CA Technologies Product References

This document references the following CA Technologies products:

- CA Automation Suite for Data Centers (formerly named CA Spectrum® Automation Manager)
- CA ControlMinder™ (formerly named CA eTrust® Access Control)
- CA Embedded Entitlements Manager (CA EEM)
- CA IT Client Manager
- CA Job Management Option
- CA Jobtrac™ Job Management (CA Jobtrac)
- CA Network and Systems Management (CA NSM)
- CA Process Automation
- CA Scheduler® Job Management (CA Scheduler)
- CA Service Desk
- CA Systems Performance for Infrastructure Managers (formerly named CA SystemEDGE)
- CA Universal Job Management Agent (CA UJMA)
- CA Workload Automation AE (formerly named Unicenter® AutoSys® Job Management (Unicenter AutoSys JM))
- CA Workload Automation AE Connect Option
- CA Workload Automation Agent for Application Services (CA WA Agent for Application Services)
- CA Workload Automation Agent for Databases (CA WA Agent for Databases)
- CA Workload Automation Agent for i5/OS (CA WA Agent for i5/OS)
- CA Workload Automation Agent for Linux (CA WA Agent for Linux)
- CA Workload Automation Agent for Micro Focus (CA WA Agent for Micro Focus)
- CA Workload Automation Agent for Oracle E-Business Suite (CA WA Agent for Oracle E-Business Suite)
- CA Workload Automation Agent for PeopleSoft (CA WA Agent for PeopleSoft)
- CA Workload Automation Agent for Remote Execution (CA WA Agent for Remote Execution)
- CA Workload Automation Agent for SAP (CA WA Agent for SAP)
- CA Workload Automation Agent for UNIX (CA WA Agent for UNIX)
- CA Workload Automation Agent for Web Services (CA WA Agent for Web Services)
Contact CA Technologies

Contact CA Support

For your convenience, CA Technologies provides one site where you can access the information that you need for your Home Office, Small Business, and Enterprise CA Technologies products. At http://ca.com/support, you can access the following resources:

- Online and telephone contact information for technical assistance and customer services
- Information about user communities and forums
- Product and documentation downloads
- CA Support policies and guidelines
- Other helpful resources appropriate for your product

Providing Feedback About Product Documentation

If you have comments or questions about CA Technologies product documentation, you can send a message to techpubs@ca.com.

To provide feedback about CA Technologies product documentation, complete our short customer survey which is available on the CA Support website at http://ca.com/docs.

**Chapter 2: Information Messages** ........................................... 9

**Chapter 3: Warning Messages** ........................................... 147

**Chapter 4: Error Messages** ........................................... 243
Chapter 1: Introduction

CA Workload Automation AE Messages

This guide explains the messages that you see while working with CA Workload Automation AE. Each message is explained giving the exact message string, the reason, and the suggested solution.

You see the following three types of messages while working with CA Workload Automation AE:

- Information messages that display information and call for no action.
- Warning messages that warn you of a potential error and may require you to take some action.
- Error messages that tell you what went wrong and what you need to do to resolve it.

Note: If CA Workload Automation AE cannot locate the catalog files containing the messages, it issues a non-cataloged, generic error.

The following sections explain the three types of cataloged messages and the non-cataloged, generic error.
Generic Error: Resource Bundle Is Not Available

Resource bundle is not available while looking for key="catalog_value"

Reason:

All messages are compiled into the CA Workload Automation AE message catalog files. The message catalog files are located in the $AUTOSYS/messages (on UNIX) or %AUTOSYS%\messages (on Windows) directory. If you run the CA Workload Automation AE product or SDK application without sourcing the environment with the required variables, CA Workload Automation AE cannot locate the message catalog files.

The "Resource bundle is not available" message is a generic error that can occur for the following reasons:

- You have not set the AUTOSYS environment variable before running CA Workload Automation AE.
- The message catalog files are missing from the $AUTOSYS/messages (on UNIX) or %AUTOSYS%\messages (on Windows) directory. Missing catalog files indicate an issue with the installation.
- You applied new patched binaries containing new cataloged messages, but you have not patched the message catalog files. Therefore, the new cataloged messages are not in the catalog files.

Action:

Perform the appropriate action:

- Set the AUTOSYS environment variable using the shell script (on UNIX) or by executing commands from the instance command prompt (on Windows).
- Reinstall the product or SDK runtime environment.
- Patch the message catalog files in addition to the binaries.
Chapter 2: Information Messages

You may encounter the following information messages while working with CA Workload Automation AE. Information messages display information and usually do not require you to take any action.

**CAUJM_I_00004**

New listener started on port \( \{0, \text{number,1}\} \). Proceeding...

Reason:
New listener started on the specified port. Proceeding...

Action:
Required action unknown.

**CAUJM_I_00117**

Service Desk request pending  JOB: \{0\}

Reason:
The product is currently in the process of creating a Service Desk request.

Action:
No action is required.

**CAUJM_I_00119**

Service Desk request successful  REQUEST: \{0\}  REQUEST HANDLE: \{1\}  JOB: \{2\}

Reason:
The product has successfully opened the Service Desk request.

Action:
No action is required.
**CAUAJM_I_00120**

Notification Services request pending  JOB: {0}

**Reason:**
The product is currently in the process of sending a Notification Services request.

**Action:**
No action is required.

**CAUAJM_I_00122**

Notification Services request successful  JOB: {0}

**Reason:**
The product has successfully sent the Notification Services request.

**Action:**
No action is required.

**CAUAJM_I_00128**

Notification Services TRACKING ID: {0}  JOB: {1}

**Reason:**
Unicenter Notification Services tracking identifier.

**Action:**
No action is required.

**CAUAJM_I_00140**

High availability system status has returned to normal. Continuing as shadow in high availability mode.

**Reason:**
Informational only.

**Action:**
No action is required.
CA Workload Automation AE Messages

Chapter 2: Information Messages

CAUAJM_I_00145

System is in the failover state due to manual {0} event.

Reason:
Informational only.

Action:
No action required.

CAUAJM_I_00146

The {0} application servers were notified to shut down due to manual {1} event.

Reason:
The application servers were notified to shut down due to manual STOP_DEMON event.

Action:
No action required.

CAUAJM_I_00149

The shadow has been shutdown. The system is no longer in high availability mode.

Reason:
Informational only.

Action:
No action necessary.

CAUAJM_I_00150

The tie-breaker has been shutdown. The system is no longer in high availability mode.

Reason:
Informational only.

Action:
No action necessary.
**CAUAJM_I_00151**

The system is running in high availability mode.

**Reason:**
Informational only.

**Action:**
No action necessary.

**CAUAJM_I_00152**

The primary has been shutdown. The system is no longer in high availability mode.

**Reason:**
Informational only.

**Action:**
No action is required.

**CAUAJM_I_00155**

The {0} primary scheduler has resumed updating its status.

**Reason:**
Informational only.

**Action:**
No action required.

**CAUAJM_I_00156**

System is in the failback state due to manual {0} event.

**Reason:**
Informational only.

**Action:**
No action required.
CAUAJM_I_00157

The \{0\} shadow scheduler has resumed updating its status.

Reason:
Informational only.

Action:
No action is required.

CAUAJM_I_00158

The \{0\} tie-breaker scheduler has resumed updating its status.

Reason:
Informational only.

Action:
No action is required.

CAUAJM_I_00162

Service Desk request pending.

Reason:
The product is currently in the process of creating a Service Desk request.

Action:
No action is required.

CAUAJM_I_00164

Service Desk request successful  REQUEST: \{0\}  REQUEST HANDLE: \{1\}

Reason:
The product has successfully opened the Service Desk request.

Action:
No action is required.
CAUAJM_I_00183

Database indicates remote notification to shut down. The shadow must shut down.

Reason:
Database indicates remote notification to shut down. The shadow must shut down.

Action:
No action required.

CAUAJM_I_00184

Database indicates remote notification to shutdown. The tie-breaker must shutdown.

Reason:
Database indicates remote notification to shutdown. The tie-breaker must shutdown.

Action:
No action required.

CAUAJM_I_00186

Database indicates remote notification to shutdown. The application server must shutdown.

Reason:
Database indicates remote notification to shutdown. The application server must shutdown.

Action:
No action required.

CAUAJM_I_00197

Database indicates remote notification to fail back. The shadow scheduler must restart.

Reason:
Informational only.

Action:
No action is required.
CAUAJM_I_00201

High availability status <Event Server {0}>

Reason:
Informational only.

Action:
No action required.

CAUAJM_I_00202

State

Reason:
Informational only.

Note: A Normal state indicates that the Primary is running and is ready to run jobs. No interruption in service has occurred. A Failed-over state occurs when the Shadow takes over and represents a momentary interruption in services followed by a change in scheduling managers.

Action:
No action required.

CAUAJM_I_00203

Heartbeat({0})

Reason:
Informational only.

Action:
No action required.
CAUAJM_I_00209

High availability system status has returned to failover. Continuing as dormant primary in high availability mode.

Reason:
Informational only.

Action:
No action required.

CAUAJM_I_00210

Database indicates remote notification to shut down. The primary scheduler must shut down.

Reason:
Informational only.

Action:
No action required.

CAUAJM_I_00216

The shadow scheduler has shut down. The primary is taking over.

Reason:
Informational only.

Action:
No action required.

CAUAJM_I_10021

Could not find \{0\} variable, trying \{1\}...

Reason:
Could not find HOMEPATH variable.

Action:
Required action unknown.
CAUAJM_I_10022

Unable to obtain resources for {0} variable!

Reason:
Unable to obtain resources for HOMEPATH variable.

Action:
Required action unknown.

CAUAJM_I_10023

Could not get drive letter for {0} variable!

Reason:
Could not get drive letter for HOMEPATH variable.

Action:
Required action unknown.

CAUAJM_I_10028

Unable to obtain resources for {0} and drive variable!

Reason:
Unable to obtain resources for HOMEPATH and drive variable.

Action:
Required action unknown.

CAUAJM_I_10031

Could not find {0} variable, querying system...

Reason:
Could not find HOME variable, querying system.

Action:
Required action unknown.
CAUJM_I_10040

Rolling over Eoid!

Reason:
Informational only.

Action:
No action is required.

CAUJM_I_10043

(0) rstatd is not supported on this platform. Defaulting to vmstat.

Reason:
Informational only.

Action:
No action is required.

CAUJM_I_10064

The incoming year was not four digits.

Reason:
Informational only.

Action:
No action is required.

CAUJM_I_10065

***Daylight Savings Change. Time moved up to: (0)
CAUAJM_I_10066

Event <{0}> successfully sent to external instance <{1}>

Reason:

Error retrieving network data from the specified socket.

Action:
Required action is not known.

CAUAJM_W_00060

Timed out waiting for incoming data at socket [{0,number,1}] after {1,number,1} seconds. Discarding socket...

Reason:
Timed out waiting for incoming data at the specified socket after the specified number of seconds.

Action:
Required action is not known.
CAUAJM_W_00127

Unable to obtain Notification Services tracking ID  JOB: {1}

Reason:
Unable to obtain Notification Services tracking ID.

Action:
Check extended diagnostic messages for further indication of the problem.

CAUAJM_W_00129

Unable to obtain host name. Notification header will be incomplete.\n
Reason:
Unable to obtain host name. Will not be able to set detailed machine information in Notification Services header.

Action:
No action is required.

