1 At a Glance

Welcome to Symantec SiteMinder 12.8 Platform Support Matrix. This document describes a variety of software components, operating system, database, directory and other 3rd party software components supported for this release. The document also highlights additional support policies, guidelines and clarifications as appropriate for the different components.

2 SiteMinder Server Components

This section lists combinations of platform choices supported for the SiteMinder server components, including the following components:

- Policy Server
- Policy Server SDK
- Administrative User Interface

2.1 Operating System for Policy Server, SDK & Access Gateway

The following table lists SiteMinder server components and Access Gateway support for Operating Systems^{1,2}:

[Note: SiteMinder 12.8.05 and later versions no longer supports Windows 2012 or Red Hat 6. Please see the footnote]

SiteMinder Component	Windows Server ^{3,4}	Red Hat ⁵	Solaris ¹¹
Policy Server 64 bit ^{6,7,8}	2022 ¹² 2019 ⁹ , 2016 ¹² , 2012 R2 ¹⁰	9 ¹² 8 ⁹ , 7, 6 ¹⁰	

Symantec SiteMinder 12.8 Product Support Matrix

SiteMinder Component	Windows Server ^{3,4}	Red Hat ⁵	Solaris ¹¹
Policy Server SDK 64 bit	2022 ¹² 2019 ⁹ , 2016 ¹² , 2012 R2 ¹⁰	9 ¹² 8 ⁹ , 7, 6 ¹⁰	
Access Gateway 64 bit	2022 ¹² 2019 ⁹ , 2016 ¹² , 2012 R2 ¹⁰	9 ¹² 8 ⁹ , 7, 6 ¹⁰	11.x

Applicable Support Notes:

1. Hardware requirements:
 - a. Windows Server on x64 (Intel and AMD).
 - b. Red Hat Enterprise Linux on x64 (Intel and AMD).
2. 64-bit Support: 64-bit Operating Systems are supported.
3. On Windows 2012R2, Server Standard/Enterprise Essentials/Web Datacenter / Foundation Editions are supported.
4. On Windows 2016, Server Standard/Enterprise Essentials/Web Datacenter Editions are supported.
5. Red Hat AS, Red Hat ES, Red Hat Enterprise Linux and Red Hat Enterprise Linux Advanced Platform are supported with all Red Hat updates. Any problems reported will be fixed on the latest Red Hat update. Security Enhanced Red Hat Linux is supported, please see vendor's documentation for setup instructions to enable third-party processes (such as SiteMinder) to run on the system.
6. SiteMinder Policy Server includes a Scripting Interface (or Command Line Interface) that uses Perl scripts to configure and manage policy stores. The installation program installs a full version of Perl.
7. Building custom authentication schemes on Linux: When building custom authentication schemes, or any other custom-built components, you must use GCC version 3.4.6 and above.

Symantec SiteMinder 12.8 Product Support Matrix

8. When building custom components for the Policy Server (e.g. authentication schemes) they must be compiled as a 64-bit binary.
9. Windows 2019 (Standard, Essential & Datacenter Editions) and Red Hat 8 are supported with 12.8.05 and later releases.
10. Windows 2012 R2 and Red Hat 6 are not supported with 12.8.05 and later releases.
11. Starting with the 12.8.07 version of the Access Gateway, Solaris is no longer supported
12. Starting with 12.8.08 Policy Server and Access Gateway are supported on Windows 2022 (Standard, Datacenter, and Datacenter: Azure Editions) and Red Hat 9. Additionally, with 12.8.08 the Policy Server and Access Gateway is no longer supported on Windows 2016

2.2 Operating System for SiteMinder Administrative User Interface

1. Administrative User Interface with embedded Application Server is supported on the operating systems supported by the Policy Server.
2. Browser support for the Administrative User Interface
 - a. Microsoft Edge – last tested version was 119.0.2151.44
 - b. Safari – last tested version was 16.6
 - c. Firefox – last tested version was 119.0.1
 - d. Google Chrome – last tested version was 119.0.6045

