPDIR in the Destination Symbols And Values section of the cinstall.ini file.

Lotus Notes

Application Script

Lotus Notes

Release Date

4/22/2009

Settings Description

The Lotus Notes script migrates the following:

- Basic User Preferences
- International User Preferences
- User Security settings
- Toolbar Preferences
- Status Bar Preferences
- Basic Options
- Advanced Options
- User Dictionary

When selecting items for migration, you are able to select to migrate all supported Lotus Notes settings.

Migration Paths

Following are the migration paths:

- From 4.0 to 4.0
- From 4.0 to 5.0
- From 4.0 to 6.0
- From 4.0 to 6.5
- From 4.0 to 8.1
- From 5.0 to 5.0
- From 5.0 to 6.0
- From 5.0 to 6.5
- From 5.0 to 8.1
- From 6.0 to 6.0
- From 6.0 to 6.5
- From 6.0 to 8.1
- From 6.5 to 6.5
- From 6.5 to 8.1
- From 8.1 to 8.1

Limitations

Following are the limitations:

- Cannot migrate the default home page and letterhead.
- Cannot migrate the Mark documents read option under User Preferences, Basics, Additional options.
- The mailbox may need to be opened once before certain links on the Welcome Page can be selected.
- When migrating from Lotus Notes 4.6.2 to 5.0, some items cannot be migrated.

Lotus Organizer

Application Script

Lotus Organizer

Release Date

6/10/2002

Settings Description

The Lotus Organizer script migrates the following:

- Organizer Preferences
- Environment Settings
- Folder Settings
- SmartIcon Set up
- Layout Settings
- Security

Migration Paths

- From 97 to 97

Limitations

This folder is located in ORGWORKDIR or ORGBACKUPDIR in the Destination Symbols And Values section of the cinstall.ini file.

Lotus WordPro

Application Script

Lotus WordPro

Release Date

6/10/2002

Settings Description

The Lotus WordPro script migrates the following:

- General
- Locations
- Default Files
- Personal Info Preferences
- SmartIcon set up
- CycleKey
- SmartF

Migration Paths

- From 97 to 97

Macromedia Director

Application Script

Macromedia Director

Release Date

11/7/2001

Migration Paths

The migration paths are as follows:

- From 6 to 6
- From 6 to 6.5
- From 6.5 to 6.5
- From 7 to 7

Limitations:

Preferred Browser may not migrate if browser is located in different directory.

Macromedia Dreamweaver

Application Script

Macromedia Dreamweaver

Release Date

7/16/2001

Migration Paths

- From 3 to 3

Limitations

Following are the limitations:

- If the resolution of the destination monitor differs from the source monitor, the toolbar location may not remain the same.
- Some editors associated with extensions in the External Editor may not work properly and may need to be reset on the destination system.

Macromedia Fireworks

Application Script

Macromedia Fireworks

Release Date

7/16/2001

Migration Paths

The migration paths are as follows:

- From 2 to 2
- From 3 to 3
- From 3 to 4
- From 4 to 4

Limitations

Following are the limitations:

- If the resolutions differ between the source and destination monitors, the toolbar locations may not remain the same.
- The Command List is not migrated.

Macromedia FreeHand

Application Script

Macromedia FreeHand

Release Date

9/6/2001

Migration Paths

- From 8 to 8

Limitations:

If the resolutions differ between the source and destination monitors, the toolbar locations may not remain the same.

McAfee Security Center

Application Script

McAfee Security Center is an anti-virus application integrated with firewall and anti-spyware capabilities.

Release Date

08/20/2007

Settings Description

The McAfee Antivirus script migrates the following:

- The SecurityCenter Configuration option migrates the settings that include the overall security protection status and information alerts.
- The Computer and Files Configuration option migrates the general settings for protecting computer and files.
- The E-mail and IM Configuration option migrates the general settings for protecting e-mail and instant messaging.

Migration Paths

- From 7.0 to 7.0
- From 7.0 to 7.2
- From 7.2 to 7.2

Limitations

Following are the limitations:

- The migration of Personal Firewall settings cannot be supported.
- Cannot migrate the settings under the path Computer and Files Configuration, Spyware protection is enabled.
- Cannot support the migration of the Parental Control settings from 7.2 to 7.2.

Microsoft Word

Application Script

Microsoft Word is a word processor application that lets you create and edit text documents.

Release Date

04/29/2013

Settings Description

The Microsoft Word script migrates the following:

- The General option migrates the general settings such as File Locations, Toolbar options, Spelling and Grammar, Custom Dictionaries, and Formatting options.
- The Certificate option migrates all the system certificates.

Migration Paths

The migration paths are as follows:

- From 2007 to 2007
- From 2007 to 2010
- From 2007 to 2013
- From 2010 to 2010
- From 2010 to 2013
- From 2013 to 2013

Notes

- In the case of Custom Dictionaries, if the destination has more number of dictionaries than the source, then the additional dictionaries at the destination will be retained after migration.
- Files contained in the path Tools, Options, File Locations, Startup Path are migrated as part of the Add-ins settings, as Startup Path mostly contains add-ins.
- Under the path Tools, Options, File Locations except Picture Path; no files from any other default file locations are migrated.

Limitations

- The settings under the path Tools, Options, Advanced, General are not migrated
- Add-ins migration is not supported.