CAUAJM_W_00130

No job_runs entry available to store Service Desk handle  REQUEST HANDLE: {0}  JOB: {1}

Reason:
There is no job_runs entry available for this job. A job that has a bad owner/password or bad machine will not generate a job_runs entry.

Action:
No action is required.

CAUAJM_W_00134

The {0} shadow scheduler has failed to update its status. Please investigate.

Reason:
The shadow scheduler has failed to update its status. Please investigate.

Action:
Determine why the shadow did not update its status in the database and restart it if necessary.
CAUAJM_W_00135

The \{0\} tie-breaker scheduler has failed to update its status. Please investigate.

Reason:
The tie-breaker scheduler has failed to update its status. Please investigate.

Action:
Determine why the tie-breaker did not update its status in the database and restart it if necessary.

CAUAJM_W_00136

Database indicates failover status. The shadow is taking over.

Reason:
Database indicates failover status. The shadow is taking over.

Action:
Determine problem that caused failover and restart system.

CAUAJM_W_00137

The primary appears to be missing. Changing high availability system status to pending.

Reason:
The primary appears to be missing. Changing high availability system status to pending.

Action:
Determine why the primary did not update its status in the database and restart it if necessary.

CAUAJM_W_00138

Changing high availability system status to failover.

Reason:
The primary is not updating database.

Action:
Investigate the state of the primary.
**CAUJM_W_00139**

Unable to mark high availability system as failover. Continuing as shadow.

**Reason:**
Unable to mark high availability system as failover. Continuing as shadow.

**Action:**
Attempt to mark database as failover returned a non-failover status.

**CAUJM_W_00141**

Unable to mark high availability system as pending. Continuing as shadow.

**Reason:**
Unable to mark high availability system as pending. Continuing as shadow.

**Action:**
Attempt to mark database as pending returned a non-pending status.

**CAUJM_W_00142**

Successfully changed high availability system status. The shadow is taking over.

**Reason:**
Successfully changed high availability system status. The shadow is taking over.

**Action:**
Determine cause of failover and restart or failback system.

**CAUJM_W_00143**

Database indicates failback status. Restarting in shadow mode.

**Reason:**
Database indicates failback status. Restarting in shadow mode.

**Action:**
Determine problem that caused failback.
CAUAJM_W_00144

The {0} shadow scheduler appears to have failed over prematurely. Consider a higher value for the HAPollInterval setting. Proceeding with shutdown...

Reason:
The shadow scheduler appears to have failed over prematurely. Consider a higher value for the HAPollInterval setting. Proceeding with shutdown...

Action:
After recovery from failover, set a higher value for the HAPollInterval across all schedulers.

CAUAJM_W_00146

Attempt to notify the Application Server on node <{0}> about rollover failed. Attempt number: {1}. Error code: {2}.

Reason:
Informational only.

Action:
No action is required.

CAUAJM_W_00147

The primary and tie-breaker are both missing. Database indicates shadow can fail over. Changing high availability system status to pending.

Reason:
The primary and tie-breaker are both missing. Database indicates shadow can fail over. Changing high availability system status to pending.

Action:
Determine why the primary and tie-breaker did not update their statuses in the database and restart it if necessary.
CA Workload Automation AE Messages

**CAUAJM_W_00153**

The database indicates that a failover to the shadow has occurred. The system is no longer in high availability mode.

**Reason:**
The database indicates that a failover to the shadow has occurred. The system is no longer in high availability mode.

**Action:**
No action necessary.

**CAUAJM_W_00154**

The {0} primary scheduler has failed to update its status. Please investigate.

**Reason:**
The primary scheduler has failed to update its status. Please investigate.

**Action:**
Determine why the primary did not update its status in the database and restart it if necessary.

**CAUAJM_W_00163**

System does not appear to be in high availability mode. Skipping failover and shutting down.

**Reason:**
System does not appear to be in high availability mode. Skipping failover and shutting down.

**Action:**
Wait until the system enters high availability mode before sending the STOP_DEMON with the value specified as FAILOVER.
CAUAJM_W_00167

The primary's status is in question. The system is no longer in high availability mode.

Reason:
The primary's status is in question. The system is no longer in high availability mode.

Action:
Determine the problem with the primary scheduler and restart it if necessary.

CAUAJM_W_00168

The shadow's status is in question. The system is no longer in high availability mode.

Reason:
The shadow's status is in question. The system is no longer in high availability mode.

Attempt to mark database as pending returned a non-pending status.

CAUAJM_W_00215

Database indicates failover status. Restarting primary scheduler in dormant failback mode.

Reason:
Database indicates failover status. Restarting primary scheduler in dormant failback mode.

Action:
Determine problem that caused failover.

CAUAJM_W_00217

System does not appear to be in high availability mode. Skipping failback.

Reason:
System does not appear to be in high availability mode. Skipping failback.

Action:
Wait until the system enters high availability mode before sending the STOP_DEMON with the value specified as FAILOVER.
CAUJM_W_00218

The database indicates that a failback to the primary has occurred. The system is no longer in high availability mode.

Reason:
The database indicates that a failback to the primary has occurred. The system is no longer in high availability mode.

Action:
No action necessary.

CAUJM_W_00220

The shadow's status is in question. The primary is taking over.

Reason:
Informational only.

Action:
No action required.

CAUJM_W_00221

Unable to mark high availability system as pending. Continuing as primary in immediate failback mode.

Reason:
Unable to mark high availability system as pending. Continuing as primary in immediate failback mode.

Action:
Attempt to mark database as pending returned a non-pending status.
**CAUJM_W_00222**

Unable to mark high availability system to failback. Continuing as primary in immediate failback mode.

**Reason:**
Unable to mark high availability system to failback. Continuing as primary in immediate failback mode.

**Action:**
Attempt to mark database in failback mode returned a non-failback status.

**CAUJM_W_00223**

Database indicates failover status. Restarting primary scheduler in immediate failback mode.

**Reason:**
Database indicates failover status. Restarting primary scheduler in immediate failback mode.

**Action:**
Determine problem that caused failover.

**CAUJM_W_10015**

Flushing request queue due to shutdown. Discarding...

Action:
Application Server is shutting down. Unprocessed requests will be discarded.

CAUAJM_W_40006

Application Server configuration list from [0] for instance {1} is in question.

Reason:
Application Server configuration list from given host on given instance is in question.

Action:
Check the Application Server configuration list on the specified machine.
CA Workload Automation AE Messages

Chapter 3: Warning Messages

CAUAJM_W_40023

Unable to aggregate statistics. There is already an active aggregate statistics process in progress. Request ignored.

Reason:
Received a sendevent request to aggregate statistics, but there was already an active aggregate statistics process in progress. There can only be one active aggregate statistics process at a time.

Action:
No action required.

CAUAJM_W_40028

CA Workload Automation AE does not support this trigger type {0} {1}

Reason:
Trigger type is not supported. Request ignored.

Action:
No action is required.

CAUAJM_W_40032

Another KILLJOB/SEND_SIGNAL for job {0} is in progress. Nothing to do.

Reason:
Another KILLJOB/SEND_SIGNAL for the specified job is in progress. Nothing to do.

Action:
Wait for the current KILLJOB/SEND_SIGNAL operation to complete.

CAUAJM_W_40059

{0} criteria has not been satisfied for JOB: {1}.

Reason:
CHK_START/CHK_COMPLETE criteria has not been satisfied for the specified job.

Action:
Check the Scheduler log file for details why the job did not start before its must_start time or complete before its must_complete time.
CAUAJM_W_40115

Pending remaining jobs for machine \(<{0}>\) due to offline machine.

Reason:
Pending remaining jobs for the specified machine due to offline machine.

Action:
No action is required.

CAUAJM_W_40118

Postponing job starts for online machine \(<{0}>\) due to shutdown.

Reason:
Postponing job starts for the specified online machine due to shutdown.

Action:
Scheduler is shutting down. MACH_ONLINE event will be reprocessed on startup.

CAUAJM_W_40135

Skipped starting job \(<{0}>\) due to manual status change while bringing machine \(<{1}>\) online.

Reason:
The job's status was manually changed after it came out of PEND_MACH status. Starting of the job has been skipped.

Action:
No action required.

CAUAJM_W_40176

The current job run has no associated agent information. KILLJOB cancelled.

Reason:
The job in question more than likely was placed in a RUNNING state through executing a manual sendevent.

Action:
If the job was placed in a RUNNING state manually use sendevent -E CHANGE_STATUS to mark the job as INACTIVE. Otherwise contact technical support for further assistance.
CAUAJM_W_40179

Global variable <{0}> is not defined for job <{1}>

Reason:
Global variable is not defined.

Action:
Create a global variable.

CAUAJM_W_40207

An unexpected problem occurred while fetching events. Continuing....

Reason:
etBatchEvent failed.

Action:
Required action unknown.

CAUAJM_W_40253

Machine <{0}> is not responding. Taking offline.

Reason:
The machine is not responding.

Action:
Determine if the Agent is running on the machine or if there is a connectivity problem.

CAUAJM_W_40258

Machine <{0}> has explicitly rejected communications. Taking offline.

Reason:
The specified machine has explicitly rejected communications. Taking offline.

Action:
Check the agent configuration and verify that the scheduler information is configured properly.
CAUAJM_W_40259

External instance <{0}> has explicitly rejected communications. Taking offline.

Reason:
The specified external instance has explicitly rejected communications. Taking offline.

Action:
Check the remote manager configuration and verify that the scheduler information is configured properly.

CAUAJM_W_40272

Machine <{0}> cannot automatically be brought offline because the machine auto offline feature is disabled.

Reason:
The scheduler cannot place the specified machine offline because the machine auto offline feature is disabled.

Action:
Enable the machine auto offline feature by clearing the PE_AUTO_DISABLE environment variable and restarting the scheduler.

CAUAJM_W_40273

Machine <{0}> cannot be automatically brought online because status was manually set offline.

Reason:
Machine cannot be automatically brought online because machine status was manually set offline.

Action:
Issue a MACH_ONLINE event to manually bring the machine online.
CAUAJM_W_40278

Machine <{0}> was manually set offline. Nothing to do.

Reason:
Machine was manually set offline. Nothing to do.

Action:
No action required.

CAUAJM_W_40280

The following events were processing during the last run of the Scheduler and will be re-queued.

Reason:
The following events were processing during the last run of the Scheduler and will be re-queued.

Action:
<No action mentioned>

CAUAJM_W_40281

RE-QUEUEING: {0}

Reason:
Display list of requeued events.

Action:
<No action mentioned>

CAUAJM_W_40282

External instance <{0}> is not responding. Taking offline.

Reason:
The external instance is not responding.

Action:
Determine if the manager is running on the machine or if there is a connectivity problem.
CAUAJM_W_40283

Error from Instance <{0}>: \"{1}\".

Reason:
Error from specified external instance.

Action:
The SEND_EVENT_INTERNAL API returned a failure.

CAUAJM_W_40284

Postponing send of event <{0}> due to offline external instance <{1}>.

Reason:
Postponing send of event due to the specified offline external instance.

Action:
Determine if the manager is running on the machine or if there is a connectivity problem.

CAUAJM_W_40288

Skipping the execution of internal database maintenance because the unauthenticated user mode setting requires user authentication.

Reason:
The scheduler skips the execution of the database maintenance script when the unauthenticated user mode is set to STRICT or EXTERNAL.

Action:
Define a job to execute the script and generate cached credentials for the job owner on the machine where the job runs.