2.3 Database and Directory Systems

The following table lists Database and Directory systems that SiteMinder supports for various data stores:

Data Store System ¹	Version	Policy Store	Session Store	User Store	Basic Password Services	Admin UI Store	Audit Store
Symantec Directory Server	14.1.x	Yes	Yes	Yes	Yes	Yes	
CA LDAP Server for z/OS RACF	15			Yes			
CA LDAP Server for z/OS ACF-2	15			Yes			
CA LDAP Server for z/OS Top Secret	15, 16			Yes			
IBM LDAP Server for Z/OS	4.4			Yes (Starting with 12.8.06)			
IBM DB2 UDB	11.5	Yes (starting with 12.8.06a)	Yes (starting with 12.8.06a)	Yes (starting with 12.8.06a)	Yes (starting with 12.8.06a)		Yes (starting with 12.8.06a)
	11.1	Yes	Yes	Yes	Yes		Yes
IBM Verify Directory	10.0	Yes (starting with 12.8.06)		Yes (starting with 12.8.06)	Yes (starting with 12.8.06)	Yes (starting with 12.8.06)	

Symantec SiteMinder 12.8 Product Support Matrix

Data Store System ¹	Version	Policy Store	Session Store	User Store	Basic Password Services	Admin UI Store	Audit Store
Microsoft Active Directory (AD) ²	2022	Yes (starting with 12.8.07)		Yes (starting with 12.8.07)	Yes (starting with 12.8.07)	Yes (starting with 12.8.07)	
	2019	Yes (starting with 12.8.02)		Yes (starting with 12.8.02)	Yes (starting with 12.8.02)	Yes (starting with 12.8.02)	
	2016	Yes		Yes	Yes	Yes	
Microsoft AD LDS	2022	Yes (starting with 12.8.07)		Yes (starting with 12.8.07)	Yes (starting with 12.8.07)	Yes (starting with 12.8.07)	
Microsoft AD Global Catalog ²	2016			Yes		Yes	
Microsoft Azure SQL db	12.0.2x	Yes (starting with 12.8.07)	Yes (starting with 12.8.07)	Yes (starting with 12.8.07)	Yes (starting with 12.8.07)	Yes (starting with 12.8.07)	Yes (starting with 12.8.07)
Microsoft SQL Server Including cluster ^{2,3}	2019 ⁷	Yes (starting with 12.8.03)	Yes (starting with 12.8.03)	Yes (starting with 12.8.03)	Yes (starting with 12.8.03)	Yes (starting with 12.8.03)	Yes (starting with 12.8.03)
	2017	Yes (starting with 12.8.03)	Yes (starting with 12.8.03)	Yes (starting with 12.8.03)	Yes (starting with 12.8.03)	Yes (starting with 12.8.03)	Yes (starting with 12.8.03)
MySQL Community Edition ⁸	8.0.34	Yes (starting with 12.8.08)	Yes (starting with 12.8.08)	Yes (starting with 12.8.08)	Yes (starting with 12.8.08)		Yes (starting with 12.8.08)
NetIQ (Novell) eDirectory	9.2.x	Yes (starting with 12.8.03)		Yes (starting with 12.8.03)	Yes (starting with 12.8.03)	Yes (starting with 12.8.03)	
Oracle Internet Directory	12c	Yes		Yes	Yes	Yes	