- The migration of Mailing address setting under the path Tools, Options, Advanced, General, is not supported.
- When you are migrating from 2007 to 2013 or from 2010 to 2013, Color scheme settings under the path File, Options, General, are not migrated.
- When you are migrating from 2007 to 2013 or from 2010 to 2013, Printing options under the path File, Options, Display, are not migrated.
- When you are migrating from 2007 to 2013 or from 2010 to 2013, Mark grammar errors as you type under the path File, Options, Proofing, When correcting spelling and grammar in Word, is not migrated..
- When you are migrating from 2007 to 2013 or 2010 to 2013, Use smart cut and paste settings under the path File, Options, Advanced, Cut copy and paste, are not migrated.
- When you are migrating from 2007 to 2013 or 2010 to 2013, Print settings under the path File, Options, Advanced, are not be migrated.
- AutoCorrect Options under the path File, Options, Proofing, AutoCorrect options, is not migrated.
- When you are migrating from 2007 to 2013 or 2010 to 2013, Writing Style Settings under the path File, Options, Proofing, When correcting spelling and grammar in Word, are not migrated.
- When you are migrating from 2007 to 2013 or 2010 to 2013, Diacritic color setting under the path File, Options, Advanced, Show document content are not migrated.
- When you are migrating from 2007 to 2013 or 2010 to 2013, Use draft font in Draft and Outline views under the path File, Options, Advanced, Show document content, are not migrated.

Mozilla Firefox

Application Script

Mozilla Firefox is a free and open source web browser developed for Microsoft Windows, OS X, and Linux, coordinated by Mozilla Corporation and Mozilla Foundation.

Release Date

12/11/2008

Settings Description

The Mozilla Firefox script includes all supported Mozilla Firefox settings.

Migration Path

- From 1.5 to 1.5
- From 1.5 to to 2.0
- From 2.0 to 2.0
- From 2.0 to 3.0
- From 3.0 to 3.0
- From 3.0 to 3.5
- From 3.5 to 3.5
- From 3.5 to 3.6
- From 3.6 to 3.6
- From 3.6 to 4.0
- From 4.0 to 4.0
- From 4.0 to 5.0
- From 5.0 to 5.0

MS Access

Application Script

MS Access is a relational database management system that combines the relational Microsoft Jet Database Engine with a graphical user interface.

Release Date

04/29/2013

Settings Description

The MS Access script migrates all supported Microsoft Access settings.

Migration Path

- From 2007 to 2007
- From 2007 to 2010
- From 2007 to 2013
- From 2010 to 2010
- From 2010 to 2013
- From 2013 to 2013

Notes

- For Custom Dictionaries, if the destination has more number of dictionaries than the source, the additional dictionaries at the destination will be retained after migration.
- Custom Dictionaries at the destination are overwritten after the migration.

Limitations

Following are the limitations:

- Add-ins migration is not supported.
- For Custom Dictionaries, if the destination has more number of dictionaries than the source, the additional dictionaries at the destination will be retained after migration.
- When you are migrating from 2007 to 2013, recent document setting is not migrated. As a result you cannot find any list of recently opened documents under the path File, Recent, Recent Documents.
- Report for MS Access 2010 to 2010 migration. Options that do not migrate:
 - Access Options, Current database

- Access Options, Client settings, No of recent documents
- Access Options, Client settings This database in general tab
- Access Options, Privacy Options, Trust center, Privacy all options do not migrate.

MS Excel

Application Script

Microsoft Excel is an application for creating spreadsheets.

Release Date

04/29/2013

Settings Description

The MExcel script migrates the following:

- The General option migrates all the basic settings of MExcel.
- The Certificates option migrates the system certificates.

Migration Paths

The migration paths are as follows:

- From 2007 to 2007
- From 2007 to 2010
- From 2007 to 2013
- From 2010 to 2010
- From 2010 to 2013
- From 2013 to 2013

Notes

- For Custom Dictionaries, if the destination has more number of dictionaries than the source, the additional dictionaries at the destination will be retained after migration.
- Only those certificates and their settings are migrated through the script that can be manually exported and imported.

Limitations

The following settings cannot be migrated:

- Add-ins migration is not supported.
- Undo of Toolbar customization from default settings to custom settings migration cannot be supported from 2007 to 2007.

- The setting under the path File, Excel options, Advanced, General, Service options, Customer feedback options, No, I don't wish to participate (if selected on the source) may not be migrated from 2007 to 2007 if Excel is not run even once on the destination.
- The setting under the path File, Excel options, Trust center, Trust center settings, Privacy options, Sign up for the customer experience improvement program (if unchecked) cannot be migrated from 2007 to 2007.

MS Exchange

Application Script

MS Exchange is a Microsoft Exchange mail client.

Release Date

7/06/2006

Settings Description

The MExchange script migrates the following:

- All MS Exchange application settings.
- MS Exchange application.
- All Windows Messaging settings.

Limitations

Following are the limitations:

- Windows Messaging is not supported on Windows 2000, Windows XP, or Windows Vista.
- Microsoft Exchange is not supported on Windows 2000, Windows XP, or Windows Vista.

MS FrontPage

Application Script

MS FrontPage is an HTML editor and web site management application.

Release Date

4/22/2004

Settings Description

The Front Page script migrates the following:

- View Options
- Page Size Settings
- Accessibility Options
- General Options
- Page Options
- Auto-thumbnails, Font
- Authoring options
- IntelliSense settings
- Ruler options

Migration Paths

- From 1997 to 1997
- From 1997 to 2000
- From 1997 to XP
- From 2000 to 2000
- From 2000 to XP
- From XP to XP
- From XP to 2003
- From 2003 to 2003

Limitations

Following are the limitations:

- Tools, Page Options, General, Use DIV tags when positioning.
- Tools, Page Options, Auto Thumbnail(t).

- Tools, Options, Report Views(t).
- May give errors when testing on foreign operating systems.

MSOffice

Application Script

MSOffice represents the MS Office components shared by other Microsoft applications.

Release Date

7/21/2005

Script Description

The MSOffice script migrates the MS Office tools settings.

