

CA Mainframe Application Tuner

Release Notes
Version 9.0.00

This Documentation, which includes embedded help systems and electronically distributed materials (hereinafter referred to as the "Documentation"), is for your informational purposes only and is subject to change or withdrawal by CA at any time.

This Documentation may not be copied, transferred, reproduced, disclosed, modified or duplicated, in whole or in part, without the prior written consent of CA. This Documentation is confidential and proprietary information of CA and may not be disclosed by you or used for any purpose other than as may be permitted in (i) a separate agreement between you and CA governing your use of the CA software to which the Documentation relates; or (ii) a separate confidentiality agreement between you and CA.

Notwithstanding the foregoing, if you are a licensed user of the software product(s) addressed in the Documentation, you may print or otherwise make available a reasonable number of copies of the Documentation for internal use by you and your employees in connection with that software, provided that all CA copyright notices and legends are affixed to each reproduced copy.

The right to print or otherwise make available copies of the Documentation is limited to the period during which the applicable license for such software remains in full force and effect. Should the license terminate for any reason, it is your responsibility to certify in writing to CA that all copies and partial copies of the Documentation have been returned to CA or destroyed.

TO THE EXTENT PERMITTED BY APPLICABLE LAW, CA PROVIDES THIS DOCUMENTATION "AS IS" WITHOUT WARRANTY OF ANY KIND, INCLUDING WITHOUT LIMITATION, ANY IMPLIED WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, OR NONINFRINGEMENT. IN NO EVENT WILL CA BE LIABLE TO YOU OR ANY THIRD PARTY FOR ANY LOSS OR DAMAGE, DIRECT OR INDIRECT, FROM THE USE OF THIS DOCUMENTATION, INCLUDING WITHOUT LIMITATION, LOST PROFITS, LOST INVESTMENT, BUSINESS INTERRUPTION, GOODWILL, OR LOST DATA, EVEN IF CA IS EXPRESSLY ADVISED IN ADVANCE OF THE POSSIBILITY OF SUCH LOSS OR DAMAGE.

The use of any software product referenced in the Documentation is governed by the applicable license agreement and such license agreement is not modified in any way by the terms of this notice.

The manufacturer of this Documentation is CA.

Provided with "Restricted Rights." Use, duplication or disclosure by the United States Government is subject to the restrictions set forth in FAR Sections 12.212, 52.227-14, and 52.227-19(c)(1) - (2) and DFARS Section 252.227-7014(b)(3), as applicable, or their successors.

Copyright © 2012 CA. All rights reserved. All trademarks, trade names, service marks, and logos referenced herein belong to their respective companies.

CA Technologies Product References

This document references the following CA Technologies products:

- CA Mainframe Application Tuner (CA MAT)
- CA Mainframe Software Manager (CA MSM)
- Performance Management Assistant (PMA)

Contact CA Technologies

Contact CA Support

For your convenience, CA Technologies provides one site where you can access the information that you need for your Home Office, Small Business, and Enterprise CA Technologies products. At <http://ca.com/support>, you can access the following resources:

- Online and telephone contact information for technical assistance and customer services
- Information about user communities and forums
- Product and documentation downloads
- CA Support policies and guidelines
- Other helpful resources appropriate for your product

Providing Feedback About Product Documentation

If you have comments or questions about CA Technologies product documentation, you can send a message to techpubs@ca.com.

To provide feedback about CA Technologies product documentation, complete our short customer survey which is available on the CA Support website at <http://ca.com/docs>.

Chapter 1: New Features

This section contains the following topics:

[CA Mainframe Software Manager](#) (see page 7)
[Graphical User Interface](#) (see page 7)

CA Mainframe Software Manager

CA MSM is an application that simplifies and unifies the management of CA Technologies mainframe products on z/OS systems.