Symantec SiteMinder 12.8 Product Support Matrix

Data Store System ¹	Version	Policy Store	Session Store	User Store	Basic Password Services	Admin UI Store	Audit Store
Oracle MySQL Enterprise Server	5.x	Yes	Yes	Yes	Yes		Yes
Oracle RDBMS ⁴	19.7 SEHA ⁶	Yes (starting with 12.8.04)	Yes (starting with 12.8.04)	Yes (starting with 12.8.04)	Yes (starting with 12.8.04)	Yes (starting with 12.8.04)	Yes (starting with 12.8.04)
	19c ⁵	Yes (starting with 12.8.06)	Yes (starting with 12.8.06)	Yes (starting with 12.8.06)	Yes (starting with 12.8.06)	Yes (starting with 12.8.06)	Yes (starting with 12.8.06)
	19c	Yes (starting with 12.8.04)	Yes (starting with 12.8.04)	Yes (starting with 12.8.04)	Yes (starting with 12.8.04)	Yes (starting with 12.8.04)	Yes (starting with 12.8.04)
Oracle RAC	19c	Yes (starting with 12.8.03)	Yes (starting with 12.8.03)	Yes (starting with 12.8.03)	Yes (starting with 12.8.03)	Yes (starting with 12.8.03)	Yes (starting with 12.8.03)
Oracle Unified Directory (OUD)	12c	12.8.02		12.8.02	Yes (starting with 12.8.05)	Yes (starting with 12.8.05)	
Red Hat Directory Svr	12.x	Yes (starting with 12.8.08)		Yes (starting with 12.8.08)	Yes (starting with 12.8.08)	Yes (starting with 12.8.08)	
	11.x	Yes		Yes	Yes	Yes	
PostgreSQL	14	Yes (starting with 12.8.08)	Yes (starting with 12.8.08)	Yes (starting with 12.8.08)	Yes (starting with 12.8.08)		Yes (starting with 12.8.08)
	13.8 RDS	Yes (starting with 12.8.07)	Yes (starting with 12.8.07)	Yes (starting with 12.8.07)	Yes (starting with 12.8.07)		Yes (starting with 12.8.07)
	13	Yes (starting with 12.8.03)	Yes (starting with 12.8.03)	Yes (starting with 12.8.03)	Yes (starting with 12.8.03)		Yes (starting with 12.8.03)

Applicable Support Notes:

1. Information on Policy Store's multi-master replication mode is available in the Product Documentation.

Symantec SiteMinder 12.8 Product Support Matrix

2. Microsoft Windows Server and for Microsoft SQL Server, service packs (e.g., SP1, SP2) are supported in addition to the base releases shown in the matrix.
3. The following Microsoft SQL Server Editions are supported: Standard Edition, Enterprise Edition and Datacenter Edition.
4. The following Oracle RDBMS Editions are supported: Standard Edition One, Standard Edition, and Enterprise Edition.
5. Supported Amazon RDS for Oracle versions
6. SEHA = Standard Edition High Availability
7. Microsoft SQL Server 2019 Amazon RDS is supported starting with 12.8.05 version of SiteMinder.
8. MySQL Community Edition is ONLY supported when the Policy Server is configured for Native database drivers

2.4 Java Virtual Machine (JVM)

Review this section carefully. The Java support varies in recent Service Packs

The following table lists the Java Virtual Machine (JVM) support requirements for release **12.8.07 and 12.8.08**:

SiteMinder Component	Java Runtime Environment ^{1,2}
Policy Server ³	AdoptOpenJDK 11 or 8 (or later updates on 11.x or 8.x) 64 bit Oracle JDK 11 or 8 (or later updates on 11.x or 8.x) 64 bit
Policy Server SDK 64 bit	AdoptOpenJDK 11 or 8 (or later updates on 11.x or 8.x) 64 bit Oracle JDK 11 or 8 (or later updates on 11.x or 8.x) 64 bit
Access Gateway ³	AdoptOpenJDK 11 or 8 (or later updates on 11.x or 8.x) 64 bit Oracle JDK 11 or 8 (or later updates on 11.x or 8.x) 64 bit

Symantec SiteMinder 12.8 Product Support Matrix

The following table lists the Java 11 Virtual Machine (JVM) support requirements for release **12.8.06**:

SiteMinder Component	Java Runtime Environment ^{1,2}
Policy Server ³	AdoptOpenJDK 11 (or later updates on 11.x) 64 bit
Policy Server SDK 64 bit	AdoptOpenJDK 11 (or later updates on 11.x) 64 bit
Access Gateway ³	AdoptOpenJDK 11 (or later updates on 11.x) 64 bit