Migration Paths

The migration paths are as follows:

- From 1995 to 1995
- From 1995 to 1997
- From 1995 to 2000
- From 1995 to XP
- From 1995 to 2003
- From 1997 to 1997
- From 1997 to 2000
- From 1997 to XP
- From 1997 to 2003
- From 2000 to 2000
- From 2000 to XP
- From 2000 to 2003
- From XP to XP
- From XP to 2003
- From 2003 to 2003

Notes

- Use (ODBC) Database script to migrate the database settings for MSVisio.

- Use Net Meeting script to migrate the Net Meeting settings for MSVisio.

Limitations

- Manually inserted clips cannot be migrated automatically from previous versions to 2003, but their thumbnails can. You can move these as files and then use ClipArt Gallery to import them again.
- The Genius Office Assistant is no longer present in Office XP. Your assistant will revert back to the Paperclip while migrating from 2000 to XP.
- Migration will use the English file format (MSO1033.acl) as the default for migrating the AutoCorrect file from 1997 to 2000.
- The migration will add all of the default items back into your AutoCorrect List from 1997 to 2000, XP, 2003.
- Unable to migrate the choice of Office Assistants from Office 1997 to a higher version. You must re-select the Assistant from previous versions to XP and from previous versions to 2003.
- You will need to manually add the clip art you have migrated to Windows XP's Clip Art Organizer from previous versions to 1997, 2000, XP, 2003. You must follow these steps for each folder listed in step 6:
 1. Open the Clip Organizer. Select Insert, Picture, Clip Art.
A Clip Organizer link appears at the bottom of the Task Pane.
 2. Click the link.
The Clip Organizer opens.
 3. Under the File menu, select New Collection.
 4. Name the collection and click OK.
 5. Right-click the collection and select Collection Properties.
 6. Click the Add button. Select the folder below and then click the Add button.
 7. Click OK and then leave the Clip Organizer.
- If your Program Files directory has changed drive letters, Clip Art will function properly only if you follow the steps mentioned below. This is applicable while migrating from previous versions to 1997 and 2000.
 1. Double-click a file that has been added to the Clip Art Gallery.
 2. An Alert appears. Click OK.
 3. The Update dialog appears. Click Update All.
 4. Check Network Drives in the new dialog that appears after clicking Update All, and then click OK.

5. Click Update Location in the new dialog.
6. In the open dialog, navigate to \Program Files\Common Files\Microsoft Shared\ArtGallery\Downloaded Clips. Select the single file that is there.

MS Office Shortcut Bar

Application Script

MS Office Shortcut Bar

Release Date

4/22/2004

Settings Description

The MS Office Shortcut Bar script migrates all the settings for the MS Office Shortcut Bar (except as noted in the Limitations section) between the same and higher versions.

Migration Paths

Following are the migration paths:

- From 1997 to 1997
- From 1997 to 2000
- From 1997 to XP
- From 2000 to 2000
- From 2000 to XP
- From XP to XP

Limitations

Following are the limitations:

- The MS Office Shortcut Bar was removed by Microsoft in the 2003 version of Office. Migrations to this version are not supported.
- The MS Office Shortcut Bar must be closed before you migrate.
- Toolbar buttons may become obsolete if there are not corresponding files\paths on the destination computer.
- The contents of system defined toolbars such as Desktop and Favorites must be migrated separately by choosing to move the specific folder.

- Unable to detect application on destination, toolbars will migrate but your settings may have to be reset or re-migrated.
- Toolbar colors may change when migrating to a display with different color settings.
- If you are migrating MS Office applications with the Shortcut Bar, you will need to perform the MS Office Shortcut Bar migration again.
- If toolbars on source are not named the same as the destination toolbars, the old toolbars (which will appear as buttons on the new toolbar) will have to be closed manually after migration.

MS OneNote

Application Script

Microsoft OneNote is a computer program for free-form information gathering and multi-user collaboration. It gathers users' notes (handwritten or typed), drawings, screen clippings, and audio commentaries, and shares them with other OneNote users over the Internet.

Release Date

04/29/2013

Script Description

The MS OneNote script migrates all supported Microsoft OneNote settings.

Migration Paths

The migration paths are as follows:

- From 2010 to 2010
- From 2010 to 2013
- From 2013 to 2013

Notes

- For Custom Dictionaries, if the destination has more number of dictionaries than the source, the additional dictionaries at the destination will be retained after migration.

Limitations

- Add-ins migration is not supported.

MS Outlook

Application Script

MS Outlook helps you manage your mails and appointments.

Release Date

04/29/2013

Script Description

The MS Outlook script migrates the following:

- The General option migrates all the basic settings of MS Outlook.
- The MailFiles option migrates the user profiles and their corresponding .pst files.
- The Certificates option migrates the system certificates.
- The Addins option migrates the settings associated with the corresponding add-ins. An add-in is a program that can be attached to MS Outlook to give it additional functionality. Add-ins are specific to a particular application.

Migration Paths

The migration paths are as follows:

From 2007 to 2007

From 2007 to 2010

From 2007 to 2013

From 2010 to 2010

From 2010 to 2013

From 2013 to 2013

Notes

- For Custom Dictionaries, if the destination has more number of dictionaries than the source, the additional dictionaries at the destination will be retained after migration.
- You should install add-ins in the destination, before migrating add-ins settings.
- The Time Zone settings under the path Tools, Options, Calendar Options are related to the system time zone settings and can be migrated using the Time Zone option in the System settings.
- The Zone settings under the path Tools, Options, Security can be migrated using the IE option, as they are related to the IE settings.
- Migration of Mail files must not be done if Outlook is configured using the separate configurations.
- The settings under the path Tools, Options, Instant Messaging, Options are related to the Windows Messenger settings and can be migrated using the Windows Messenger option in the Application settings.
- If the Home Page is a file, then it has to be manually migrated using Filters.