CAUAJM_W_40290

Machine <{0}> is in question. Placing machine in the unqualified state.

Reason:
The specified machine is in question. Placing machine in the unqualified state.

Action:
Determine if the Agent is running on the machine or if there is a connectivity problem.
CAUAJM_W_40291

Machine <{0}> has been updated. Placing machine in the unqualified state.

Reason:
The specified machine has been updated. Placing machine in the unqualified state.

Action:
No action is required.

CAUAJM_W_40299

The primary scheduler is restarting in dormant failback mode as the shadow scheduler has taken over.

Reason:
The primary scheduler is restarting in dormant failback mode as the shadow scheduler has taken over.

Action:
No action required.

CAUAJM_W_40304

Statistical aggregation has been aborted due to a shutdown request. Statistics have been only partially aggregated.

Reason:
Statistical aggregation was aborted due to a shutdown request.

Action:
Statistics will be aggregated on the next automatic aggregation or can be manually aggregated through sendevent once the scheduler has been restarted.

CAUAJM_W_40305

The shadow scheduler is restarting as the primary scheduler has taken over.

Reason:
The shadow scheduler is restarting as the primary scheduler has taken over.

Action:
No action required.
**CAUAJM_W_40306**

Machine "{0}" is still being referenced by resources.

**Reason:**
Machine is referenced in active jobs.

**Action:**
Redefine the machine.
CAUAJM_W_50335

Ignoring invalid input in Workday string "{0}".

Reason:
The Workdays string is not in the correct format.

Action:
Check the value of the input string.

CAUAJM_W_50401

The machine: {0} does not exist.

Reason:
The machine name does not exist in the database.

Action:
No action is required.

CAUAJM_W_50412

No External Instances match masked specification: {0}

Reason:
No external instances match masked specification in CA Workload Automation AE.

Action:
Required action unknown.

CAUAJM_W_50413

*** WARNING - The Holiday calendar: {0} does not exist.

Reason:
Informational only.

Action:
Holiday calendar can be created later.
CAUAJM_W_50414

*** WARNING - The Cycle calendar: {0} does not exist.

Reason:
Informational only.

Action:
Cycle calendar can be created later.

CAUAJM_W_50433

Warnings = {0}

Reason:
Total Warnings.

Action:
Review JIL output for warnings.

CAUAJM_W_50505

The user process is not running on machine: {0}. The Scheduler is inactive.

Reason:
The user process is not running on the specified machine. The Scheduler is not running
thus the status of the job may not be accurately reflected.

Action:
If the user process has truly completed, start the Scheduler and monitor the status of
the job.

CAUAJM_W_50506

The {0} job is not running on machine: {1}, The Scheduler is inactive.

Reason:
The job is not running on the specified machine. The Scheduler is not running.

Action:
Start the Scheduler.
**CAUAJM_W_50507**

The user process is not running on machine: {0}, an attempt to communicate with the Scheduler failed.

Reason:
The user process is not running on the specified machine, an attempt to communicate with the Scheduler failed.

Action:
Check the status of the Scheduler.

**CAUAJM_W_50508**

The {0} job is not running on machine: {1}, an attempt to communicate with the Scheduler failed.

Reason:
The job is not running on the specified machine, an attempt to communicate with the Scheduler failed.

Action:
Check the status of the Scheduler.

**CAUAJM_W_50509**

The user process is not running on machine: {0}, it seems Scheduler is unresponsive.

Reason:
The user process is not running on the specified machine, it seems the Scheduler is unresponsive.

Action:
Check the status of the Scheduler.

**CAUAJM_W_50510**

The {0} job is not running on machine: {1}, it seems Scheduler is unresponsive.

Reason:
The job is not running on the specified machine, it seems the Scheduler is unresponsive.

Action:
Check the status of the Scheduler.
**CAUJM_W_50511**

The user process is not running on machine: {0}, as the Scheduler status is pending high availability failover.

**Reason:**
The user process is not running on the specified machine, as the Scheduler status is pending high availability failover.

**Action:**
Wait for the Scheduler's High Availability status to be resolved.

**CAUJM_W_50512**

The {0} job is not running on machine: {1}, as the Scheduler status is pending high availability failover.

**Reason:**
The job is not running on the specified machine, as the Scheduler status is pending high availability failover.

**Action:**
Wait for the Scheduler's High Availability status to be resolved.

**CAUJM_W_50513**

The user process is not running on machine: {0}. The Scheduler status is unknown.

**Reason:**
The user process is not running on the specified machine, but the Scheduler status is unknown.

**Action:**
Check the status of the database.

**CAUJM_W_50514**

The {0} is not running on machine: {1}. The Scheduler status is unknown.

**Reason:**
The job is not running on the specified machine. The Scheduler status is unknown.

**Action:**
Wait for the Scheduler's High Availability status to be resolved.
CAUAJM_W_50515

The user process is not running on machine: {0}, but the Scheduler has not yet reestablished communications with the Agent.

Reason:
The user process is not running on the specified machine, but the Scheduler has not yet reestablished communications with the Agent.

Action:
Check the status of the database.

CAUAJM_W_50516

The {0} job is not running on machine: {1}, the Scheduler has not yet reestablished communication with the Agent.

Reason:
The job is not running on the specified machine, the Scheduler has not yet reestablished communication with the agent.

Action:
Wait for the Scheduler's High Availability status to be resolved.

CAUAJM_W_60002

Batch_size exceeds {0}, changing batch_size to {1}

Reason:
Specifying a Batch_size more than MAX_UPDATE may impact performance.

Action:
No action is required.

CAUAJM_W_60045

Only an {0} {1} {2} has access to all options!

Reason:
Only an EDIT/EXEC superuser has access to all options!

Action:
Run autosys_secure as an EDIT/EXEC superuser to have access to all options.
CA Workload Automation AE Messages

**CAUAJM_W_60050**

Chapter 4: Error Messages

You may encounter the following error messages while working with CA Workload Automation AE. Error messages tell you that an error has occurred and the action you need to take to resolve the situation.

**CAUAJM_E_00003**

*Could not allocate size{0}. Exiting.*

**Reason:**
Allocation has failed.

**Action:**
Required action is not known.

**CAUAJM_E_00006**

*Error to access api.*

**Reason:**
Error occurred in accessing the API.

**Action:**
Required action is not known.

**CAUAJM_E_00009**

*CDailyLogFile: Unable to create LogFileThread - {0}*

**Reason:**
Unable to create LogFileThread.

**Action:**
Required action is not known.
CAUAJM_E_00010

CDailyLogFile thread canceled...

Reason:
CDailyLogFile thread canceled.

Action:
Required action is not known.

CAUAJM_E_00011

Error reopening stdout: {0}

Reason:
Error occurred in reopening stdout.

Action:
Required action is not known.

CAUAJM_E_00012

Error reopening stderr: {0}

Reason:
Error occurred in reopening stderr.

Action:
Required action is not known.

CAUAJM_E_00013

Cannot remove an empty host from the list!

Reason:
Cannot remove an empty host from the list.

Action:
Required action unknown.
**CAUAJM_E_00015**

Accept returned a socket descriptor value {0,number,1} is greater than the allowable maximum value {1,number,1}. Discarding socket...

**Reason:**
Accept returned a socket descriptor value is greater than the allowable maximum value.

**Action:**
The accept function returned a socket value greater than the configured FD_SETSIZE UNIX parameter.

**CAUAJM_E_00017**

Unable to determine class. Cannot continue.

**Reason:**
JNIEnv::IsInstanceOf() did not return a known class.

**Action:**
Required action unknown.

**CAUAJM_E_00020**

Local error in attempt to send request. RC={0}

**Reason:**
Local error in attempt to send request.

**Action:**
Required action unknown.

**CAUAJM_E_00023**

Unable to copy file <{0}> to <{1}>

**Reason:**
A copy file error has occurred.

**Action:**
Review messages that follow and take action as required.
CAUAJM_E_00025

Unable to read file <{0}>

Reason:
A read file error has occurred.

Action:
Review messages that follow and take action as required.

CAUAJM_E_00029

Unable to create copy of file <{0}>

Reason:
A create copy file error has occurred.

Action:
Review messages that follow and take action as required.

CAUAJM_E_00035

Unable to open file <{0}>

Reason:
An open file error has occurred.

Action:
Review messages that follow and take action as required.

CAUAJM_E_00036

Function failed: <{0}> Errno: <{1,number,1}> Error: <{2}>

Reason:
An error has occurred performing the indicated operation.

Action:
Review the error information and take action as required.
CAUAJM_E_00039

Local error in send {0} request to the server.

Reason:
Local error in send AuthUser request to the server.

Action:
Required action unknown.

CAUAJM_E_00040

Unable to create object: Invalid class.

Reason:
Unable to create object: Invalid class.

Action:
Required action unknown.

CAUAJM_E_00042

Unable to create Response: Invalid class.

Reason:
Unable to create Response: Invalid class.

Action:
Required action unknown.

CAUAJM_E_00047

Unable to create Filter: can not find java classes.

Reason:
Unable to create Filter: cannot find java classes.

Action:
Required action unknown.
CAUAJM_E_00048

Unable to create Filter: Invalid class.

Reason:
Unable to create Filter: Invalid class.

Action:
Required action unknown.

Reason:
Could not setdetachstate.

Action:
Required action unknown.

CAUAJM_E_00050

Could not setdetachstate DETACHED for [{0}]

Reason:
Could not setdetachstate.

Action:
Required action unknown.

CAUAJM_E_00051

Unable to create thread! [{0}][{1}]

Reason:
Unable to create thread.

Action:
Required action unknown.
CAUAJM_E_00053

[0] not joined: {1}

Reason:
Join error.

Action:
Required action unknown.

CAUAJM_E_00054

The string provided for field <{0}> is too long: {1}

Reason:
The string is too long.

Action:
Choose a shorter string.

CAUAJM_E_00056

Unable to add Filter: cannot locate JFilter object.

Reason:
Unable to add Filter: cannot locate JFilter Object.

Action:
Required action is not known.

CAUAJM_E_00061

Machine <{0}> is not defined in the database.

Reason:
The machine is not available.

Action:
Define the machine to the database.
CAUAJM_E_00062

Unsupported machine type for authentication.

Reason:
The machine type defined is unsuitable for authentication.

Action:
Specify a different machine.

CAUAJM_E_00063

Database error during authentication.

Reason:
A database error occurred retrieving a machine definition used for authentication.

Action:
Check the application server log for errors.

CAUAJM_E_00064

Return code {0} received processing request.

Reason:
An unexpected error occurred identified by the return code.

Action:
Check that the agent used for authentication is running and configured correctly. Contact Technical Support for further assistance.

CAUAJM_E_00065

Validation Internal Error: User failed authentication

Reason:
The product instance has not been configured with internal user.

Action:
Define the specified user according to the security implemented.
CAUAJM_E_00066

Validation Failure: Artifact \"{0}\" failed authentication.

Reason:
The artifact provided is invalid.

Action:
Acquire a new artifact and retry.

CAUAJM_E_00067

Validation Internal Error: Artifact \"{0}\" failed authentication.

Reason:
The product instance has not been configured to run under CA EEM security.

Action:
Reconfigure the product or change the authentication method.

CAUAJM_E_00076

{0} {1} failed. Error: {2}\n
Reason:
WSAStartup failed.

Action:
Required action unknown.

CAUAJM_E_00088

Could not get host information for [{0}]. Not started.

Reason:
Could not get host information.