The following table lists the Java 8 Virtual Machine (JVM) support for releases **12.8.05** and **12.8.06**

SiteMinder Component	Java Runtime Environment ^{1,2}
Policy Server	AdoptOpenJDK 1.8.212 (or later updates on 1.8.x) 64 bit Oracle JDK 1.8 (or later updates on 1.8.x) 64 bit
Policy Server SDK 64 bit	AdoptOpenJDK 1.8.212 (or later updates on 1.8.x) 64 bit Oracle JDK 1.8 (or later updates on 1.8.x) 64 bit
Access Gateway	AdoptOpenJDK 1.8.212 (or later updates on 1.8.x) 64 bit Oracle JDK 1.8 (or later updates on 1.8.x) 64 bit

The following table lists the Java Virtual Machine (JVM) support requirements for release **12.8.04**.

SiteMinder Component	Java Runtime Environment ^{1,2}
Policy Server	AdoptOpenJDK 1.8.212 (or later updates on 1.8.x) 64 bit
Policy Server SDK 64 bit	AdoptOpenJDK 1.8.212 (or later updates on 1.8.x) 64 bit

Symantec SiteMinder 12.8 Product Support Matrix

SiteMinder Component	Java Runtime Environment ^{1,2}
Access Gateway	AdoptOpenJDK 1.8.212 (or later updates on 1.8.x) 64 bit

Applicable Support Notes:

1. Please note that Java Developer Kit (JDK) is required and not just the Java Runtime Environment (JRE) package.
2. Listed JVM build or above on the same series are supported.
3. Policy Server require AdoptOpenJDK 11 (JRE 11) HotSpot JVM and Access Gateway require AdoptOpenJDK 11 (JDK 11) HotSpot JVM

3 SiteMinder Optional Components

3.1 One View Monitor

One View Monitor component can be deployed on Tomcat 9.x or 8.5.x and can be run on the Operating Systems supported by the Policy Server (noted in section 2.1).

3.2 Advanced Password Services (APS)

APS Policy Server Components:

APS components that run on the SiteMinder Policy Server are supported on the Operating Systems supported by the Policy Server (noted in section 2.1)

APS Database and Directory:

Data Store	Version
Symantec Directory	14.1.x
Microsoft Active Directory	2016
	2016 LDS
Oracle OUD	12c

4 Broadcom Security Cross Product Compatibility

4.1 Policy Server and Agents Compatibility

SiteMinder Policy Server 12.8 supports previous versions of Agents and Access Gateways (previously called Secure Proxy Server) with the following caveats:

- The 12.8 Policy Server includes changes initially delivered in the 12.6 Policy Server that were made to the design of the Enhanced Session Assurance with DeviceDNA™ feature. That redesigned feature requires and will only work with the 12.6 or higher

Symantec SiteMinder 12.8 Product Support Matrix

numbered versions of the Access Gateway. NOTE this restriction only applies to the Session Assurance feature. All other usage patterns (e.g. reverse proxy, federation, Rest interface, session linking) are supported with the 12.8 Policy Server in combination with earlier versions of the Access Gateway.

- Any 6.x versions of Web Agents, Access Gateways (previously called Secure Proxy Server), ERP Agents, ASA Agents, and 5.x versions of ERP Agents that are not beyond their end-of-service date do not support IPv6 or FIPS Mode (and can only connect to 12.8 Policy Server in FIPS Compatibility Mode).
- The 12.8 release provides backward compatibility between the SiteMinder Policy Server and earlier versions of the Web Agent Option Pack (WAOP) back to SiteMinder r12 SP3 CR9. WAOPs prior to r12 SP3 CR9 are not supported with 12.8 Policy Servers
- Session Linker is deployed by the Policy Server Installer, starting from 12.7 release.