Troubleshooting

Problem: If Outlook is configured using the cached mode and there is an error indicating that you need to connect to the Exchange server at least once, you must follow these steps:

1. Outlook prompts with a dialog to enter the details related to the Exchange server and username.
2. Even though the details already exist, re-enter the details.
3. Now open Outlook again and it opens without any errors.

Limitations

Following are the limitations:

- When you are migrating from 2007 to 2013 or 2010 to 2013, following settings cannot be migrated:
 - Automatically process meeting requests and responses to meeting requests and polls under the path File, Options, Mail, Tracking.
 - Update tracking information, and then delete responses that don't contain comments under the path File, Options, Mail, Tracking.
 - When in schedule view, show free appointments under the path File, Options, Calendar, Display options.
 - Allow UTF-8 support for the mail to protocol under the path File, Options, Advanced, International options.

- Programmatic Access Security under the path File, Options, Trust Center, Trust Center Settings.
- Insert/paste pictures as under the path File, Options, Mail, Compose messages, Editor Options, Advanced.
- Maximum space on hard disk settings cannot be migrated for French and German languages, under the path File, Options, Advanced, Developers, Custom Forms, Temporary storage for forms.
- Location of Archive.pst for each of the folders such as Inbox, Contacts must be mapped manually.
- You cannot migrate AutoCorrect options under the path File, Options, Mail, Editor Options, and Proofing.
- You cannot migrate Indexing Options under the path File, Options, Search.
- You cannot migrate Schedule an automatic send/receive settings under the path File, Options, Advanced.
- Navigation Pane Options should not be migrated due to technical limitation under the path File, Options, Advanced, Outlook panes, Navigation Pane.
- You cannot migrate To-Do Bar settings under the path View, Layout.
- You cannot migrate Start Outlook in this folder setting under the path File, Options, Advanced, Outlook start and exit.
- You cannot migrate add-ins settings, if the corresponding add-ins are not installed on the destination before migration.
- The settings under the path File, Options, Calendar, Weather, Weather Settings are not migrated.

MS Outlook Express

Application Script

Microsoft Outlook Express is an email client that comes with Internet Explorer.

Release Date

7/08/2008

Settings Description

This script migrates the following settings:

- All MS Outlook Express settings
- Address Book settings
- News and Mail Accounts settings

Migration Paths

The migration paths are as follows:

- From 4.0 to 4.0
- From 4.0 to 5.0
- From 4.0 to 5.5
- From 4.0 to 6.0
- From 5.0 to 5.0
- From 5.0 to 5.5
- From 5.0 to 6.0
- From 5.5 to 5.5
- From 5.5 to 6.0
- From 6.0 to 6.0

Notes

- The accounts already configured on the destination are not overwritten. All the accounts from the Start Up identity on the source are migrated to Windows Mail.
- The settings of the default identity on the source are migrated to Windows Mail.
- While migrating to Windows Mail, the settings and accounts only for the default identity are considered.
- To move your Address Book, you must log on as a current user before upgrading from 4.0.
- Contacts from Address Book in Outlook Express are not upgraded to Windows Contacts in Windows Mail. You can use the following command line to import the same:

```
" 'Windows Mail install path\Wab' /Import 'path to wab file' "
```
- You must import and export the messages manually to migrate them from Outlook Express to Windows Mail.

Limitations

Following are the limitations:

- You cannot migrate Inbox rule for moving or copying messages to specific folders from 4.0 to 5.0, 5.5, 6.0.
- Migration of visible columns for Outlook Express is not supported from 4.0 to 5.0, 5.5, 6.0.
- You cannot migrate passwords for identities from 5.0 to 5.0, 5.5, 6.0; from 5.5 to 5.5, 6.0; and from 6.0 to 6.0. The passwords on your identities have been disabled.

- Current view option in View cannot be migrated from 5.0 to 5.0, 5.5, 6.0; from 5.5 to 5.5, 6.0; and from 6.0 to 6.0.
- Migration from the default settings in Outlook Express to the non-default settings in Windows Mail cannot be performed from previous versions to Windows Mail.

MS NetMeeting

Application Script

MS NetMeeting

Release Date

6/10/2002

Migration Paths

- From 3.01 to 3.01

MSN Messenger

Application Script

MSN Messenger is an instant messaging client.

Release Date

08/03/2007

Settings Description

The MSNMessenger script migrates all settings of MSN Messenger.

Migration Path

- From 7.0 to 7.0
- From 7.0 to 7.5
- From 7.0 to 8.0
- From 7.0 to 8.1
- From 7.5 to 7.5
- From 7.5 to 8.1
- From 8.1 to 8.1
- From 8.1 to 8.5
- From 8.5 to 14.0
- From 14.0 to 14.0
- From 14.0 to 15.4
- From 15.4 to 15.4

Notes

- Close all instances of MSN Messenger before migrating.

Limitations

- Cannot migrate settings of the login screen.
- Cannot migrate Customized Display Picture, Emoticons, Backgrounds.

MS PowerPoint

Application Script

MS PowerPoint is an application for creating presentations.

Release Date

04/29/2013

Settings Description

The MS PowerPoint script migrates the following:

- The General option migrates the general settings such as Toolbar options, AutoCorrect options, and Custom Dictionaries.
- The Certificates option migrates all the system certificates.

