

Spring Enterprise Specific Program Documentation (“SPD”)

The Broadcom software program(s) (“Broadcom Software” or “Software”) listed below is provided under the following terms and conditions in addition to any terms and conditions referenced on the Broadcom quote, order form, statement of work, or other mutually agreed ordering document (each a “Transaction Document”) under the applicable end user agreement or governing contract (collectively, the “Agreement”) entered into by Customer and the Broadcom entity (“Broadcom”) through which Customer obtained a license for the Broadcom Software. These terms shall be effective from the effective date of such Transaction Document. Capitalized terms have the meanings ascribed to them herein, or, otherwise, in the Agreement (including the VMware Licensing Glossary).

Spring Enterprise provides the following capabilities and entitlements:

- **Tanzu Spring**
 - Access to Spring Enterprise artifact repositories including releases of:
 - Spring projects under OSS & Enterprise support
 - Spring Boot transitive dependencies
 - Application Advisor to enhance security and compliance via app upgrades and recommendations
 - Tanzu Spring SDK
 - Enterprise Spring Boot extensions
 - Enterprise Spring Cloud components
 - Access to binary downloads of Tanzu Distribution of OpenJDK™, Apache Tomcat and Tanzu tc Server
 - Support for:
 - 50+ open source Spring projects
 - OpenJDK™
 - Apache Tomcat
- **Tanzu Build Service**
 - Create an OCI image from application source code using Cloud Native Buildpacks.

1. DEFINITIONS

All terms defined in the VMware Licensing Glossary located at <http://www.broadcom.com/company/legal/licensing> apply to this SPD unless specified herein.

“Compiled Artifact JAR” is a Java Archive (JAR) file that contains the compiled binaries to be downloaded and incorporated into applications.

“Source JAR” is a Java Archive (JAR) file that contains the associated source code associated with the corresponding Compiled Artifact JAR file.

“Spring Enterprise Unit” is a consumption unit that is convertible to units of Spring Enterprise components, specifically Cores.

2. USE RIGHTS AND LIMITATIONS.

The Software is licensed as Subscription Software. Customer may use the Software and Support solely during the Subscription term. Customer must pay for all the Software Customer uses.

The Software is licensed based on Spring Enterprise Units. One Spring Enterprise Unit equals one Core, for which the total represents the number of Cores used to run Spring applications or images generated by Tanzu Build Service.

Source JARs may only be used for debugging and troubleshooting purposes. Customer may not use any Source JAR to generate a new Compiled Artifact JAR. Only the corresponding Compiled Artifact JAR provided by Broadcom as Software will be eligible for Support during the Subscription term. Source JARs and Compiled Artifact JARs are both provided by Broadcom in the same folder inside a Maven repository.

At the end of the Subscription term, Customer may have the option to renew the Subscription licenses. If Customer does not renew, the Subscription licenses shall expire at the end of the Subscription term. Upon expiration or termination of Customer's licenses to the Software, Customer must cease use of the Software, Documentation and Support and certify cessation of use to Broadcom.

Broadcom may, at its discretion, retire Software and/or Support from time to time.

3. THIRD PARTY INFORMATION AND TERMS.

Any required third-party software license terms are incorporated by this reference and are set forth in online documentation at techdocs.broadcom.com or legaldocs.broadcom.com.
