Chapter 1: Welcome to Release 10.2

CA Multi-Port Monitor is a powerful appliance that captures session-level packet data from a monitored data center. The appliance captures data for reporting in CA Application Delivery Analysis and CA Application Performance Management (APM).

- Data from TCP packet headers help CA Application Delivery Analysis monitor end-to-end performance to measure application response time.
- Data from full HTTP packets help CA APM map transactions in your environment to monitor the end-user experience and measure Service Level Agreements.

By passively monitoring large volumes of traffic from multiple ports, Multi-Port Monitor helps keep a continuous record of end-to-end system performance.

These *Release Notes* provide information about the enhancements and known issues in release 10.2. This information supplements and supersedes information listed in the product documentation.

New in this Release

Multi-Port Monitor release 10.2 provides the following features and enhancements:

MySQL® 5.6

- MTP version 10.2 includes an upgrade to the MySQL database. Upgrading MTP to version 10.2 will upgrade an existing MySQL installation from version 5.1 to version 5.6. Historical data is preserved during the upgrade process. MySQL 5.6 delivers improved performance and security.

Vertica® 7.0.2-1

- MTP version 10.2 includes an upgrade to the Vertica database. Historical data is preserved during the upgrade process.

Wiki Conversion

- Beginning with this release, both the standard CA Bookshelf and the new CA Wiki are provided in parallel. Context sensitive help links in this product release continue to point to the CA Bookshelf.
- To directly access the CA Wiki for Multi-Port Monitor, login to <http://wiki.ca.com> using the same credentials you use for login to <http://support.ca.com>, and select the Multi-Port Monitor product from the product drop down list.

There are several advantages to converting to the Wiki:

- The Wiki contains the complete documentation for the Multi-Port Monitor product in an easily searchable, printable, and browser accessible format.
- Product documentation via the Wiki will be available online 24 hours a day.
- Updates to product documentation can occur, as needed, prior to the next scheduled release.
- You can leave comments in the Wiki, which will be monitored daily.

The CA Wiki will completely replace the CA Bookshelf in a future release.

Supported Products

Multi-Port Monitor version 10.2 supports the following applications:

- CA Application Delivery Analysis version 10.0, 10.1, and 10.2.
- CA APM Transaction Impact Manager version 9.1, 9.5, 9.6, and 9.7.
- The Multi-Port Monitor was designed for display in Microsoft Internet Explorer version 8 or 9 and Mozilla Firefox, and requires Adobe Flash Player.

Internet Explorer versions 6 and 7 are not supported.

To use Internet Explorer version 11 with the Multi-Port Monitor, set Internet Explorer version 11 to Compatibility View for the Multi-Port Monitor address. For help with setting Compatibility View in Internet Explorer 11, see [Missing the Compatibility View Button](#)

<https://msdn.microsoft.com/en-us/library/dn321449.aspx> at the Microsoft® Developer Network web site.

Upgrade Considerations

When planning your Multi-Port Monitor upgrade with CA Application Delivery Analysis, upgrade the Multi-Port Monitor appliances *before* you upgrade CA Application Delivery Analysis. The Multi-Port Monitor is compatible with CA ADA version 10.0 and above.

CA ADA version 10.2 is **not** compatible with Multi-Port Monitor version 9.2 and below. If you upgrade the CA ADA Manager to version 10.2, you will be required to upgrade the Multi-Port Monitor to version 10.2 to resume data collection.

The upgrade process includes upgrading:

- The MySQL database to version 5.6
- The Vertica database to version 7.0.2-1

Important! The only supported upgrade path to MTP version 10.2 is from MTP version 10.1. If you are on an earlier release of MTP, you must first upgrade to MTP version 10.1, and then upgrade from version 10.1 to MTP version 10.2. If you are upgrading from a release prior to 10.1, refer to the documentation for version 10.1 for specific information about how to perform your upgrade.

Important! The Multi-Port Monitor does not monitor traffic during the upgrade of the operating system and the Multi-Port Monitor software.