Migration Paths

The migration paths are as follows:

- From 2007 to 2007
- From 2007 to 2010
- From 2007 to 2013
- From 2010 to 2010
- From 2010 to 2013
- From 2013 to 2013

Notes

- For Custom Dictionaries, if the destination has more number of dictionaries than the source, the additional dictionaries at the destination will be retained after migration.
- When you are migrating from earlier versions to 2013, add-ins cannot be migrated.
- The following add-ins are supported. The settings of these add-ins are migrated along with the General settings:

Limitations

Following are the limitations:

- The setting under the File, PowerPoint options, Advanced, General, Service options, Customer feedback options, No, I don't wish to participate path if selected on source may not be migrated from 2007 to 2007.
- Setting under the File, PowerPoint options, Trust center, Trust center settings, Privacy options, Sign up for the customer experience improvement program path, if unchecked, may not be migrated from 2007 to 2007.

- Migration of add-ins is not supported from office 2007 to office 2013, 2010 to office 2013 and office 2013 to office 2013.

MS Project

Application Script

MS Project is a project management application that allows users to estimate resource requirements, analyze task dependencies, track project progress, and so on.

Release Date

05/10/2007

Settings Description

The MS Project script migrates all supported Microsoft Project settings.

Migration Paths

- From 1998 to 1998
- From 1998 to 2003
- From 1998 to 2007
- From 2000 to 2000
- From 2000 to 2003
- From 2000 to 2007
- From 2003 to 2003
- From 2003 to 2007
- From 2007 to 2007
- From 2007 to 2010
- From 2010 to 2010

Notes

- Custom Dictionaries at the destination are overwritten after the migration.

Limitations

Following are the limitations:

- Report for MS Project 2010 to MS Project 2010 migration
Options that do not migrate:
 - Project Options, General, Initials
- Report for MS Project 2007 to MS Project 2010 migration
Options that do not migrate:
 - Quick Access toolbar does not migrate

MS Visio

Application Script

MS Visio is a software for Microsoft Windows that allows users to use vector graphics for creating the diagrams.

Release Date

04/29/2013

Settings Description

The MSVisio script migrates the following:

- The General option migrates the general settings which include options for categories of various shapes, color schemes, drawing window options, display options, task options, and so on.
- The Addins option migrates the add-ins. An add-in is a program that can be attached to MSVisio to give it additional functionality. Add-ins are specific to a particular application. The following add-ins are supported:
 - Netzoom (supported in MSVisio 10.0, 11.0, and 12.0) needs to be installed on the destination before migration.
 - 3D Visioner (supported in MSVisio 10.0 and 11.0) needs to be installed on the destination before migration.
 - Microsoft Visio Crime Scenes Add-in (supported in MSVisio 6.0).
 - Clip-Art (supported in MSVisio 10.0)

Migration Paths

- From 2007 to 2007
- From 2007 to 2010
- From 2010 to 2010
- From 2010 to 2013
- From 2013 to 2013

Notes

- If destination is prior to 2013, after migration, custom dictionaries are overwritten at the destination.
- The file paths and data are migrated for Stencils and Templates for the paths mentioned in Filepaths.
- The file paths for Drawing, Start-Up, Filters, Add-ons, Help will be migrated, but the data will not be migrated. The data must be migrated by using the filter option.

Limitations

Following are the limitations:

- Report for MS Visio 2010 to MS Visio 2010 migration
Options that do not migrate:
 - Visio options, Advanced, Maximum number of undo
 - Visio options, Advanced, Angle
 - Visio options, Advanced, Show customer submitted Office.com content
 - Visio options, Advanced, Default units, Text
 - Visio options, Advanced, Default units, Duration
- Report for MS Visio 2007 to MS Visio 2010 migration
Options that do not migrate:
 - Quick Access toolbar does not migrate
- Settings that do not migrate in Visio:
 - Options, Advanced, Default units, Text
 - Options, Advanced, Default units, Duration
 - Options, Advanced Editing Options Zoom on roll with Intelli Mouse
 - Options, Advanced, Editing Options, Center selection on zoom
 - Options, Advanced, General, Run in developer mode.
 - Options, Customize Ribbon, Customize The ribbon, Developer
 - Recent document setting is not migrating from 2007 to 2013, and from 2010 to 2013.
- Migration of MS Visio 32-bit to MS Visio 64-bit is not supported on a 64-bit operating system.

MS Visual Studio

Application Script

Microsoft Visual Studio provides an integrated environment to manage all the Visual Basic, C++, .NET, Windows, and C# applications.

Release Date

07/04/2008

Settings Description

The MS Visual Studio script migrates all the settings of Visual Studio such as IDE appearance, Debugging, External Tools settings, Editors, and so on.

Migration Paths

- From 6.0 to 6.0
- From 6.0 to 2003
- From 6.0 to 2005
- From 6.0 to 2008
- From 2003 to 2003
- From 2003 to 2005
- From 2003 to 2008
- From 2005 to 2005
- From 2005 to 2008
- From 2008 to 2008
- From 2008 to 2010
- From 2010 to 2010

Notes

- The following add-ins are supported in Visual Studio 6.0:
 - ActiveXDocumentWizard6.Wizard
 - AddInToolbar6.Connect
 - APIDeclarationLoader.AddInDesigner
 - AppWizard6.Wizard
 - ClassBuilder6.Wizard
 - ControlWiz6.Wizard

- DataFormWizard6.Wizard
- MSVBDataObjGen.Wizard
- PAddIn.AddIn
- PropertyPageWizard6.Wizard
- ResEdit6.Connect
- TempMgr.AddInDesigner1
- VBSDIAddIn.Connect
- VcmMgr.Connect
- WizMan6.Connect
- The version of .NET framework must be compatible with the installed version of Visual Studio, for example, Visual Studio 7 does not get installed with .NET 2.0.