CA MSM provides services that make it easier for you to do the following:

- Acquire, install, deploy, and configure products
- Automatically obtain and apply maintenance

These services enable you to easily manage your software based on industry accepted best practices. A web-based interface makes the look and feel of the environment friendly and familiar, enabling you to install and maintain your products faster and with less chance of error.

You can acquire CA MSM from the CA Support website.

Note: For more information, see your product's installation instructions and the CA Mainframe Software Manager online help.

Graphical User Interface

CA Mainframe Application Tuner provides an eclipse based, graphical user interface (GUI) that is provided as a Microsoft Windows application and can also be integrated with similar graphical user interfaces of SymDump and InterTest to form a user interface for fault analysis of systems. The GUI reduces your learning curve and simplifies your training requirements.

Main Window

When you first open the new GUI, you will see the CA Mainframe Application Tuner main window.

This window is composed of several views that provide all the functions you need to use your programs.

A view is a visual component within the main window. It is typically used to navigate a hierarchy of information or display properties for a program listing. Modifications made in a view are generally done with dialogs.

Usually, only one instance of a particular type of view may exist within the main window. Views might appear by themselves or stacked with other views in a tabbed notebook. To activate one of these views, click its tab. Only one view is active at one time. The active view is the one whose tab is highlighted.

You can change the default window layout by opening views, closing views, or docking views in different positions.

View Types

Use the views available on the CA Mainframe Application Tuner main window to navigate through a set of resources such as monitor definitions, monitor runs and analysis data. CA Mainframe Application Tuner provides the following views:

- Monitor Tree
- Monitor History
- Analysis
- Cached Analysis Files
- Error Log
- Progress-

Chapter 2: Enhancements to Existing Features

This section contains the following topics:

- [Improved Migration of Monitor Definitions From Prior Release](#) (see page 9)
- [DB2 Enhancements](#) (see page 9)
- [DB2 Parameters Enhancements](#) (see page 10)
- [Support for z/OS 1.13](#) (see page 12)
- [WebSphere Release 8 Support](#) (see page 13)
- [Support for IMS Transaction History Import from Sysview](#) (see page 13)
- [Support for WebSphere for MQ](#) (see page 14)
- [Improved IMS DBCTL Support](#) (see page 14)
- [Technical Currency](#) (see page 14)

Improved Migration of Monitor Definitions From Prior Release

Use of the IDCAMS REPRO command is no longer supported when migrating monitor definitions from a prior release of CA Mainframe Application Tuner. Using this method can cause irreparable harm to Global and User Information Files because product-specific record formats can change from release to release.

The migration of monitor definitions from a prior release of CA Mainframe Application Tuner has been improved by replacing the IDCAMS REPRO command with product specific routines.

For Global Monitor Definitions (those contained in the Global Information File), a new option has been added to the Customization procedure (TRCUST). This option provides the installer with a single JCL stream that can both allocate a new Global Information File and copy monitor definitions, including history information, from the prior release Global Information File designated by the installer.

For User Monitor Definitions, (those contained in a User Information File) the REPRO command is also removed and replaced with product specific routines.

DB2 Enhancements

Support for DB2 has been enhanced by consolidating the routines and methods used to convert data encoded in the UTF-8 format. CA Mainframe Application Tuner now exploits IBM Unicode Services and converts UTF-8 encoded data at a single point within the product.

The CA Mainframe Application Tuner DB2 Harvester has also been enhanced to reduce overhead in its SQL data collection algorithms and provide for improved summarization of SQL records. The improved summarization of SQL, for most DB2 monitors, reduces the size of monitor files, reduces the overhead associated with analyzing a DB2 monitor file, and reduces TUNBATCH runtimes and overhead.

These summarization enhancements do not have any impact on DB2 monitors created with prior releases of CA Mainframe Application Tuner. In addition, a significant number of DB2 parameters have also been removed as a result of these enhancements. These parameters are documented in the [DB2 Parameters Enhancements](#) (see page 10) section.