After the software upgrade completes:

- Data monitoring resumes. We recommend performing the upgrade in a maintenance window where the load on the Multi-Port Monitor is lower or ideally, normal operations are shut down.
- Existing data is migrated to the new Vertica 7 database version. On a Multi-Port Monitor with a typical processing load, data migration should complete in no more than 8-16 hours. With a heavy processing load, data migration should complete within 24 hours.

See the *Upgrade Guide* for complete information about upgrading Multi-Port Monitor to version 10.2.

Chapter 2: Known Issues

This section describes known issues and suggests workarounds.

10.2 Upgrade Disables Ports

After upgrading the Multi-Port Monitor appliance to version 10.2, all ports are disabled, including ports that were enabled prior to the upgrade.

To resolve this issue, re-enable the required ports after the upgrade is complete on the Administration tab in the Multi-Port Monitor web interface. After you have manually re-enabled the ports, restart the nqcapd process on the Multi-Port Monitor appliance so the changes will take effect.

Permission Set Limitation

When bound to CA Performance Center, the CA Application Delivery Analysis management console enforces permission sets, however, the Multi-Port Monitor does not. For example, if a user has permission to a particular group of servers, and the Multi-Port Monitor can monitor at least one of the servers in the group:

- In CA Performance Center, access is limited to the servers in the permission set.
- In CA Application Delivery Analysis data source, access is limited to the servers in the permission set.
- In Multi-Port Monitor, the Analysis tab displays performance data for all servers in the domain.

If necessary, restrict CA Application Delivery Analysis data source access to avoid giving a user access to data in the Multi-Port Monitor that is outside their permission set.

Note: Restricting the Drill into Data Sources role right does not prevent a user from directly accessing the CA Application Delivery Analysis management console and Multi-Port Monitor.

Export to PDF fails when another browser window or tab is open

The issue occurs in the following situations:

- You simultaneously access the Multi-Port Monitor web interface from two different browser instances on the same computer.
- You simultaneously access the web interface from two separate tabs within the same instance.
- You drill down from CA Application Delivery Analysis when another browser instance is already logged in to the web interface.
- You initiate Session Analysis from multiple CA Application Delivery Analysis reporting contexts.

The main symptoms are:

- User actions, such as filter selection, performed in one window or tab affect the behavior of the other tab.
- The exported PDF shows a view that was selected in another window or tab.

We have seen these problems with Internet Explorer 8 and Mozilla Firefox 3.0. Both browsers assign the same session to both windows and tabs. **Workaround:** Do not perform Export to PDF in multiple browser instances or from multiple browser tabs on the same computer at the same time. (Defect 22432)

Chapter 3: Product Scalability and Performance

Performance and scalability are largely dependent on several factors:

- The amount of data that is mirrored to each passively mirrored port.
- The number of sessions that data traffic represents.
- The number of WAN optimization devices or NI GigaStor monitor feeds assigned to Multi-Port Monitor.
- The presence of TIM on the Multi-Port Monitor appliance. For information about managing the performance of TIM running on the appliance, see the *CA APM Sizing and Performance Guide*, available on the CA Application Performance Management [bookshelf](#).

The volume of traffic that is captured depends on the rate at which the RAID controller writes data to the hard disk drives. Packet slicing improves this rate. The default Multi-Port Monitor hardware filter slices packets so that only packet headers are captured. The resulting smaller files reduce disk contention.

In general, Multi-Port Monitor supports write-to-disk rates ranging from 300 to 400 MBytes per second across all active logical ports. The 2x10 GB configuration tends to achieve the higher end of the range because it writes fewer but larger files. The 8x1 GB configuration writes multiple, smaller files, creating opportunities for more disk contention.

Scalability Guidelines

For the 8x1 Gbps (Gigabits per second) configuration, the metric engine performs well with the following parameters:

- All 8 ports active, receiving at 70 percent of total capacity, or approximately 5.6 Gbps.
- 2.5 million active sessions.