Limitations

Following are the limitations:

- All the IDEs in the source computer must be run at least once for the default settings to be created. This is applicable while migrating from 8.0 to 8.0
- Profile is not migrated because it resets the default settings of the IDE after migration. This is applicable while migrating from 8.0 to 8.0.
- External tools must be installed on the destination computer before migration. This is applicable while migrating from 8.0 to 8.0.
- The add-ins must be available on the destination computer before migration. This is applicable while migrating from 6.0 to 6.0.
- Fonts and colors cannot be migrated. This is applicable while migrating from 7.1 to 8.0.

Netscape

Application Script

Netscape is a cross-platform browser.

Release Date

10/31/2007

Settings Description

The Netscape script migrates the following settings for Netscape Browser (8.0 and 8.1) and Netscape Navigator (9.0):

- Configuration option migrates all the configuration settings.
- Cookies option migrates all the Cookies. Cookies keeps a list of recently opened web sites.
- Bookmarks option migrates all the user bookmarks.
- Search Plugins option migrates add-ons for Netscape's built-in search feature.
- Datacards option migrates all the information regarding stored data cards.
- History option migrates all the visited sites and searched items if enabled.

Migration Paths

The migration paths are as follows:

- From 8.0 to 8.0
- From 8.0 to 8.1
- From 8.0 to 9.1
- From 8.1 to 8.1
- From 8.1 to 9.1
- From 9.1 to 9.1

Notes

- Close all instances of Netscape before migration.
- All the profiles on the destination are retained after migration. If both the source and the destination have default profiles, only the source default profile is retained.
- Run Netscape once before starting migration.

Limitations

Following are the limitations:

- To view all the profiles, select the Show Login Screen when Starting Netscape option under the path Profiles, Global Settings. This is applicable while migrating from 8.0 to 8.1.
- An error message appears with the message "Chrome Registration Failed". This message appears only for the first time the profile is used. Netscape itself does the required registration, click ok to complete the migration successfully. This is applicable while migrating from all previous versions to 9.0.
- The Profile picture is not migrated in all scenarios. This is applicable while migrating from 8.1 to 8.1.
- To view the bookmarks, click Manage Bookmarks. This is applicable while migrating from all previous versions to 9.0.
- Migration of downloads such as Extensions, Themes, and Plug-ins are not supported. Themes might get migrated in some scenarios, but it is recommended to install custom themes manually after migration. This is applicable while migrating from all previous versions to 9.0.
- Application Issue: On creation of a new profile, the files of the default profile gets created, but do not get deleted from the Profile menu. The Default profile should be deleted manually if more than one profile exists before migration. This is applicable while migrating from all previous versions to 9.0.

Netware Client

Application Script

Netware Client

Release Date

6/10/2002

Migration Paths

- From 4 to 4

Norton AntiVirus

Application Script

Norton AntiVirus

Release Date

6/10/2002

Settings Description

The Norton AntiVirus script migrates the following settings:

- General Settings
- Live Update
- RescueDisk
- Scheduled Tasks

Migration Paths

- From 5 to 5

Norton Ghost

Application Script

Norton Ghost

Release Date

6/10/2002

Settings Description

Migrates all the settings.

Migration Paths

- From 2000 to 2000

Norton Internet Security

Application Script

Norton Internet Security (NIS) is a computer utility suite with a focus on providing comprehensive Internet protection.

Release Date

03/22/2001

Settings Description

The Norton Internet Security script migrates the general settings such as file scanning, e-mails scanning settings.

Migration Path

- From 2001 to 2001

Norton Utilities NT

Application Script

The Norton Utilities releases were collections of software utilities like Disk Doctor, Speed Disk, System Doctor, UnErase Wizard. Norton Utilities provide automated repair, recovery, and protection for Windows NT servers and workstations.

Release Date

01/30/2001

Settings Description

The Norton Utilities script includes the following:

- The Norton Disk Doctor option migrates the settings of Norton Disk Doctor, which checks the file directories for errors and attempts to repair them.
- The Speed Disk option migrates the settings of Norton Speed Disk, which defragments and optimizes NT files.
- The System Information option migrates the settings of Norton System Information, which gives users a comprehensive information about their system such as CPU and BIOS information. System Information gives users a status report on the disk space usage, memory usage, network information, multimedia components, and printer and display details.
- The Norton System Doctor option migrates the settings of Norton System Doctor, which continuously monitors the workstation or server, anticipating potential problems and fixing them automatically before they cause a system crash or data loss.
- The UnErase Wizard option migrates the settings of UnErase Wizard, which can be used to recover the lost files.

Migration Path

- From 1.0 to 1.0

Notes

- Before migrating, make sure Norton Utilities has completely stopped running.

Paint Shop Pro

Application Script

Paint Shop Pro

Release Date

6/10/2002

Migration Paths

The migration paths are as follows:

- From 5 to 5
- From 5 to 6
- From 6 to 6

Limitations

The Digital Camera configuration is not upgraded from version 5 to version 6.

Palm Desktop

Application Script

Palm Desktop application synchronizes Palm smart phone with the offline information.

Release Date

5/18/2005

Settings Description

The Palm Desktop script migrates the following:

- General settings that apply to all the Palm users.
- Users settings based on the Palm user data and settings.

Migration Paths

The migration paths are as follows:

- From 3.1 to 3.1
- From 3.1 to 4.0.1
- From 3.1 to 4.1.4
- From 4.0.1 to 4.0.1
- From 4.0.1 to 4.1.4
- From 4.1.4 to 4.1.4

Notes

- It is recommended to migrate all the Palm settings to avoid confusion.
- The Custom Columns labels are saved as per the User settings, but the View Columns labels are saved as the General settings. This leads to undefined Custom Columns labels on view; if migrating only the General settings.

Limitations

Following are the limitations:

- In the Users migration, the View Sort By option for Contacts, Tasks, and Memos applications will not migrate from earlier versions to 4.1.4.
- In the General migration, the order of application tabs is altered from earlier versions to 4.1.4.
- In the Users migration, the Primary Contact option for Address will not migrate from 4.0.1 to 4.1.4.