4.2 SiteMinder Web Services Security Compatibility

As of the release of SiteMinder 12.51 and later, Web Services Security functionality is incorporated in the base SiteMinder Policy Server and Administrative UI. As a result the supported operating systems for the SiteMinder Web Services Security Policy Server are the same as the operating systems listed for the Policy Server (as noted in section 2.1) and the Administrative UI. The supported operating systems for SiteMinder WSS Agents can be found on the platform support matrix for the Web Services Security product page that can be located from this root page. Locate the matrix on the product page at this link: <https://techdocs.broadcom.com/us/product-content/recommended-reading/technical-document-index/ca-siteminder-informational-documentation-index.html?r=2>

4.3 Security Product Compatibility

The following table lists supported integrations between SiteMinder and other Broadcom Products:

Symantec SiteMinder 12.8 Product Support Matrix

Product	Version	SiteMinder Policy Server Operating System
Symantec Identity Manager/Suite	14.5, 14.4 It is not recommended to place SiteMinder and Identity Manager on the same system	Windows Server 2022, 2019, 2016 ¹ RHEL 9,8, 7
Symantec Advanced Authentication (Strong Authentication, Risk Authentication) Adapter	9.1	Windows Server 2022, 2019, 2016 ¹ RHEL 9, 8,7

Applicable Support Notes:

1. Starting with 12.8.08 the Policy Server is no longer supported on Windows 2016

5 Third-Party Product Compatibility

5.1 RSA Authentication Manager

The following table lists supported third-party products:

Product	Version
RSA Authentication Manager ¹	8.6 ²

Applicable Support Notes:

1. For RHEL 7 platform, note that RSA SDK support is from RHEL 7.1 onwards. Hence policy server needs to be deployed on RHEL 7.1 or above, to use RSA SecurID authentication.
2. RSA Authentication Manager 8.6 is supported with SiteMinder version 12.8.04 and higher

5.2 Thales Luna HSM

Luna Product Name	Luna Appliance Version	HSM Firmware Version	Universal Client	SiteMinder Policy Server Version
Luna A Series 700, 750, 790	7.0	7.0.2	10.2 or 10.3	12.8.06 and higher
Luna S Series 700, 750, 790	7.1	7.0.2	10.2 or 10.3	12.8.06 and higher
	7.2	7.0.3	10.2 or 10.3 or 10.5.1 ¹	12.8.06 and higher

Symantec SiteMinder 12.8 Product Support Matrix

Luna Product Name	Luna Appliance Version	HSM Firmware Version	Universal Client	SiteMinder Policy Server Version
	7.3	7.0.3	10.2 or 10.3	12.8.06 and higher
	7.4	7.4.0	10.2 or 10.3	12.8.06 and higher
	7.7.1	7.7.0	10.3	12.8.06 and higher

1. Universal Client 10.5.1 is supported with SiteMinder version 12.8.08 and higher

6 Support Considerations

6.1 IPV6 Support Statement

SiteMinder supports IPv6 with the sole exception of communication to the Advance Password Services component for all communication unless the 3rd party software component that SiteMinder is communicating with does not support IPv6.

6.2 Internationalization Support

SiteMinder 12.8 has been internationalized. This means every component of the SiteMinder product family that carries the 12.8 version number or a later version number has been internationalized and will run on localized versions of operating systems, support localized applications, and localized data. Please see the product documentation for information about what parts of the SiteMinder family have been translated.

6.3 Reasonable Commercial Effort Statement

Broadcom Technical Support will make a reasonable commercial effort to troubleshoot and/or resolve customer support requests that involve the use of currently supported versions of SiteMinder on or with “unsupported” platforms as follows:

Broadcom Technical Support will accept support incidents (support requests) involving a software platform or a combination of software platforms that is not officially supported per the then-current published platform support matrices. Broadcom will troubleshoot the issue up to the point that Broadcom has reason to believe that the problem is related to the use of software that is not specified in a then-current platform supported matrix. At such point, Broadcom shall require that the customer reproduce the problem on a fully supported combination of platforms before Broadcom proceeds in troubleshooting the incident.

