To: CA Mainframe Security Products Customers
From: The CA Mainframe Security Insights Platform Product Team
Subject: General Availability Announcement for CA Mainframe Security Insights Platform Release 1.0

Dear Valued Customer,

We are pleased to announce that **CA Mainframe Security Insights Platform 1.0** (CA Security Insights) is now Generally Available.

CA Security Insights enables you to interpret and assess the security posture of your mainframe security environment. It automatically correlates data from your mainframe environment and Broadcom mainframe security products into reports that offer insights into your mainframe security posture, reducing hours of manual work. These reports help you identify and reduce risk to your mainframe. Have a security product but don't have it installed yet? Review a sample report to see the value the data will provide upon installation.

CA Security Insights is available to you with a license for any Broadcom Mainframe Security Product, including:

- Identity and Access Management solutions – CA ACF2, CA Top Secret, CA Advanced Authentication Mainframe, CA Cleanup, CA Auditor
- Data Protection and Classification solution – CA Data Content Discovery
- Monitoring and Compliance solution – CA Compliance Event Manager
- Privileged Access Management solution – CA Trusted Access Manager for Z

You can expect more community activity around this new offering soon (including a webcast). In the meantime, we invite you to take a peak: [CA Mainframe Security Insights Platform](#).

We welcome you to join our End of Sprint calls to provide feedback on features as we continue to rapidly develop the CA Security Insights offering. For notification of End of Sprint calls, please email: narendreshwar.sajnani@broadcom.com