- In the Users migration, the Install settings for HotSync will not migrate from 4.0.1 to 4.1.4.
- In the Users migration, the Tasks View options are not migrated from 4.0.1 to 4.1.4.
- In the General migration, the View Show Columns options for Address are partially migrated from 4.0.1 to 4.1.4.
- ToDo View Show Options will not migrate. In version 4.0.1 and version 4.1.4, Tasks (ToDo) View Show Columns is migrated as the General settings. In version 3.1, it is migrated as the Users settings.

- From 99 to 99

Quicken

Application Script

Quicken manages Quicken data files and settings.

Release Date

3/24/2005

Settings Description

The Quicken scripts migrates the Quicken settings.

Migration Paths

The migration paths are as follows:

- From 1999 to 1999
- From 1999 to 2000
- From 1999 to 2001
- From 1999 to 2002
- From 1999 to 2003
- From 1999 to 2004
- From 1999 to 2005
- From 2000 to 2000
- From 2000 to 2001
- From 2000 to 2002
- From 2000 to 2003
- From 2000 to 2004
- From 2000 to 2005
- From 2001 to 2001
- From 2001 to 2002
- From 2001 to 2003
- From 2001 to 2004
- From 2001 to 2005
- From 2002 to 2002
- From 2002 to 2003
- From 2002 to 2004

- From 2002 to 2005
- From 2003 to 2003
- From 2003 to 2004
- From 2003 to 2005
- From 2004 to 2004
- From 2004 to 2005
- From 2005 to 2005

Notes

Quicken has four different versions - Basic, Deluxe, Premier, and Premier Home and Business. Ensure that you do not migrate across these versions.

Limitations

Following are the limitations:

- Settings from the path Edit, Preferences, Reminders do not get migrated for 2005.
- Not all settings are migrated. The settings files are in different formats and do not convert automatically from earlier versions to 2005.

RealOne Player

Application Script

RealOne Player is a cross-platform media player that plays a number of multimedia formats including MP3, MPEG-4, QuickTime, Windows Media, and multiple versions of proprietary RealAudio and RealVideo formats.

Release Date

07/08/2002

Settings Description

This script migrates all the settings of RealOne Player.

Migration Path

- From 6.0 to 6.0

Notes

- Playlists will not be migrated.

Siebel Sales, Personal Edition

Application Script

Siebel Sales, Personal Edition

Release Date

6/10/2002

Migration Paths

- From 6.01 to 6.01

System Mechanic

Application Script

System Mechanic

Release Date

6/10/2002

Migration Paths

- From 3.5 to 3.5

Timbuktu

Application Script

Timbuktu

Release Date

6/10/2002

Settings Description

The Timbuktu script migrates the following:

- Security Settings
- Guest Settings
- Registered User Settings
- General Settings
- Observe/Control Settings

Migration Paths

Following are the migration paths:

- From 1.5 to 1.5
- From 1.5 to 2.0
- From 2.0 to 2.0

Winamp

Application Script

Winamp can be used to play the music files and manage them in a playlist. Besides MP3, Winamp supports a very wide variety of contemporary and specialized music file formats, including MIDI, MOD, MPEG-1 audio layers 1 and 2, AAC, M4A, FLAC, WAV, and Windows Media Audio.

Release Date

09/12/2002

Settings Description

The Winamp script includes the following:

- The Settings option migrates all the settings of Winamp.
- The Skins option migrates the skin for the Winamp.
- The Local Playlists option migrates the local playlists. This is applicable only for 3.0.

Migration Path

- From 2.8 to 2.8
- From 3.0 to 3.0

Notes

- If a newer version of the skin is available on the destination, it will not be overwritten.
- Some Winamp3 skins use scripts and store preferences specially. These settings may not migrate properly.
- If the default playlist editor is not used to control its local playlists, the playlist will not be migrated. This is applicable only for 3.0.
- Your playlists may not be valid until you move your media files to the same location on the migration target. You must migrate these files using the file and folder selection. This is applicable only for 3.0.

Limitations

- Upgrade from Winamp 2.8 to 3.0 is not supported.

Windows Media Player

Application Script

Windows Media Player is an application used for playing audio and video on computers running Microsoft Windows.

Release Date

1/17/2007

Settings Description

The Windows Media Player script migrates the following:

- Settings option migrates the Video settings, Menu Bar settings, Plug-ins properties, Player settings, Now Playing options, and so on.
- File Associations option migrates all the file types associated with the Windows Media Player like .wma, .wmv.
- Media Library (List Only) option migrates the library database file. This file stores the information that is tracked in the media library.

Migration Paths

The migration paths are as follows:

- From 8.0 to 8.0
- From 8.0 to 9.0
- From 8.0 to 11.0
- From 8.0 to 12.0
- From 9.0 to 9.0
- From 9.0 to 11.0
- From 9.0 to 12.0
- From 12.0 to 12.0

Notes

- Some file formats are not disassociated from Windows Media Player.
- Links from My Stations are not transferred.
- The Media Library links work only if the media files are in the same location as on the source computer.

- The Display on top when in skin mode check box under the Tools, Options, Player, Player settings path retains its functionality in all upgrades to 11.0 and 12.0; even though, the Keep the Player on top of other windows check box (Tools, Options, Player, Player settings) in 11.0 and 12.0 will not get checked.
- The playlist and the related files can be migrated using the Files and Folders option.
- Zone Settings under the Tools, Options, Security path can be migrated using the IE option as they are related to the IE settings.
- The Work Offline option under the File menu can be migrated using the Outlook or IE option as it is related to the Outlook or IE settings.