Action:
Required action unknown.
CAUAJM_E_00094

Unable to obtain routine address for <{0}> in library <{1}>.

Reason:
The system cannot locate the address for the specified function in the library, typically when the specified library is unavailable.

Action:
Verify that the required library is available on the system.

CAUAJM_E_00095

Unable to load the email notification library <{0}>.

Reason:
Unable to load required library.

Action:
Make sure the required library is available on the system.

CAUAJM_E_00096

Unable to determine current user credentials.

Reason:
Unknown.

Action:
Unknown.

CAUAJM_E_00099

Get userid failed; error code={0}.

Reason:
Unable to get current userid. The message is not forwarded to Unicenter Event Management.

Action:
Contact CA Technical Support.
CAUAJM_E_00100

Get machine name failed; error code={0}.

Reason:
Unable to get current machine name. The message is not forwarded to Unicenter Event Management.

Action:
Contact CA Technical Support.

CAUAJM_E_00101

An error has occurred calling Unicenter Event Management - EmEvt_wto rc={0} apirc={1}

Reason:
An error has occurred calling Unicenter Event Management.

Action:
Review overall return code. Take action as needed. Otherwise contact CA Technical Support.

CAUAJM_E_00102

Notification request aborted.

Reason:
Unable to load required library. The notification request has been aborted.

Action:
Make sure the Notification component is installed and the required library is available on the system.

CAUAJM_E_00103

Unable to obtain routine address for {0} in library {1}; Notification request aborted.

Reason:
Unable to locate function address in library. Notification request aborted.

Action:
Make sure the Notification component is installed and the required library is available on the system.
CAUAJM_E_00104

Failed to open the Notification interface rc = {0}

Reason:
Unable to open the Notification interface.

Action:
Make sure the Notification component is installed and is active.

CAUAJM_E_00105

Notification provider was not supplied. Request aborted.

Reason:
The notification provider was not supplied.

Action:
Review the attributes of the job for which the notification was being sent.

CAUAJM_E_00106

Failed to set {0} rc = {1}

Reason:
Unable to set parameter.

Action:
Review the return code from Unicenter Notification and take action as required.

CAUAJM_E_00107

Failed to issue Notification Services request rc = {0}  JOB: {1}

Reason:
Unable to issue notification request.

Action:
Review the return code from Unicenter Notification Services and take action as required.
CAUAJM_E_00108

Service Desk login failure rc = {0}

Reason:
Service Desk login failure.

Action:
Make sure Service Desk Web Service is properly installed and accessible through the network.

CAUAJM_E_00109

{0}

Reason:
Service Desk SOAP FAULT message.

Action:
Review message and take action as required.

CAUAJM_E_00110

{0}

Reason:
Service Desk SOAP FAULT DETAIL message.

Action:
Review message and take action as required.

CAUAJM_E_00111

{0}

Reason:
Service Desk SOAP FAULT LOCATION message.

Action:
Review message and take action as required.
**CAUAJM_E_00112**

Failure obtaining Service Desk user handle for user {0} rc = {1}

**Reason:**
Failure obtaining Service Desk user handle for user.

**Action:**
Make sure the user has been defined to the Service Desk Web Service.

**CAUAJM_E_00113**

Failure obtaining Service Desk customer handle for customer {0} rc = {1}

**Reason:**
Failure obtaining ServiceDesk customer handle for customer.

**Action:**
Make sure the customer has been defined to the ServiceDesk Web Service.

**CAUAJM_E_00114**

Service Desk request failure rc = {0}

**Reason:**
Failure creating ServiceDesk request.

**Action:**
Review the return code and take action as needed.

**CAUAJM_E_00115**

Unable to obtain Service Desk login user and password from config file/registry.

**Reason:**
Unable to obtain Service Desk login user and password from config file/registry.

**Action:**
Ensure the user/encrypted password combination is set for configuration variable ServiceDeskUser. Try re-generating and setting encrypted password.
CAUAJM_E_00116

Service Desk user is not available. Request aborted.

Reason:
Service Desk user is not available. Request aborted.

Action:
Ensure the user/encrypted password combination is set for configuration variable ServiceDeskUser. Try re-generating, setting encrypted password and restart the Scheduler.

CAUAJM_E_00118

Service Desk request failed  JOB: {0}

Reason:
Unable to create a Service Desk request.

Action:
Refer to prior messages for cause and take action as required.

CAUAJM_E_00121

Notification Services request failure  JOB: {0}

Reason:
Unable to send Notification Services request.

Action:
Refer to prior messages for cause and take action as required.

CAUAJM_E_00123

Error parsing svcdesk_attr keyword/keyword value pair. Request aborted.

Reason:
Error parsing svcdesk_attr keyword/keyword value pair.

Action:
Review the JIL svcdesk_attr attribute to ensure the input string has been coded in keyword/keyword value pairs. If multiple attributes are specified they must be comma separated.
**CAUAJM_E_00124**

Duplicate Service Desk keyword detected "(0)". Requested aborted.

**Reason:**
A duplicate keyword has been detected within the Service Desk JIL input.

**Action:**
Review the JIL job definition for the specified duplicate keyword and remove accordingly.

**CAUAJM_E_00125**

Notify request was rejected.

**Reason:**
Unicenter Notification rejected the request.

**Action:**
Using the Unicenter Notification Status UI check the request for indications of the problem. Take action as required.

**CAUAJM_E_00126**

UNS Diagnostic: {0}

**Reason:**
Unicenter Notification diagnostic message for the failing request.

**Action:**
Take action as required by the message(s).
CAUAJM_E_00131

An unrecoverable error has occurred or the maximum number of allowable errors has been exceeded. Unicenter Event Management messaging has been disabled.

Reason:
An unrecoverable error has occurred or the maximum number of allowable errors has been exceeded. Unicenter Event Management messaging is disabled.

Action:
Review any previous error messages pertaining to Unicenter Event Management. Take action as required and recycle the Scheduler to reinstate Unicenter Event Management messaging.

CAUAJM_E_00132

Database indicates failover status. Shutting down.

Reason:
Database indicates failover status. Shutting down.

Action:
Determine problem that caused failover and restart system.

CAUAJM_E_00133

The shadow and tie-breaker are both missing. The primary must shutdown.

Reason:
The shadow and tie-breaker are both missing. The primary must shutdown.

Action:
Determine why shadow and tie-breaker are missing and restart system.

CAUAJM_E_00136

Database indicates Fail-over status. Shadow taking over.

Reason:
Shadow taking over due to fail-over.

Action:
Determine problem that caused fail-over and restart system.
**CAUJM_E_00143**

Database no longer indicates Fail-over status. Shadow must shut down.

**Reason:**
Database status has changed from Fail-over.

**Action:**
Manually determine scheduler statuses and restart the system.

**CAUJM_E_00148**

The primary and tie-breaker are both missing. The shadow must shutdown.

**Reason:**
The primary and tie-breaker are both missing. The shadow must shutdown.

**Action:**
Determine why shadow and tie-breaker are missing and restart system.

**CAUJM_E_00159**

Unexpected error in NTthread.cpp. Function: {0}; File: {1}; Line: {2}

**Reason:**
Unknown.

**Action:**
Unknown.

**CAUJM_E_00160**

WaitForSingleObject failed. Return code [{0}].

**Reason:**
Unknown.

**Action:**
Unknown.
**CAUAJM_E_00161**

GetLastError(): [{0}]

**Reason:**
Unknown.

**Action:**
Unknown.

**CAUAJM_E_00165**

The {0} primary scheduler is already running on machine: {1}. Startup aborted.

**Reason:**
The primary scheduler is already running on the specified machine. Startup aborted.

**Action:**
Shutdown the active primary scheduler before starting a new scheduler on this machine.

**CAUAJM_E_00166**

The {0} shadow scheduler is already running on machine: {1}. Startup aborted.

**Reason:**
The shadow scheduler is already running on the specified machine. Startup aborted.

**Action:**
Shutdown the active shadow scheduler before starting a new scheduler on this machine.

**CAUAJM_E_00170**

The {0} tie-breaker scheduler is already running on machine: {1}. Startup aborted.

**Reason:**
The tie-breaker scheduler is already running on the specified machine. Startup aborted.

**Action:**
Shutdown the active tie-breaker scheduler before starting a new scheduler on this machine.
CAUAJM_E_00171

Database error encountered while trying to determine if scheduler is already running, startup aborted.

Reason:
Database error encountered while trying to determine if scheduler is already running, startup aborted.

Action:
Check the database status.

CAUAJM_E_00172

Database error encountered while initializing the high availability system. Startup aborted.

Reason:
Database error encountered while initializing the high availability system. Startup aborted.

Action:
Check the status of the database.

CAUAJM_E_00179

Unable to load the CA Secure Sockets Adapter shared library dynamically. Process terminating.

Reason:
The CA Secure Sockets Adapter shared library could not be loaded. The library could have been moved, renamed, or deleted.

Action:
Check if the CA Secure Sockets Adapter files have been moved, renamed, or deleted.
**CAUAJM_E_00191**

Shutdown notification for the primary scheduler was not written into any database.

**Reason:**
Shutdown notification for the primary scheduler was not written into any database.

**Action:**
Investigate the state of both databases.

**CAUAJM_E_00192**

Shutdown notification for the shadow scheduler was not written into any database.

**Reason:**
Shutdown notification for the shadow scheduler was not written into any database.

**Action:**
Investigate the state of both databases.

**CAUAJM_E_00193**

Shutdown notification for the tie-breaker scheduler was not written into any database.

**Reason:**
Shutdown notification for the tie-breaker scheduler was not written into any database.

**Action:**
Investigate the state of both databases.

Error accessing the security information in the database!

Reason:
A Database error has occurred.

Action:
Required action unknown.
CAUAJM_E_10448

FATAL SECURITY ERROR: Tampering or corruption of the security-related database keys detected!

Reason:
The CA Workload Automation AE has detected corrupt or missing security data in the database.

Action:
Contact CA Workload Automation AE technical support.

CAUAJM_E_10449

Please contact {0} technical support!

Reason:
A serious error has occurred that requires the attention of technical support.

Action:
Contact CA Workload Automation AE technical support.

CAUAJM_E_10451

Someone may have been tampering with the Database and attempted to change the {0} Super User: {1} by hand!

Reason:
The CA Workload Automation AE has detected corrupt or missing security data in the database.

Action:
Contact CA Workload Automation AE Technical Support.

CAUAJM_E_10459

Security server information unavailable! Run autosys_secure option 1 to enable eTrust IAM Toolkit security for this instance!

Reason:
Security server information is unavailable.

Action:
Run autosys_secure option 1 to enable eTrust IAM Toolkit security for this instance.
CAUAJM_E_10460

The MACH_OFFLINE and MACH_ONLINE events cannot be used against VIRTUAL machine <{0}>.

Reason:
The machine offline and online event cannot be used against a virtual machine.

Action:
Specify a real machine name and resubmit the request.

CAUAJM_E_10461

{0} ERROR: {1} < {2} >

Reason:
Error for job or global blob.

Action:
Required action unknown.

CAUAJM_E_10462

Failed to retrieve time offset from database

Reason:
Database Error on query.

Action:
Required action unknown.

CAUAJM_E_10464

Could not find valid machines for job [{0} {1,number,1}.{2,number,1}.{3,number,1}]

Reason:
The input machine list does not contain any valid machines.

Action:
Please check the input machine list to make sure it contains valid machines.
**CAUAJM_E_10465**

{0} shadow scheduler encountered a database error while notifying agents.