The 4x1 Gbps configuration has the same processing power at the 8x1 configuration, but with fewer ports. Therefore, the metric engine performs well with the following parameters:

- All four ports receiving a data rate of approximately 4 Gbps.
- 2.5 million active sessions.

For the 2x10 Gbps configuration, the metric engine performs well with the following parameters:

- Both ports receiving a data rate of approximately 2.5 Gbps (for a total of 5 Gbps).
- Four million active sessions (2 million per port).

Throughput can be increased slightly by decreasing the number of simultaneous sessions. On the 2x10 Gbps configuration, the metric engine performs well with the following parameters:

- Both ports receiving a data rate of approximately 3.2 Gbps, for a total of 6.4 Gbps.
- Two million active sessions, one million per port.

Individual results vary based on throughput, file sizes, the number of active ports, and the number of sessions.

Note: Response times for Multi-Port Monitor analysis queries increase as the hourly throughput increases. Query times begin to degrade as the number of entries in the metric database approaches 7 billion.

Considerations for CA Application Delivery Analysis

The write rate and other hardware constraints are important aspects of traffic scalability. Another factor to consider is the capacity of CA Application Delivery Analysis to process TCP packets into five-minute summary files. This processing capability is further constrained when a WAN optimization device or NI GigaStor is assigned to Multi-Port Monitor.

To avoid overloading the management NIC, do not assign WAN optimization feeds to a Multi-Port Monitor that receives packet digests from NI GigaStor. This configuration is supported, but performance is dependent on traffic volume. One Multi-Port Monitor can process packet digest files from all three segments ([Client], [WAN], and [Server]) for up to 50,000 optimized connections. If possible, do not assign more than one WAN optimization device to the same Multi-Port Monitor, and load-balance the branch devices.

A CA Application Delivery Analysis management console can support other collection devices, including single-port monitors and WAN optimization devices. The processing load that is created by registering Multi-Port Monitor with CA Application Delivery Analysis is expressed as a collection unit. For example, a CA Application Delivery Analysis single-port monitor consumes one collection unit, and a 64-bit CA Application Delivery Analysis management console supports up to 15 collection units.

One Multi-Port Monitor is the equivalent of five collection units.

for the JAVA SE DEVELOPMENT KIT (JDK), VERSION 6

SUN MICROSYSTEMS, INC. ("SUN") IS WILLING TO LICENSE

THE SOFTWARE IDENTIFIED BELOW TO YOU ONLY UPON THE

CONDITION THAT YOU ACCEPT ALL OF THE TERMS CONTAINED

IN THIS BINARY CODE LICENSE AGREEMENT AND SUPPLEMENTAL

LICENSE TERMS (COLLECTIVELY "AGREEMENT"). PLEASE READ

THE AGREEMENT CAREFULLY. BY DOWNLOADING OR INSTALLING

THIS SOFTWARE, YOU ACCEPT THE TERMS OF THE AGREEMENT.

INDICATE ACCEPTANCE BY SELECTING THE "ACCEPT" BUTTON

AT THE BOTTOM OF THE AGREEMENT. IF YOU ARE NOT WILLING

TO BE BOUND BY ALL THE TERMS, SELECT THE "DECLINE"

BUTTON AT THE BOTTOM OF THE AGREEMENT AND THE DOWNLOAD

1. DEFINITIONS. "Software" means the identified above

in binary form, any other machine readable materials

(including, but not limited to, libraries, source

files, header files, and data files), any updates or

error corrections provided by Sun, and any user

manuals, programming guides and other documentation provided to you by Sun under this Agreement.

"Programs" mean Java applets and applications intended to run on the Java Platform, Standard Edition (Java SE) on Java-enabled general purpose desktop computers and servers.

2. LICENSE TO USE. Subject to the terms and conditions of this Agreement, including, but not limited to the Java Technology Restrictions of the Supplemental License Terms, Sun grants you a non-exclusive, non-transferable, limited license without license fees to reproduce and use internally Software complete and unmodified for the sole purpose of running Programs. Additional licenses for developers and/or publishers are granted in the Supplemental License Terms.

