Chapter 1: Welcome

Welcome to the CA Federation Manager Agent for Windows Authentication. The Federation Manager Windows Agent lets users on systems implementing one of the Integrated Windows Authentication (IWA) protocols federate with business partners.

These release notes contain product information, known issues, and information about how to contact CA Technical Support.

Chapter 2: Known Issues

This section contains the following topics:

[HMAC Default Settings for the UI and the Federation Manager Agent for Windows Do Not Match \(138361\)](#) (see page 9)

HMAC Default Settings for the UI and the Federation Manager Agent for Windows Do Not Match (138361)

Symptom:

In the Federation Manager UI, the Enable HMAC for Open-format Cookies setting defaults to No (unchecked). This setting is located in Infrastructure, Deployment Settings, Cookie Settings. When you run the configuration wizard for the Federation Manager Agent for Windows Authentication, the HMAC setting defaults to Yes.

These settings must match.

Solution:

Change the settings so they match.

For the Federation Manager Agent, set the value useHMAC to true (UseHMAC=true). This setting is in the IWACConnectorConfig.conf file, which is in the directory FederationManager\connectors\IWA\config.

Chapter 3: Documentation

This section contains the following topics:

[Federation Manager Bookshelf](#) (see page 11)

Federation Manager Bookshelf

Complete information about SiteMinder is available from the documentation bookshelf. The bookshelf lets you:

- Use a single console to view all documents.
- Use a single alphabetical index to find a topic in any document.
- Search all documents for one or more words.

View the bookshelf from the [CA Technical Support site](#). You do not need to log in to the site to access the bookshelf.

If you plan to download any documentation, we recommend that you download it before beginning the installation process.