**Reason:**
The shadow scheduler encountered a database error while while notifying agents.

**Action:**
Check the status of the database.

**CAUAJM_E_10466**

Unable to query Virtual Resource dependency details for job [{0} {1,number,1}.{2,number,1}.{3,number,1}]

**Reason:**
Database Error on query.

**Action:**
Check the log file for possible reasons of query failure and act accordingly.

**CAUAJM_E_10467**

Unable to query Real Resource dependency details for job [{0} {1,number,1}.{2,number,1}.{3,number,1}]

**Reason:**
A database error occurred on the query.

**Action:**
Check the log file for possible reasons of query failure and act accordingly.

**CAUAJM_E_10469**

Unable to delete resource usage for job [{0} {1,number,1}.{2,number,1}.{3,number,1}]

**Reason:**
A database error occurred on delete.

**Action:**
Check the log file for possible reasons of query failure and act accordingly.
CAUAJM_E_10476

Error loading Resource Manager.

Reason:
Error loading Resource Manager.

Action:
Required action unknown.

CAUAJM_E_10477

Error connecting to the {0} Manager

Reason:
Error connecting to the DCA Manager with the specified url

Action:
Check the DCA Manager credentials.

CAUAJM_E_10479

Error - Input machine list empty

Reason:
The input machine list is empty.

Action:
Need a valid CSV input machine list.

CAUAJM_E_10480

Error - No target machine specified

Reason:
Target machine not specified.

Action:
Need an input machine.
CAUAJM_E_10481

Error - No target machine user specified

Reason:
Target machine user not specified.

Action:
Need target machine user for deployment.

CAUAJM_E_10482

Error - No password of the target machine user specified

Reason:
Target machine password not specified.

Action:
Need target machine user password for deployment.

CAUAJM_E_10483

Error - No JobId specified

Reason:
Prep JobId not specified.

Action:
Need a valid prep JobId.

CAUAJM_E_10484

Machine {0}: Provision Error - {1}

Reason:
PrepStatus returned error.

Action:
Required action unknown.
CAUAJM_E_10486

(0) primary scheduler encountered a database error while notifying agents.

Reason:
The primary scheduler encountered a database error while notifying agents.

Action:
Check the status of the database.

CAUAJM_E_10487

An error occurred uploading the certificate file to the database.

Reason:
A program or database error prevents the storage of the authentication certificate in the database.

Action:
Check previous messages for an indication of what caused the problem and take required action. If you cannot determine the cause of the problem, contact technical support.

CAUAJM_E_10488

Resource Manager not available. Unable to process request.

Reason:
Resource Manager not loaded during startup.

Action:
Check the server log file for errors during startup. Fix the problem and restart server.

CAUAJM_E_10494

Missing value for "{0}"

Reason:
Required value is missing.

Action:
Specify the required value.
CAUAJM_E_10495

Database error encountered while accessing virtual resource data.

**Reason:**
Database Error on query.

**Action:**
Check the log file for possible reasons of database query failure and act accordingly.

CAUAJM_E_10497

{0} scheduler encountered a database error while resolving the localhost machine.

**Reason:**
Scheduler encountered a database error while resolving the localhost machine.

**Action:**
Check the status of the database.

CAUAJM_E_10498

{0} scheduler failed to establish the required listeners.

**Reason:**
Scheduler failed to establish the required listeners.

**Action:**
Check the Manager port and the Secure Sockets Adapter configurations.

CAUAJM_E_10500

Invalid job specification for retrieving successors.

**Reason:**
Must specify non-wildcard job name.

**Action:**
Re-execute the query with a non-wildcard job name.
CAUAJM_E_10501

Invalid state for alarm.

Reason:
API called with an incorrect state parameter.

Action:
Recall API with valid state parameter.

CAUAJM_E_10502

Alarm does not exist.

Reason:
Alarm eoid specified in update does not exist.

Action:
Recall API with valid alarm eoid.

CAUAJM_E_10503

{0} primary scheduler encountered a problem starting up and must shut down.

Reason:
The primary scheduler encountered a problem starting up and must shut down.

Action:
Check the scheduler log for details.

CAUAJM_E_10504

Alarm response is too long.

Reason:
Alarm response specified in API call is too long.

Action:
Recall API with shorter response string.
CAUAJM_E_10505

Invalid object type specified in call to API.

Reason:
Invalid object type specified in call to API.

Action:
Recall API with valid object type.

CAUAJM_E_10506

Failed to retrieve job with joid <{0}>.

Reason:
Job is not in the database.

Action:
Call API with existing job.

CAUAJM_E_10507

Failed to retrieve job <{0}>.

Reason:
Job is not in the database.

Action:
Call API with existing job.

CAUAJM_E_10510

Error modifying jobs affected by calendar change.

Reason:
Could not modify job start times based on change of calendar.

Action:
Required action unknown.
CAUJM_E_10512

Failed to check existence of \{0\} extended calendar.

Reason:
Query failed. Could not check the calendar.

Action:
Required action unknown.

CAUJM_E_10513

Failed to retrieve cal_id of holiday calendar.

Reason:
QUERY failed. Could to retrieve a database field.

Action:
Required action unknown.

CAUJM_E_10514

Holiday calendar may not be an extended calendar

Reason:
Holiday calendar must be a standard calendar.

Action:
Required action unknown.

CAUJM_E_10515

Request was not fulfilled within its expiration time.

Reason:
Request was not fulfilled within its expiration time.

Action:
Set a higher value for the MaxExpirationSeconds attribute of the request.
**CAUAJM_E_10516**

Request was not fulfilled within its expiration time by the CA WA AE Application Server: [application server host]:CA Portal

**Reason:**
Request was not fulfilled within its expiration time by the Application Server.

**Action:**
Set a higher value for the MaxExpirationSeconds attribute of the request.

**CAUAJM_E_10517**

Failed to retrieve id of extended calendars.

**Reason:**
QUERY failed. Could not create a new calendar ID.

**Action:**
Required action unknown.

**CAUAJM_E_10518**

Failed to modify extended calendars, calendar does not exist.

**Reason:**
Attempted to modify an extended calendar that does not exist.

**Action:**
Required action unknown.

**CAUAJM_E_10520**

Syntax error in extended calendar {0}.

**Reason:**
The condition field has a syntax error. The extended calendar will generate no dates.

**Action:**
Correct the condition field in the extended calendar.
CAUAJM_E_10521

Invalid keyword in extended calendar {0}.

Reason:
The condition field has an invalid keyword. The extended calendar might generate incorrect dates.

Action:
Correct the condition field in the extended calendar.

CAUAJM_E_10523

Can not delete a regular calendar.

Reason:
Attempted to delete a regular calendar when trying to delete extended calendar.

Action:
Required action unknown.

CAUAJM_E_10524

Failed to check existence of cycle.

Reason:
QUERY failed. Can not check existence of cycle.

Action:
Required action unknown.

CAUAJM_E_10525

Cannot Insert Cycle, periods overlap.

Reason:
Cycle has overlapping periods.

Action:
Enter periods for the cycle that do not overlap.
CAU AJM E_10526

Failed to modify cycle, cycle does not exist.

Reason:
Attempting to modify a cycle that does not exist.

Action:
Required action unknown.

CAU AJM E_10527

Timed out waiting for response from the CA Workload Automation AE Application Server.

Reason:
Application server may not be reachable.

Action:
Make sure the application server is running and the node it is on is available.

CAU AJM E_10528

Timed out waiting for response from the {0} Agent: [{1}:{2,number,1}]

Reason:
Agent may not be reachable.

Action:
Make sure the agent is running and the node it is on is available.

CAU AJM E_10529

Application Server request timed out. Please refer to the Listener Agent log file entry for host [{0}] and instance {1}.

Reason:
The Application Server request timed out. The Application server may not be reachable.

Action:
Please refer to the Listener Agent log file entry for given host and given instance.
CAUAJM_E_10530

The Agent communication port has not been configured. Returning {0}

Reason:
The communication port for the Agent component has not been configured. Returning FAILURE.

Action:
Required action unknown.

CAUAJM_E_10531

Application Server request failed. Please refer to the Listener Agent log file entry for host [{0}]

Reason:
The Application Server request failed. The Application server may not be reachable or invalid blob API request.

Action:
Please refer to the Listener Agent log file entry for given host and given instance.

CAUAJM_E_10532

Unable to communicate with machine <{0}> because the agent does not support data encryption.

Reason:
Unable to communicate with the specified machine because the agent does not support data encryption.

Action:
Communications with a legacy agent cannot be encrypted. Turn off encryption in the instance.
CA Workload Automation AE Messages

Chapter 4: Error Messages

**CAUAJM_E_10536**

CA Workload Automation AE Agent remote authentication! ERROR: {0}

**Reason:**
Agent remote authentication error.

**Action:**

Reason:
Invalid backslash at the end of logical expression logical expression.

Action:
Required action unknown.
CAUAJM_E_10600

Could not check existence of calendar.

Reason:
Query failed. Count not check existence of calendar.

Action:
Required action unknown.

CAUAJM_E_10601

Cannot insert calendar {0}, calendar name already exists.

Reason:
Query failed. Calendar name is already in use.

Action:
Required action unknown.

CAUAJM_E_10602

Failed to insert {0} into {1} calendar.

Reason:
The query failed. An error occurred inserting a new calendar date.

Action:
Enter a valid date.

CAUAJM_E_10603

Failed to modify calendars, calendar does not exist.

Reason:
Cannot modify a calendar that does not exist.

Action:
Required action unknown.
CAUJM_E_10604

Failed to check existence of standard calendars.

Reason:
The query failed. Could not check existence of standard calendars.

Action:
Required action unknown.

CAUJM_E_10612

Error retrieving uninotify row for joid {0}.

Reason:
An error occurred retrieving the uninotify row for the joid.

Action:
Required action unknown.

CAUJM_E_10618

Failed to uncompress incoming response buffer. Error code [{0}].

Reason:
Internal zlib decompression algorithm failed.

Action:
Required action unknown.

CAUJM_E_10619

Return values from dual database writes disagree. Databases may no longer be synchronized.

Reason:

Action:
Shut down and resynchronize the databases.
CAUAJM_E_10620

Return values from dual database writes disagree. Databases may no longer be synchronized.

Reason:

Action:
Shutdown and resynchronize databases.

CAUAJM_E_10622

Cannot Insert Cycle, cycle name already exists

Reason:
The cycle name is already in use.

Action:
Enter a new cycle.

CAUAJM_E_10629

Failed to get next run_num.

Reason:
The database query failed.

Action:
Required action unknown.

CAUAJM_E_10637

Could not create the notify call: "{0}". Error code: {1}

Reason:
Failed to create child.

Action:
Required action unknown.
CAUAJM_E_10638

Could not execute the notify call: '{0}'

Reason:
Call to system() failed.

Action:
Required action unknown.

CAUAJM_E_10639

Could not find SystemRoot variable.

Reason:
The SystemRoot environment variable is not defined.

Action:
Required action unknown.

CAUAJM_E_10641

Failure mallocing space for {0}

Reason:
The system memory has been exhausted.

Action:
Reduce the memory load on the system.

CAUAJM_E_10642

Notify could not open Window Station '{0}'

Reason:
Could not open Window Station.

Action:
Required action unknown.
CAUAJM_E_10644

Could not execute the notify call = {0}

Reason:
Failed on WaitForSingleObject().

