VMware Tanzu Data Suite
Specific Program Documentation ("SPD")

The Broadcom software program(s) ("Broadcom Software" or "Software") listed below is provided under the following terms and conditions in addition to any terms and conditions referenced on the Broadcom quote, order form, statement of work, or other mutually agreed ordering document (each a "Transaction Document") under the applicable end user agreement or governing contract (collectively, the "Agreement") entered into by Customer and the Broadcom entity ("Broadcom") through which Customer obtained a license for the Broadcom Software. These terms shall be effective from the effective date of such Transaction Document. Capitalized terms have the meanings ascribed to them herein, or, otherwise, in the Agreement (including the VMware Licensing Glossary).

VMware Tanzu Data Suite consists of the following products:

> VMware Tanzu Greenplum
> VMware Tanzu Gemfire
> VMware Tanzu RabbitMQ
> VMware Tanzu for Postgres
> VMware Tanzu for MySQL
> VMware Tanzu for Valkey

The following modalities are included for each product when available for download on Broadcom's download portal:

> Bare Metal Deployments
> Virtualized Deployments
> Containerized Deployments
> Kubernetes Deployments

In addition, VMware Tanzu Gemfire is entitled for usage in Cloud Foundry deployments.

1.   DEFINITIONS.

All terms defined in the VMware Licensing Glossary located at https://www.broadcom.com/company/legal/licensing apply to this SPD unless specified herein.

"Disaster Scenario" means a natural or human-induced disaster making the Primary Site unusable or unavailable temporarily or permanently.

"Failover Process" means resuming operations in a Spare Failover Environment in the event of a Disaster Scenario.

"Spare Failover Environment" means computing infrastructure that is used only in the event of a Disaster Scenario to resume business operations.

"Units" means the unit of measure by which the Broadcom Software is purchased. Units can be allocated to Cores of the component products in the VMware Tanzu Data Suite as described in Section 2 (Use Rights and Limitations).

2.   USE RIGHTS AND LIMITATIONS.

The Software is licensed as Subscription Software. Customer may use the Software and Support solely during the Subscription term. Customer must pay for all the Software Customer uses.

.

At the end of the Subscription term, Customer may have the option to renew the Subscription licenses. If Customer does not renew, the Subscription licenses shall expire at the end of the Subscription term. Upon expiration or termination of Customer's licenses to the Software, Customer must cease use of the Software, Documentation and Support and certify cessation of use to VMware.

VMware may, at its discretion, retire Software and/or Support from time to time.

The Broadcom Software can be used in a Spare Failover Environment for up to 10 days per year for the purpose of testing the Failover Process for Disaster Scenarios. Otherwise, all systems where the Broadcom Software is installed must be licensed.

The VMware Tanzu Data Hub is entitled for usage with the Tanzu Data Suite products.

3. UNIT ALLOCATIONS FOR VMware TANZU DATA SUITE COMPONENTS.

Component	Units Consumed	Cores
VMware Tanzu Greenplum	1	0.2
VMware Tanzu Gemfire	1	0.2
VMware Tanzu for Postgres (Advanced)	1	0.2
VMware Tanzu for Postgres (Standard)	1	1
VMware Tanzu RabbitMQ	1	1
VMware Tanzu for MySQL	1	1
VMware Tanzu for Valkey	1	1

4.   THIRD PARTY INFORMATION AND TERMS.

Any required third-party software license terms are incorporated by this reference and are set forth in online documentation at techdocs.broadcom.com or legaldocs.broadcom.com.