Linux Reasonable Commercial Effort Statement:

This Support Statement applies to SiteMinder that offers documented support for one or more Linux Reference Platforms. Broadcom strives to meet our clients’ diverse and ever changing needs. Broadcom products support and manage many of today's leading platforms, operating systems and applications across the IT enterprise. A Linux Reference Platform is a specific version of a particular Linux variant, such as Red Hat Enterprise Server 6, which is used in Broadcom development, QA, and Support, and is documented as a supported environment in which to run SiteMinder. To verify the Linux Reference Platforms supported for SiteMinder, review the system requirements section of the respective product documentation, or check with Broadcom Support. Many of our clients use variants of the Linux operating system as their production operating system platform, for example Oracle Enterprise Linux, SUSE, etc. Some of those Linux variants claim compatibility (compatibility modes) with SiteMinder supported Linux Reference Platforms.

Note: Broadcom does not test every possible configuration of SiteMinder running on the many Compatible Linux Variants available and cannot certify specific client configurations.

To facilitate a quick resolution and isolate the root cause of any potential product issue encountered running on Compatible Linux Variants, Broadcom is establishing the following support protocol for SiteMinder operated in these environments:

- The current GA version of a Linux Reference Platform and the prior major version of that environment are supported. Any exceptions will be noted in respective product documentation.
- The client is responsible for properly configuring their Linux Variant to be compatible with a Linux Reference Platform supported by SiteMinder.

Symantec SiteMinder 12.8 Product Support Matrix

- The client is responsible for having an active maintenance agreement for both their SiteMinder and for the Compatible Linux variant.
- While Broadcom does not require that clients recreate each issue on a Linux Reference Platform before contacting support, we can request that the client diagnose and troubleshoot specific issues without the Linux Variant "variable" through reproducing the issue on the Linux Reference Platform. Broadcom will only do this when we have reason to believe the issue is directly related to the Compatible Linux Variant environment.
- While functional problems are rare under Compatible Linux Variants, problems may occur related to the third-party components embedded in applications, and those embedded products' support of Compatible Linux Variants may be limited or unavailable. Diagnosis and resolution of this class of problem may require the client to return to a Linux Reference Platform.
- Compatible Linux Variants are diverse; Broadcom may require extra time to understand, collect data, troubleshoot and possibly reproduce reported issues.
- If Broadcom Support cannot directly identify the root cause as a Broadcom or a Compatible Linux Variant issue, client can open a support issue with their Compatible Linux Variant vendor and any other necessary third-party vendors to expedite the resolution of the issue. Broadcom, the vendor(s), and the client will work together toward a quick resolution where there business relationship mechanism to do so. Brodcom, IBM, and many other software vendors belong to the Technical Support Alliance Network (<http://www.tsanet.org>) that may be engaged by either Broadcom or the Compatible Linux variant vendor if and when the need for a third-party arises as long as active maintenance exists for the Broadcom and third party vendor's product. Note if the customer does not have a Vendor support agreement for the Linux variant, there is no third party Broadcom may work with.
- Any known issues with running SiteMinder on specific Compatible Linux Variants will be noted in the respective product documentation.

6.4 Third-Party Products End of Support Statement

When a third-party product reaches the end of its primary, premier, production-phase or mainstream support (which is prior to, and distinct from optional, separately purchased, add-on extended support vendor support), Broadcom will no longer provide explicit support / certification for that third-party product or any SiteMinder components that interoperate with the third-party product.

Third-party products under optional, separately purchased, add-on extended vendor support are not used in development / release cycles of upcoming major releases OR minor releases like CR / SP. They are at best supported within our 'Reasonable Commercial

Symantec SiteMinder 12.8 Product Support Matrix

Effort Statement', so as to help customers move to newer versions supported by SiteMinder components. Examples of third-party products are: web server, application server, operating system, directory, database, etc.