Action:
Required action unknown.

CAUAJM_E_10645

Could not mark the database: {0} in single server mode. Cannot complete rollover.

Reason:
The attempt to update the database as single server mode failed.

Action:
Required action unknown.

CAUAJM_E_10646

Failed to update configuration information regarding rollover.

Reason:
Failed to update the configuration information regarding rollover.

Action:
Required action unknown.

CAUAJM_E_10649

Server {0} was not available during connection operation.

Reason:
Unable to connect to the server.

Action:
Check database name and connectivity and try again.
**CAUAJM_E_10650**

Unable to mark the database mode.

**Reason:**
The update to the ujo_alamode table failed.

**Action:**
Required action unknown.

**CAUAJM_E_10651**

Failed to determine what mode the database is in.

**Reason:**
The query to retrieve the DB mode from ujo_alamode failed.

**Action:**
Required action unknown.

**CAUAJM_E_10652**

Configuration indicates that the system is in dual server mode but the database indicates otherwise.

**Reason:**
Configuration and ujo_alamode disagree as to whether the system is in dual server mode.

**Action:**
Inspect configuration. If it is set correctly, restart the primary scheduler to reset the database mode.
CAUAJM_E_10653

Configuration indicates that the system is in single server mode but the database indicates otherwise.

Reason:
Configuration and ujo_alamode disagree as to whether the system is in dual server mode.

Action:
Inspect configuration. If it is set correctly, restart the primary scheduler to reset the database mode.

CAUAJM_E_10656

The database <{0}> has encountered a critical error. Please contact the database administrator.

Reason:
The database has encountered a critical error. Please contact the database administrator.

Action:
Recover the database and restart the system.

CAUAJM_E_10657

Failed to update DBAccess information.

Reason:
Failed to update DBAccess information.

Action:
Required action unknown.
CAUAJM_E_10658

Cannot insert External Instance: {0} because it already exists.

Reason:
Cannot insert External Instance as it is already defined to the database.

Action:
Change the External Instance name to INSERT or use the UPDATE attribute to update the External Instance.

CAUAJM_E_10660

ERROR: Could not INSERT to ujo_asext_config for External Instance : {0}!!!

Reason:
Could not INSERT to ujo_asext_config.

Action:
Required action unknown.

CAUJM_E_10661

Only "{0}" agents support this operation.

Reason:
Only zos agents support this operation type.

Action:
Correct the input parameters and resubmit the request.

CAUAJM_E_10662

Cannot delete External Instance: {0} because it does not exist.

Reason:
Cannot delete External Instance as it does not exist in the database.

Action:
Change the External Instance name to update or use the INSERT attribute to insert the External Instance.
**CAUAJM_E_10663**

Cannot update External Instance: {0} because it does not exist.

**Reason:**
Cannot update External Instance as it does not exist in the database.

**Action:**
Change the External Instance name to update or use the INSERT attribute to insert the External Instance.

**CAUAJM_E_10664**

Error retrieving AFM information from the database.

**Reason:**
An error occurred retrieving AFM information from the database.

**Action:**
Required action unknown.

**CAUAJM_E_10665**

Agents of machine type {0} do not support this operation.

**Reason:**
Agents of the specified machine type do not support this operation.

**Action:**
The Agent does not support the requested operation.

**CAUAJM_E_10666**

Error retrieving machine information from the database.

**Reason:**
An error occurred retrieving machine information from the database.

**Action:**
Required action unknown.
CAUAJM_E_10668

Unable to determine the file name of the requested log.

Reason:
The database query failed.

Action:
Required action unknown.

CAUAJM_E_10669

Unable to determine the node that has the requested log.

Reason:
The database query failed.

Action:
Required action unknown.

CAUAJM_E_10670

Error retrieving remote agent directory.

Reason:
The database query failed.

Action:
Required action unknown.

CAUAJM_E_10671

Error retrieving job output {0}:

Reason:
An error occurred retrieving job output blob/glob.

Action:
Required action unknown.
CAUAJM_E_10672

Input field contains illegal apostrophe.

Reason:
Client input error.

Action:
Remove the apostrophe and retry.

CAUAJM_E_10673

The requested server operation failed. Operation ID = {0}.

Reason:
Reason unknown.

Action:
Required action unknown.

CAUAJM_E_10674

The requested server operation failed because the requester has insufficient privileges. Operation ID = {0}.

Reason:
Reason unknown.

Action:
Required action unknown.

CAUAJM_E_10675

The requested server operation failed due to external validation failure. Operation ID = {0}.

Reason:
Reason unknown.

Action:
Required action unknown.
CAUAJM_E_10676

The requested server operation failed because one of the specified fields was invalid. Operation ID = \{0\}.

**Reason:**
Reason unknown.

**Action:**
Required action unknown.

CAUAJM_E_10677

The requested server operation failed because required attributes were not specified. Operation ID = \{0\}.

**Reason:**
Reason unknown.

**Action:**
Required action unknown.

CAUAJM_E_10678

The requested server operation failed because specified attributes were invalid. Operation ID = \{0\}.

**Reason:**
Reason unknown.

**Action:**
Required action unknown.

CAUAJM_E_10679

The requested server operation failed because specified filter fields were invalid. Operation ID = \{0\}.

**Reason:**
Reason unknown.

**Action:**
Required action unknown.
CAUAJM_E_10680

The requested server operation failed because the specified object does not exist. Operation ID = {0}.

Reason:
Reason unknown.

Action:
Required action unknown.

CAUAJM_E_10681

The requested calendar <{0}> does not exist.

Reason:
The calendar has not previously been defined.

Action:
Create the calendar, or change the name of the requested calendar.

CAUAJM_E_10682

Requested log file for the specified job could not be found.

Reason:
Requested log file for the specified job could not be found.

Action:
Pick a job that creates job logs.

CAUAJM_E_10683

CONDITION ERROR: External instance name <{0}> is not defined

Reason:
The external instance name is currently not defined to CA Workload Automation AE.

Action:
Define the external instance through JIL.
CAUAJM_E_10684

Unable to establish a network connection to [0]:[1].

Reason:
Network failure or specified host is bad.

Action:
correct the host name or network failure.

CAUAJM_E_10685

Specified filter is invalid.

Reason:
The generated where clause is empty.

Action:
Change the filter.

CAUAJM_E_10687

The specified binary object is too large.

Reason:
The binary object is too large.

Action:
Make the binary object smaller or adjust the MaxBlobSize configuration parameter.

CAUAJM_E_10689

The time interval type is invalid.

Reason:
The specified type is invalid.

Action:
Change the type and re-run the API.
CAUAJM_E_10690

No statistics fields were specified.

Reason:
No statistics were included in the request.

Action:
Add statistics to the request and re-run the API.

CAUAJM_E_10691

At least one of the statistics fields supplied was invalid.

Reason:
The specified statistic is invalid.

Action:
Change and re-run the API.

CAUAJM_E_10692

The requested server operation failed to complete within the expiration time of <number> seconds. Operation ID = <request number>.

Reason:
The requested server operation failed to complete within the expiration time.

Action:
Set a higher value for the MaxExpirationSeconds attribute of the request.

CAUJM_E_10694

Required parameters missing for {0} log retrieval.

Reason:
The input command requires additional parameters to retrieve log files from thezos platform.

Action:
Input the missing parameters and resubmit the request.
**CAUAJM_E_10715**

Library loaded does not contain the AUTOEXTVJ.ValidateJob function.

**Reason:**
Invalid custom validation library.

**Action:**
Customer must rebuild the custom validation library so it includes AUTOEXTVJ.ValidateJob function.

**CAUAJM_E_10716**

All custom job validations will fail.

**Reason:**
The job failed custom validation.

**Action:**
Required action unknown.

**CAUAJM_E_10718**

AUTOEXTVJ Error:

**Reason:**
The job failed custom validation.

**Action:**
Required action unknown.

**CAUAJM_E_10725**

Failed to construct an AFM string to start job <{0}>.

**Reason:**
Failed to construct an AFM string to start job <{0}>.

**Action:**
Required action unknown.
CAUAJM_E_10728

Failed to process an incoming AFM string: {0}.

Reason:
Failed to process an incoming AFM string.

Action:
Required action unknown.

CAUAJM_E_10780

The {0} value for {1} must be {2} bytes in length.

Reason:
The value's length is incorrect.

Action:
Machine definition is not saved.

CAUAJM_E_10781

Attribute {0} must be between {1} and {2}.

Reason:
The value is outside the acceptable range.

Action:
Machine definition is not saved.

CAUAJM_E_10785

Attribute {0} must be between {1} and {2}.

Reason:
The value is outside the acceptable range.

Action:
Machine definition is not saved.
CAUJM_E_10786

Attribute {0} must be greater than or equal to {1}.

Reason:
The value is outside the acceptable range.

Action:
Machine definition is not saved.

CAUJM_E_10787

Attribute {0} unsupported for machine type "{1}".

Reason:
An attribute was specified that is unsupported for the machine type.

Action:
Machine definition is not saved.

CAUJM_E_10802

must_start/must_complete Hours (HH) cannot be greater than 71.

Reason:
Hours (HH) cannot be greater than 71.

Action:
Required action is not known.

CAUJM_E_10873

Unable to update resource <{0}> at machine <{1}>. Reason: {2}.

Reason:
Unable to Insert/Update/Delete Resource.

Action:
Required action is not known.
CAUJM_E_10874

Unable to delete global resource <res>. Reason: Global resource does not exist.

Reason:
This message may occur for one of the following reasons:
- The resource name specified on the jil update_resource or delete_resource name is misspelled.
- The resource is not a global resource whereas a machine should have been specified to qualify the resource being deleted.

Action:
Required action is not known.

CAUJM_E_10875

Unable to {0} resource <{1}> at machine <{2}>. Reason: {3}.

Reason:
Unable to Insert/Update/Delete Resource.

Action:
Required action is not known.

CAUJM_E_10876

Unable to update resource <{0}>. Reason: {1}.

Reason:
This message may occur for one of the following reasons:
- The resource name specified on the jil update_resource or delete_resource name is misspelled.
- The resource is not a global resource whereas a machine should have been specified to qualify the resource being deleted.

Action:
Required action is not known.
**CAUAJM_E_10877**

Unable to update resource {0}. Reason: {1}.

**Reason:**
Unable to Insert/Update/Delete Resource.

**Action:**
Required action unknown.

**CAUAJM_E_10878**

Unable to {0} resource dependency {1}. Reason: {2}.

**Reason:**
Unable to Insert/Update/Delete Resource dependency.

**Action:**
Required action unknown.

**CAUAJM_E_10879**

Unable to read resource id {0}. Reason: Resource does not exist, inconsistent resource data..

**Reason:**
Unable to read Resource.

**Action:**
Required action unknown.

**CAUAJM_E_10880**

Error encountered while reading timezones. Reverting to gmt timezone.

**Reason:**
Potential corruption of cfg file.

**Action:**
Check the cfg file to verify timezone definitions.
CAUAJM_E_10881

Failed to enable core file: {0}.

Reason:
Reason unknown.

Action:
Required action is unknown.

CAUAJM_E_10882

Maximum number of {0} exceeded

Reason:
Too many subtype parameters have been specified.

Action:
Specify the correct number of parameters.

CAUAJM_E_10885

Job {0} cannot be updated while consuming resources.

Reason:
Job cannot be updated while consuming resources.

Action:
Wait for the job to complete and manually free the resources if necessary to update the job.