DB2 Parameters Enhancements

The management of DB2 Global Parameters has been greatly simplified in the current release due to the following enhancements. These changes allowed the removal of a number of parameters from TUNSSP00.

Following are the list of enhancements, the parameters that were deleted due to the change, and the new behavior in the current release:

- Enhanced Monitor Definition options allow users to specify whether to collect DB2 EXPLAIN data or use the DB2 catalog to obtain SQL text. As these options can now be specified on individual monitor requests, they have been removed from the TUNSSP00 global parameters. For more information, see the chapters "Monitor Criteria for DB2" and "DB2 Monitor Profile Options" in the *CA MAT User Guide*.

Following parameters are obsolete and have been removed from TUNSSP00 :

DB2EXPL

Collects EXPLAIN Data for Sampled SQL.

DB2HEXPL

Collects EXPLAIN Data for Harvested SQL.

New Behavior:

In the current release, DB2 EXPLAIN data may not be collected unless the user requests it for individual monitors. Also, CA Mainframe Application Tuner does not distinguish between collecting EXPLAIN data for sampled or harvested SQL; if EXPLAIN data is requested then it is collected for both sampled and harvested SQL.

DB2CTSQL

Obtains SQL text from the DB2 Catalog.

New Behavior:

In the current release, SQL statement text will be collected from internal DB2 control blocks. However, if a user must specify that request on a monitor definition to collect the data from the DB2 SQL catalog.

- Enhanced DB2 data collection significantly reduces overhead during the collection and processing of SQL statement text when monitoring a DB2 address space.

As a result, the following global parameters are now obsolete and have been removed from TUNSSP00:

DB2SPSQL

Collects SQL statement text during sampling.

DB2SPDYN

Collects dynamic SQL text during sampling if DB2SPSQL=NO.

New Behavior:

In the current release, the DB2 SQL statement text always get collected, whether for static or dynamic SQL, if seen during sampling.

DB2HVSQ

Collects harvested SQL data.

DB2HVDYN

Collects dynamic SQL data if DB2HVSQ=NO

New Behavior:

In the current release, if the DB2 Harvester is enabled (DB2HRVST=YES) then the Harvester collects DB2 SQL statement text for both static and dynamic SQL.

DB2HVSUM

Specifies the data rows for internal summarization table.

New Behavior:

Improved DB2 data collection has made this table obsolete in the current release.

- Configuration of DB2 data collection is now simplified. CA Mainframe Application Tuner uses its own internal default values to determine whether to terminate DB2 data collection when ABENDs occur. As a result, the following global parameters have been removed from TUNSSP00:

DB2HVMXA

Specifies the maximum number of Harvester abends to allow before terminating DB2 data collection.

DB2HVMXM

Specifies the maximum number of abend messages to be displayed in the JES server log.

New Behavior:

The Harvester now allows up to 1000 abends before terminating DB2 data collection. It can also limit the number of abend messages displayed in the JES server log to 100.

- SQL text translation has been enhanced and the DB2TCSID parameter no longer needs to be specified in TUNSSP00:

DB2TCSID

Specifies the UNICODE translation code page.

New Behavior:

In the current release, an IBM service is used to perform the translation.

Support for z/OS 1.13

CA Technologies has verified that CA Mainframe Application Tuner fully supports this release of z/OS.

WebSphere Release 8 Support

CA Mainframe Application Tuner provides support to the most current release of the IBM Websphere Application Server.

For Java applications executing under IBM WebSphere configured on z/OS, CA Mainframe Application Tuner makes the critical connection between the z/OS-based system services visible to standard monitors and the Java application where meaningful performance analysis may occur.

CA Mainframe Application Tuner performs the following:

- Identifies individual transactions entering the IBM WebSphere Application Server.
- Reports individual Java class and method names and specific Java program statements responsible for generating the heaviest amounts of execution and database processing.
- Provides important statistics on IBM WebSphere memory utilization and performance.