3. RESTRICTIONS. Software is confidential and copyrighted. Title to Software and all associated intellectual property rights is retained by Sun and/or its licensors. Unless enforcement is prohibited by applicable law, you may not modify, decompile, or reverse engineer Software. You acknowledge that Licensed Software is not designed or intended for use in the design, construction, operation or maintenance of any nuclear facility. Sun Microsystems, Inc. disclaims any express or implied warranty of fitness

for such uses. No right, title or interest in or to any trademark, service mark, logo or trade name of Sun or its licensors is granted under this Agreement.

Additional restrictions for developers and/or publishers licenses are set forth in the Supplemental License Terms.

4. LIMITED WARRANTY. Sun warrants to you that for a period of ninety (90) days from the date of purchase, as evidenced by a copy of the receipt, the media on which Software is furnished (if any) will be free of defects in materials and workmanship under normal use. Except for the foregoing, Software is provided "AS IS". Your exclusive remedy and Sun's entire liability under this limited warranty will be at Sun's option to replace Software media or refund the fee paid for Software. Any implied warranties on the Software are limited to 90 days. Some states do not allow limitations on duration of an implied warranty, so the above may not apply to you. This limited warranty gives you specific legal rights. You may have others, which vary from state to state.

5. DISCLAIMER OF WARRANTY. UNLESS SPECIFIED IN THIS AGREEMENT, ALL EXPRESS OR IMPLIED CONDITIONS, REPRESENTATIONS AND WARRANTIES, INCLUDING ANY IMPLIED WARRANTY OF MERCHANTABILITY, FITNESS FOR A PARTICULAR

PURPOSE OR NON-INFRINGEMENT ARE DISCLAIMED, EXCEPT TO THE EXTENT THAT THESE DISCLAIMERS ARE HELD TO BE LEGALLY INVALID.

6. LIMITATION OF LIABILITY. TO THE EXTENT NOT PROHIBITED BY LAW, IN NO EVENT WILL SUN OR ITS LICENSORS BE LIABLE FOR ANY LOST REVENUE, PROFIT OR DATA, OR FOR SPECIAL, INDIRECT, CONSEQUENTIAL, INCIDENTAL OR PUNITIVE DAMAGES, HOWEVER CAUSED REGARDLESS OF THE THEORY OF LIABILITY, ARISING OUT OF OR RELATED TO THE USE OF OR INABILITY TO USE SOFTWARE, EVEN IF SUN HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES. In no event will Sun's liability to you, whether in contract, tort (including negligence), or otherwise, exceed the amount paid by you for Software under this Agreement. The foregoing limitations will apply even if the above stated warranty fails of its essential purpose. Some states do not allow the exclusion of incidental or consequential damages, so some of the terms above may not be applicable to you.

7. TERMINATION. This Agreement is effective until terminated. You may terminate this Agreement at any time by destroying all copies of Software. This Agreement will terminate immediately without notice from Sun if you fail to comply with any provision of this Agreement. Either party may terminate this

Agreement immediately should any Software become, or in either party's opinion be likely to become, the subject of a claim of infringement of any intellectual property right. Upon Termination, you must destroy all copies of Software.

You agree to comply strictly with all such laws and regulations and acknowledge that you have the responsibility to obtain such licenses to export, re-export, or import as may be required after delivery to you.

11. GOVERNING LAW. Any action related to this Agreement will be governed by California law and controlling U.S. federal law. No choice of law rules of any jurisdiction will apply.

12. SEVERABILITY. If any provision of this Agreement is held to be unenforceable, this Agreement will remain in effect with the provision omitted, unless omission would frustrate the intent of the parties, in which case this Agreement will immediately terminate.

13. INTEGRATION. This Agreement is the entire agreement between you and Sun relating to its subject matter. It supersedes all prior or contemporaneous oral or written communications, proposals, representations and warranties and prevails over any conflicting or additional terms of any quote, order, acknowledgment, or other communication between the parties relating to its subject matter during the term of this Agreement.

No modification of this Agreement will be binding, unless in writing and signed by an authorized representative of each party.