CAUAJM_E_10904

ERROR: Unable to delete {0} table for Job:{1}{2}{3}

Reason:
Unable to delete ext_job table for job.

Action:
Required action unknown.
CAUAJM_E_10905

Please run the \{0\} \{1\} database scripts to synchronize data from event server \{2\} to \{3\}.

**Reason:**
Please run the CA WAAE BCP database scripts to synchronize data from one event server to the other.

**Action:**
Execute the BCP database scripts and restart the Scheduler.

CAUAJM_E_10906

Detected critical dual event synchronization deadlock. Detailed information below. Shutting down.

**Reason:**
A critical dual event synchronization deadlock was detected. Detailed information below. Shutting down.

**Action:**
The Scheduler cannot reconcile events from both databases. A development fix is required.

CAUAJM_E_10911

The Local Settings Application Data directory is not accessible.

**Reason:**
The user credentials that you provided are either invalid or identify you as a user who is not authorized to access the directory.

**Action:**
Verify user permissions, log in as a user who is permitted to access the directory, and reissue the command.
**CAUAJM_E_10912**

The home directory does not exist or is not accessible.

**Reason:**
The user credentials that you provided are either invalid or identify you as a user who is not authorized to access the directory or whose HOME environment variable is not properly set.

**Action:**
Verify home directory assignments or HOME environment variable settings, log in as a user with the necessary permissions or environment variable settings, and reissue the command.

**CAUAJM_E_10920**

User authentication for <{0}> failed. Command aborted.

**Reason:**
Unable to authenticate using the supplied credentials.

**Action:**
Re-run the utility with valid credentials or contact your security administrator for assistance.

**CAUAJM_E_10921**

**Reason:**
Authentication credentials were not supplied, and the CA Workload Automation AE instance is running in a mode that requires all commands to authenticate.

**Action:**
Re-run the utility with valid credentials or contact your security administrator for assistance.
CAUAJM_E_10922

Unable to authenticate using cached credentials. Command aborted.

Reason:
Cached credentials are invalid.

Action:
Regenerate cached credentials using a valid user name and password combination and then re-issue the command, or contact your security administrator for assistance.

CAUAJM_E_10923

Unable to retrieve credentials from the external client authentication library. Command aborted.

Reason:
The external client authentication library is not installed, is invalid, or does not recognize you as a valid user.

Action:
Verify that a valid external client authentication library is installed and that your user is valid, and then re-issue the command, or contact your security administrator for assistance.

CAUAJM_E_10924

Unable to authenticate using the credentials obtained from the external client authentication library. Command aborted.

Reason:
The credentials obtained from the external client authentication library are invalid.

Action:
Verify that a valid external client authentication library is installed and that your user is valid, and then re-issue the command, or contact your security administrator for assistance.
CAUAJM_E_10925

The external authentication library is missing symbol <{0}>.

Reason:
The definition for the specified function is missing from the external authentication library code.

Action:
Add a definition for the specified function to the external authentication library code and then recompile, test, and re-install the library, or contact your security administrator for assistance.

CAUAJM_E_10926

Caught an exception in external authentication library function {0}: <{1}>

Reason:
The operating system raised an exception while executing the external authentication library code due to a programming error.

Action:
Troubleshoot the programming error, recompile, and test the external authentication library code and then re-install the library, or contact your security administrator for assistance.

CAUAJM_E_10927

Unable to authenticate using the artifact. Command aborted.

Reason:
The artifact is invalid.

Action:
Generate a new artifact and then re-issue the command, or contact your security administrator for assistance.
CAUAJM_E_10930

Encryption error. File <{0}> cannot be written.

Reason:
Cached credential file data is corrupt.

Action:
Re-issue the command. If encryption failures continue, contact technical support.

CAUAJM_E_10931

Decryption error. Unable to read file <{0}>.

Reason:
Cached credential file data is corrupt.

Action:
Regenerate the cached credentials and then re-issue the command. If decryption failures continue, contact technical support.

CAUAJM_E_10932

Time out error. Cannot unlock file <{0}>.

Reason:
The file is locked because another active client utility is using it.

Action:
Manually terminate other client utility processes that are in a running, hung, or deadlocked state and then re-issue the command.
**CAUJM_E_10933**

File system error. Unable to acquire a lock for file `{0}`.

**Reason:**
The file does not exist, the permissions for the file are not set correctly, or some other unspecified file system or operating system error prevents the utility from acquiring a lock.

**Action:**
Verify that the file exists and that the file permissions are set correctly, review any other error messages and take appropriate necessary corrective action, then re-issue the command.

**CAUJM_E_10934**

File system error. Unable to open file `{0}`.

**Reason:**
The permissions for the file are not set properly, or some other unspecified file system or operating system error prevents the utility from opening the file.

**Action:**
Verify that the file permissions are set correctly, review any other error messages and take necessary corrective action, then re-issue the command.

**CAUJM_E_10935**

File system error. Unable to write file `{0}`.

**Reason:**
You do not have write permissions, or some other unspecified file system or operating system error is preventing the utility from creating the file.

**Action:**
Verify your permissions, review any other error messages and take necessary corrective action, then re-issue the command.
CAUAJM_E_10936

File system error. Unable to read file <{0}>.

Reason:
The file does not exist, you do not have read access to it, or some other unspecified file system or operating system error is making the file unreadable.

Action:
Verify that the file exists and that you have read access to it, review other error messages and take necessary corrective action, then re-issue the command.

CAUAJM_E_10937

File system error. Unable to delete file <{0}>.

Reason:
You do not have permission to delete the file, or some other unspecified file system or operating system error is preventing the utility from deleting the file.

Action:
Verify your permissions, review any other error messages and take necessary corrective action, then re-issue the command.

CAUAJM_E_10938

Invalid file permissions. Only the owner may read or write file <{0}>.

Reason:
Users other than the owner have read or write access to cached credentials file.

Action:
Regenerate the cached credentials and then re-issue the command. If the problem persists, contact CA Support.

CAUAJM_E_18000

Database function call <{0}> failed in <{1}> with return code: {2}

Reason:
Sybase Database specific error from ct_library.

Action:
Contact CA Technical Support for further assistance.
CAUAJM_E_18001

Rollback for Insert/Delete of blob failed with return code: {0}

Reason:
Failed to rollback transaction.

Action:
Contact CA Support to get information about rolling back blob insert manually.

CAUAJM_E_18002

Stored Procedure execution returned a failure: {0}

Reason:
Stored procedure returned non-zero value referring to an error.

Action:
Contact CA Technical Support for further assistance.

CAUAJM_E_18003

Failed to insert Blob/Glob

Reason:
Failed to insert the blob insert query with null\'s for Blob field.

Action:
Previous errors may have some information about the failure, otherwise, Contact CA Technical Support for further assistance with complete list of errors displayed in the log.

CAUAJM_E_18004

Failed to retrieve the global variables to update the blob fields.

Reason:
The query selecting the global variables failed.

Action:
Earlier messages (in the log) will have more information about the problem.
CAUAJM_E_18005

Bind failed for <{0}> of <{1}>.

Reason:
Bind failed for a column of IODescriptor. This could be a result of some other process trying to access the global variables.

Action:
Re-executing the query may resolve the problem.

CAUAJM_E_18006

next_row call failed for IO Descriptor in Blob implementation.

Reason:
Failed to fetch the next row from the database.

Action:
Next messages in the log should give additional information about the problem.

CAUAJM_E_18007

Failed to update the Blob Global Variable.

Reason:
Failed to update the Blob Global Variable.

Action:
Check if global variables are updated by another process. Contact CA Technical Support for further assistance.

CAUAJM_E_18008

Unknown type passed for binding.

Reason:
ct_bind of ct_library failed.

Action:
Contact CA Technical Support for further assistance.
CAUJM_E_18009

nextRow failed to retrieve next record from database.

Reason:
Failed to fetch the next row from the database. Something unexpected happened.

Action:
Contact CA Technical Support for further assistance.

CAUJM_E_18010

Database function call ct.diag client msg initialization failed

Reason:
ct.diag of ct_library failed.

Action:
Contact CA Technical Support for further assistance.

CAUJM_E_18011

Database function ct.diag server msg initialization failed

Reason:
ct.diag of ct_library failed.

Action:
Contact CA Technical Support for further assistance.

CAUJM_E_18012

Event Server: {0} Failed Stored Procedure: {1}

Reason:
An error from Sybase DMI occurred while executing the stored procedure.

Action:
Contact CA Technical Support for further assistance.
**CAUAJM_E_18013**

Event Server: {0} Failed Query: {1}

Reason:
An error from Sybase DMI occurred while executing the query.

Action:
Contact CA Technical Support for further assistance.

**CAUAJM_E_18014**

OS error: {0}

Reason:
An error was received from Sybase DMI.

Action:
Contact CA Technical Support for further assistance.

**CAUAJM_E_18015**

Client message: Message number: layer {{0}}, Origin {{1}}, text {{2}}, SEVERITY = {{3}}, NUMBER = {{4}}

Reason:
An error was received from Sybase DMI.

Action:
Contact CA Technical Support for further assistance.

**CAUAJM_E_18016**

Server: {0}

Reason:
An error was received from Sybase DMI.

Action:
Contact CA Technical Support for further assistance.
CAUAJM_E_18017

Procedure: {0}

Reason:
An error was received from Sybase DMI.

Action:
Contact CA Technical Support for further assistance.

CAUAJM_E_18018

Server message: Message number({0}), Severity({1}), State({2}), Line({3}), Message String: {4}

Reason:
An error was received from Sybase DMI.

Action:
Contact CA Technical Support for further assistance.

CAUAJM_E_18019

Failed to retrieve size of input Blob/Glob.

Reason:
Failed to retrieve size of input Blob/Glob.

Action:
Check if Blob/Glob has data. The Blob file might be empty.

CAUAJM_E_18020

Failed to retrieve bits of input blob.

Reason:
Failed to retrieve bits of input blob.

Action:
Check if the input blob has valid data.
**CAUAJM_E_18412**

The database client has been interrupted while query execution is in progress.

**Reason:**
The database client was interrupted while executing a query.

**Action:**
No action required.

**CAUAJM_E_18416**

Event Server: {0}  Failed Query: {1}

**Reason:**
Database error.

**Action:**
Contact your database administrator.

**CAUAJM_E_18607**

Event Server: {0}  Failed Stored Procedure: {1}

**Reason:**
An error was received from ODBC DMI while executing the stored procedure.

**Action:**
Contact CA Technical Support for further assistance.

**CAUAJM_E_18611**

Event Server: {0}  Failed Query: {1}

**Reason:**
An error was received from ODBC DMI while executing the query.

**Action:**
Contact CA Technical Support for further assistance.
CAUAJM_E_18803

Database operation to modify machine <{0}> could not complete due to an internal error.

Reason:
The ujo_put_machine stored procedure experienced an internal error.

Action:
Contact CA Support.

CAUAJM_E_18911

Database query execution could not complete due to an internal error.

Reason:
The database experienced an internal error while processing a query.

Action:
Contact CA Support.

CAUAJM_E_18912

Database operation to fetch query results could not complete due to an internal error.

Reason:
The database experienced an internal error while fetching query results.

Action:
Contact CA Support.

CAUAJM_E_18914

Invalid syntax "{0}" for subtype keyword "{1}". Syntax of subtype: {2}

Reason:
An invalid syntax was specified for subtype keyword.