Limitations

Following are the limitations:

- You cannot migrate the Skin mode option from 8.0 to 11.0 and 12.0.
- You cannot migrate the Copy music at this quality option in Copy Music from 8.0 to 11.0 and 12.0.

Windows Messenger

Application Script

Windows Messenger allows real-time communication with other applications.

Release Date

6/28/2005

Settings Description

The WindowsMessenger script migrates the following:

- Migrates General settings found under Tools, Options.
- Migrates settings installed with Plus.

Migration Paths

The migration paths are as follows:

- From 4.6.0082 to 4.6.0082
- From 4.6.0082 to 4.6.0084
- From 4.6.0082 to 5.0.0482
- From 4.6.0082 to 5.1.064
- From 4.6.0084 to 4.6.0084
- From 4.6.0084 to 5.0.0482
- From 4.6.0084 to 5.1.064
- From 5.0.0482 to 5.0.0482
- From 5.0.0482 to 5.1.064
- From 5.1.064 to 5.1.064

Notes

- You must sign out and exit Windows Messenger before migration.
- The sounds option is related to the system sounds and can be selected in the system settings if required to migrate.
- To migrate the contact list files, you must create a filter for *.ctt files.
- The settings stored at the server are not migrated through the scripts. The server stores the latest changes done to the settings and will be available whenever client connects to the server.
- The following plug-ins are supported:

- All Your Base
- Emotitext
- Matrix Sounds
- Monty Python Sounds
- Now playing music by DJMystic
- QT sender
- Random Quote
- XFade
- Slapper

Limitations

Following are the limitations:

- You cannot migrate the SIP user settings.
- The user name, password, and other logon information cannot be migrated.
- The plug-ins that meet the pre-requisites will be available on the destination. If there are any errors related to the plug-ins, the user is asked to install the plug-in again.
- Cannot migrate the checking and un-checking of the AddIn, if installed, for the version 4.6.

WinFax Pro

Application Script

Winfax Pro

- Toolbars
- Backup and Restore settings
- Phonebooks
- Backup scheduling
- Call Logging
- Call status
- Notes

Migration Paths

- From 9 to 9

Winzip

Application Script

Winzip allows users to create, modify the .ZIP files, or extract content from the .ZIP files.

Release Date

08/03/2007

Settings Description

The Winzip script migrates the following:

- The Configuration option migrates all the configuration settings of Winzip.
- The File Associations option migrates all the file association settings of Winzip.

Migration Path

- From 6.0 to 6.0
- From 6.0 to 7.0
- From 6.0 to 8.0
- From 7.0 to 7.0
- From 7.0 to 8.0
- From 8.0 to 8.0
- From 8.0 to 10.0
- From 8.0 to 11.1
- From 9.0 to 9.0
- From 9.0 to 10.0
- From 9.0 to 11.1
- From 10.0 to 10.0
- From 10.0 to 11.1
- From 11.1 to 11.1
- From 11.1 to 12.0
- From 12.0 to 12.0
- From 12.0 to 12.1
- From 12.1 to 12.1
- From 12.1 to 14.0
- From 14.0 to 14.0

- From 14.0 to 14.5
- From 14.5 to 14.5
- From 14.5 to 15.0
- From 15.0 to 15.0
- From 15.0 to 15.5
- From 15.5 to 15.5

Notes

- Close all instances of Winzip before migrating.
- To migrate favorite .zip files added to the Favorite folders, either select the files in File Tree or create a filter for the *.zip files.

Limitations

Following are the limitations:

- Options that do not migrate in WinZip:
 - Options, Configuration, System, General, Include Winzip to the start menu
 - Options, Configuration, System, General, Include Winzip to the desktop

WS_FTP Professional

Application Script

WS_FTP is a file transfer protocol client software for the Windows operating systems. WS_FTP stands for WinSock File Transfer Protocol.

Release Date

04/03/1999

Settings Description

This script migrates all the settings for WS_FTP Professional.

Migration Path

- From 6.01 to 6.01

Yahoo! Messenger

Application Script

Yahoo! Messenger is an instant messaging client.

Release Date

10/16/2007

Settings Description

This script migrates all the settings of Yahoo Messenger.

Migration Paths

- From 6.0.0.1750 to 6.0.0.1750
- From 6.0.0.1750 to 7.0
- From 6.0.0.1750 to 7.5
- From 6.0.0.1750 to 8.1
- From 7.0 to 7.0
- From 7.0 to 7.5
- From 7.0 to 8.1
- From 7.5 to 7.5
- From 7.5 to 8.1
- From 8.1 to 8.1

Notes

- The settings stored on the server are not migrated through the scripts. The server stores the latest changes done to the settings and will be available whenever client connects to the server.
- You must sign out and exit Yahoo Messenger before migration on the source and the destination.
- You are recommended to restart the computer after migration.
- Scripts do not support the migration of hardware settings related to webcam. If required, this must be done under the path Start, Settings, Control Panel or under the path Yahoo Messenger, Preferences, Webcam, Camera Settings.
- The scheme of the Yahoo Messenger skin depends on the scheme of the operating system. Thus, to get the same look and feel as in the source, migrate the schemes settings under the path System Settings, Desktop Settings, Appearance.

- The settings under the path Help, Audio Setup Wizard are related to the system sounds. Use the System Settings, Sounds to migrate these settings.

Limitations

Following are the limitations:

- You cannot migrate the Content tabs, from all previous versions to 8.1, as they are now plug-ins whose settings are stored in an XML file.
- You cannot migrate the File Transfer settings, from all previous versions to 8.1, as the feature is not available in the destination version.
- You cannot migrate the List Text settings for the individual profile, from all previous versions to 8.1, as the feature is not available in the version.