Support for IMS Transaction History Import from Sysview

CA Mainframe Application Tuner now supports the import of IMS transaction history from Sysview.

Support for WebSphere for MQ

CA Mainframe Application Tuner now provides additional data on the Queue Activity and the Queue Information panels. The Queue Activity panel now shows the following data:

Number of Requests

Specifies the number of times the Queue is accessed by the MQ Command during this monitor run.

Min Msg Length

Specifies the length of the shortest message processed by the Queue during this monitor run.

Max Msg Length

Specifies the length of the longest message processed by the Queue during this monitor run.

Avg Msg Length

Specifies the average length of all messages processed by the Queue during this monitor run.

The new data on the Queue Information panel is the same as on the Queue Activity panel excluding the Number of Requests column.

Improved IMS DBCTL Support

Prior to this release, CA Mainframe Application Tuner reported IMS activity in a CICS address space only when a CICS TS 3.2 address space was attached to an IMS V11.1 database manager. Version 9.0.00 extends this support to all supported versions of CICS and IMS.

Technical Currency

This section describes the technical currency enhancements.

CA Datacom Currency

CA Mainframe Application Tuner version 9.0 supports all supported releases of CA Datacom through release 14.

CA IDEAL Currency

CA Mainframe Application Tuner version 9.0 supports all supported releases of CA Ideal for CA Datacom through release 14.

CA IDMS Currency

CA Mainframe Application Tuner version 9.0 supports both CA IDMS release 17 and CA IDMS Version 18.0.00.

IMS Currency

CA Mainframe Application Tuner version 9.0 supports all supported releases of IMS through release 12.1

Natural Currency

CA Mainframe Application Tuner version 9.0 supports all supported releases of Natural through release 8.2.

WebSphere MQ Currency

CA Mainframe Application Tuner fully supports the new release of WebSphere MQ V7.1.0 and CA Technologies has added release support verification to this feature.

Appendix A: Known Issues

Published Fixes for Version 9.0.00

All published fixes are available at Published Solutions on CA Support.

Appendix B: Third-party Acknowledgements

CA Mainframe Application Tuner includes software developed by third-party software providers. This appendix provides information regarding these third-party software providers.

This section contains the following topics:

[Eclipse](#) (see page 19)

[Eclipse Plug-Ins](#) (see page 19)

Eclipse

This product contains Eclipse Rich Client Platform 3.6.2 (the Eclipse Product). Use of the Eclipse Product is in accordance with the Eclipse Public License 1.0. The source code for Eclipse Product may be found at <http://www.eclipse.org/downloads/> or <http://opensrcd.ca.com>.

Eclipse Plug-Ins

This section contains the following topics:

- [EPL Plug-ins](#) (see page 19)
- [CPL Plug-ins](#) (see page 19)
- [Apache Plug-ins](#) (see page 20)

EPL Plug-Ins

This product contains certain plug-ins, which are provided in accordance with the Eclipse Public License 1.0 (EPL Plug-ins). The source code for the EPL Plug-ins may be found at <http://www.eclipse.org/downloads/> or at <http://opensrcd.ca.com>.

CPL Plug-Ins

This product contains certain plug-ins, which are provided in accordance with the Common Public License 1.0 (CPL Plug-ins). The source code for the CPL Plug-ins may be found at <http://www.eclipse.org/downloads/> or at <http://opensrcd.ca.com>.

Apache Plug-Ins

Portions of this product include software developed by the Apache Software Foundation. The Apache software is distributed in accordance with the following license agreement:

Apache License
Version 2.0, January 2004
<http://www.apache.org/licenses/>

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions

to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

(a) You must give any other recipients of the Work or Derivative Works a copy of this License; and

(b) You must cause any modified files to carry prominent notices stating that You changed the files; and

(c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and

(d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, **WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND**, either express or implied, including, without limitation, any warranties or conditions

of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.