Action:
Object definition is not saved.
CAUJM_E_18946

Database operation to modify job \{0\} could not complete due to an internal error.

Reason:
The ujo_put_job stored procedure experienced an internal error.

Action:
Contact CA Support.

CAUJM_E_18964

The value \"\{0\}\" for JIL keyword \"\{1\}\" must begin with \"\{2\}\"

Reason:
The keyword value must begin with the specified value.

Action:
Modify the keyword value as specified and define the job.

CAUJM_E_19028

Job \{0\} could not be modified properly due to a database failure. The job definition is in an unknown state.

Reason:
The specified job could not be modified properly due to a database failure.

Action:
Check the connectivity to the database and inspect the job definition. You may have to delete and redefine the job.

CAUJM_E_19042

Invalid JIL keyword value \"\{0\}\" for keyword \"\{1\}\". An email address can be up to 254 characters.

Reason:
One of the email address is greater than 254 characters.

Action:
Re-enter the correct email address.
**CAUAJM_E_19046**

Error for {0}: {1} < {2} subtype keyword {3} exceeds {4} bytes.>

Reason:
The specified subtype keyword value is too long.

Action:
Job definition is NOT saved.

**CAUAJM_E_19047**

Invalid JIL keyword value "{0}" for keyword "{1}". It contains one or more unpaired delimiters.

Reason:
The attribute value is missing or contains an extraneous delimiter.

Action:
Specify the corresponding delimiter. Prefix any embedded delimiters with an escape character.

**CAUAJM_E_30034**

Client [{0}][{1}][{2}][{3}] is not reachable. API ID [{4}] execution terminated. Total time: {5} seconds.

Reason:
The application server was unable to send all responses back to the SDK client.

Action:
Review previous messages for an indication of errors. Also, verify that the SDK client remains active until all responses are received.
CAUAJM_E_30035

Client [{0}][{1}][{2}] is not reachable. Session aborting...

Reason:
The application server was unable to complete the session information exchange with the SDK client.

Action:
Review previous messages for an indication of errors. Also, verify that the SDK client remains active until all responses are received.

CAUAJM_E_30037

Client [{0}][{1}][{2}] is not reachable. API ID [{3}] execution cancelled.

Reason:
Hostname of the SDK client is invalid or unreachable over the network.

Action:
Verify that the hostname can be resolved into an IP address and is pingable.

CAUAJM_E_30040

Client [{0}][{1}][{2}] is not reachable. Authentication request type [{3}] terminated. Total time: {4} seconds.

Reason:
The application server was unable to send all responses back to the SDK client.

Action:
Review previous messages for an indication of errors. Also, verify that the SDK client remains active until you receive all responses.

CAUAJM_E_40374

The scheduler log is unavailable because the scheduler is not running.

Reason:
Communication to the scheduler failed.

Action:
Start the scheduler and repeat the request.
CAUAJM_E_50153

Receiving information from the agent.

Reason:
An error was encountered while receiving information from the agent.

Action:
Required action unknown.

CAUAJM_E_50169

The index pointed to a zero "joid": chase[0].joid = 0. chase_string={1}

Reason:
An error was encountered while receiving information from the agent.

Action:
Required action unknown.

CAUAJM_E_50170

The index for {0} pointed to a zero "joid": chase[1].joid = 0. chase_string={2}

Reason:
An error was encountered while receiving information from the agent.

Action:
Required action unknown.

CAUAJM_E_50281

AutoPing from the Scheduler WAS NOT SUCCESSFUL.

Reason:
The scheduler fails to contact the agent when you issue the autoping command.

Action:
Verify that the agent is running and that there is network connectivity between the scheduler and the agent, and then reissue the command.
CAUAJM_E_50281

AutoPing from the Application Server WAS NOT SUCCESSFUL.

Reason:
The application server fails to contact the agent when you issue the autoping command.

Action:
Verify that the agent is running and that there is network connectivity between the application server and the agent, and then reissue the command.

CAUAJM_E_50290

Manual intervention is required.

Reason:
Manual intervention is required to recover from the previous error.

Action:
See the message displayed before this one for details.

CAUAJM_E_50292

The agent is not running, but the job is running on machine = {0}

Reason:
The agent is not running, but the job is running on the machine.

Action:
Manual intervention is required.

CAUAJM_E_50293

File watcher is in {0} state, but the agent is not available on machine: {1}

Reason:
File watcher is in RUNNING state, but the agent is not available on the machine.

Action:
Manual intervention is required.
CAUAJM_E_50294

Job is in {0} state, but both the agent and the user process are not running on machine: {1}

Reason:
File watcher job is in RUNNING state, but both the agent and the user process are not running on the machine.

Action:
Manual intervention is required.

CAUAJM_E_50295

Could not connect to machine: {0}. The machine or the network must be down.

Reason:
Could not connect to the machine. The machine or the network must be down.

Action:
Manual intervention is required.

CAUAJM_E_50296

Error in finding the actual state of the job: {0} on machine = {1}

Reason:
Could not get information about the actual state of the specified job on the specified machine.

Action:
Inspect the agent log files to determine the state of the job.

CAUAJM_E_60156

{0} cached credentials are unreadable.

Reason:
The home directory or Local Settings Application Data directory permissions do not authorize you to read cached credentials.

Action:
Check file and directory permissions in the user’s home directory or Local Settings Application Data directory.
**CAUAJM_E_60163**

Invalid format specified for the credential timeout. Missing day or hour specification.

**Reason:**
The credential timeout value has been incorrectly formatted.

**Action:**
Enter a valid credential timeout and resubmit the request.

**CAUAJM_E_60165**

Invalid format specified for the credential timeout. Day specification is not numeric.

**Reason:**
The credential timeout value has been incorrectly formatted.

**Action:**
Enter a valid credential timeout and resubmit the request.

**CAUAJM_E_60166**

Invalid format specified for the credential timeout. Hour specification is not numeric.

**Reason:**
The credential timeout value has been incorrectly formatted.

**Action:**
Enter a valid credential timeout and resubmit the request.

**CAUAJM_E_60167**

Invalid format specified for the credential timeout. Day and hour specification cannot be zero.

**Reason:**
The credential timeout value has been incorrectly formatted.

**Action:**
Enter a valid credential timeout and resubmit the request.
CAUAJM_E_60168
Invalid format specified for the credential timeout. Day specification is invalid.

Reason:
The credential timeout value has been incorrectly formatted.

Action:
Enter a valid credential timeout and resubmit the request.

CAUAJM_E_60169
Invalid format specified for the credential timeout. Hour specification is invalid.

Reason:
The credential timeout value has been incorrectly formatted.

Action:
Enter a valid credential timeout and resubmit the request.

CAUAJM_E_60172
{0} cached credentials are not deleted.

Reason:
The home directory or local application directory permissions do not authorize you to delete cached credentials.

Action:
Verify the home directory or local application data directory permissions, log in as a user who is authorized to delete cached credentials, and re-issue the command.

CAUAJM_E_60291
{0} credentials are not cached.

Reason:
The home directory or local application directory permissions do not authorize you to generate cached credentials.

Action:
Verify the home directory or local application data directory permissions, log in as a user who is authorized to delete cached credentials, and re-issue the command.
CAUAJM_E_60346

An invalid option combination has been specified. Options {0} and {1} are mutually exclusive.

Reason:
The specified options are mutually exclusive.

Action:
Remove one of the options from the command and resubmit the request.

CAUAJM_E_60360

Unable to authenticate when an empty value is specified for the user name. Command aborted.

Reason:
Authentication completes only when a valid user name and password combination is specified.

Action:
Specify a valid user name when you re-issue the command.

CAUAJM_E_70000

Environment variable {0} not found

Reason:
Could not get the environment variable from the system environment.

Action:
The application must run from a CA Workload Automation AE environment.

CAUAJM_E_70001

Environment variable {0} access not authorized

Reason:
Access is denied to the environment variable.

Action:
The application needs access to the environment variable.
CAUAJM_E_70002

Configuration file {0} not found

Reason:
Configuration file is not found in the specified AUTOSYS environment location.

Action:
The application needs access to the configuration file.

CAUAJM_E_70003

IOException encountered with the configuration file {0}. Message: {1}

Reason:
IOException encountered with the configuration file.

Action:
Review the log file for the IOException and take the necessary action.

CAUAJM_E_71000

Security initialization failure, cannot allocate SafeContext

Reason:
Problem initializing CA EEM

Action:
Verify the configuration settings in the eiam.config, web.xml, and server.xml files.

CAUAJM_E_71001

Security initialization failure, cannot allocate security provider {0}

Reason:
Problem initializing the security provider

Action:
Verify the configuration settings in the eiam.config, web.xml, and server.xml files.
CAUAJM_E_71002

Security provider not initialized

Reason:
The security provider is not initialized.

Action:
Verify the configuration settings in the eiam.config, web.xml, and server.xml files.

CAUAJM_E_71003

Failed to dynamically register the RSA Crypto-J JCE provider

Reason:
Failed to dynamically register the RSA Crypto-J JCE provider.

Action:
Verify the JAAS configuration.

CAUAJM_E_71004

Invalid encryption provider

Reason:
Invalid encryption provider.

Action:
Ensure that the Crypto-J jar file is present.

CAUAJM_E_71005

Invalid encryption algorithm

Reason:
Invalid encryption algorithm.

Action:
Ensure that the Crypto-J jar file is present.
CAUAJM_E_71006

Invalid encryption key specification

Reason:
Invalid encryption key specification.

Action:
Ensure that the Crypto-J jar file is present.

CAUAJM_E_71007

Error decrypting password

Reason:
Error decrypting password.

Action:
Ensure that the Crypto-J jar file is present.

CAUAJM_E_71008

Error authorizing identity

Reason:
Error authorizing identity.

Action:
Verify the CA EEM configuration settings.

CAUAJM_E_71009

Missing PEM certificate

Reason:
Missing PEM certificate.

Action:
Verify the CA EEM PEM certificate.
CAUAJM_E_71010

Missing key file

Reason:
Missing key file.

Action:
Verify the CA EEM key file.

CAUAJM_E_84900

Not Implemented

Reason:
The web service method is not implemented.

Action:
Contact CA Support.

CAUAJM_E_84901

{0} is not set in the {1} file

Reason:
Required configuration parameter is not found in the configuration file.

Action:
Add the required parameter to the configuration file.

CAUAJM_E_84902

Required parameter <{0}> was not provided

Reason:
The specified server name is omitted or blank.

Action:
Specify a valid server name and resubmit the request.
**CAUAJM_E_84903**

**Configuration parameter {0} value <{1}> is invalid**

**Reason:**
The specified parameter value is invalid.

**Action:**
Specify a valid parameter value and resubmit the request.

**CAUAJM_E_84904**

**Timed out waiting for response from the application server**

**Reason:**
The application server did not respond in a timely manner.

**Action:**
Retry the request. If the problem persists, review the application server environment utilization and log files.

**CAUAJM_E_84905**

**The event name is not valid**

**Reason:**
The specified event name is not valid.

**Action:**
Specify a valid event name for the web service.

**CAUAJM_E_84906**

**The time of the event must be in the format of MM/DD/YYYY HH:MM AM/PM or MM/DD/YYYY HH:MM AM/PM TZ**

**Reason:**
The time of the event must be in the format of MM/DD/YYYY HH:MM AM/PM or MM/DD/YYYY HH:MM AM/PM TZ.

**Action:**
Specify the time in the correct format for the web service.
CAUAJM_E_84907
