

# CA Workload Automation iXp

## Release Notes

Release 7.2

This Documentation, which includes embedded help systems and electronically distributed materials, (hereinafter referred to as the "Documentation") is for your informational purposes only and is subject to change or withdrawal by CA at any time.

This Documentation may not be copied, transferred, reproduced, disclosed, modified or duplicated, in whole or in part, without the prior written consent of CA. This Documentation is confidential and proprietary information of CA and may not be disclosed by you or used for any purpose other than as may be permitted in (i) a separate agreement between you and CA governing your use of the CA software to which the Documentation relates; or (ii) a separate confidentiality agreement between you and CA.

Notwithstanding the foregoing, if you are a licensed user of the software product(s) addressed in the Documentation, you may print or otherwise make available a reasonable number of copies of the Documentation for internal use by you and your employees in connection with that software, provided that all CA copyright notices and legends are affixed to each reproduced copy.

The right to print or otherwise make available copies of the Documentation is limited to the period during which the applicable license for such software remains in full force and effect. Should the license terminate for any reason, it is your responsibility to certify in writing to CA that all copies and partial copies of the Documentation have been returned to CA or destroyed.

TO THE EXTENT PERMITTED BY APPLICABLE LAW, CA PROVIDES THIS DOCUMENTATION "AS IS" WITHOUT WARRANTY OF ANY KIND, INCLUDING WITHOUT LIMITATION, ANY IMPLIED WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, OR NONINFRINGEMENT. IN NO EVENT WILL CA BE LIABLE TO YOU OR ANY THIRD PARTY FOR ANY LOSS OR DAMAGE, DIRECT OR INDIRECT, FROM THE USE OF THIS DOCUMENTATION, INCLUDING WITHOUT LIMITATION, LOST PROFITS, LOST INVESTMENT, BUSINESS INTERRUPTION, GOODWILL, OR LOST DATA, EVEN IF CA IS EXPRESSLY ADVISED IN ADVANCE OF THE POSSIBILITY OF SUCH LOSS OR DAMAGE.

The use of any software product referenced in the Documentation is governed by the applicable license agreement and such license agreement is not modified in any way by the terms of this notice.

The manufacturer of this Documentation is CA.

Provided with "Restricted Rights." Use, duplication or disclosure by the United States Government is subject to the restrictions set forth in FAR Sections 12.212, 52.227-14, and 52.227-19(c)(1) - (2) and DFARS Section 252.227-7014(b)(3), as applicable, or their successors.

## Chapter 1: Changes to the Existing Features 5

New Admin Tool setting: Instance->GUI->Maximum Alarm Response Length.....	5
New Admin Tool setting: Instance->Database->Row Prefetch .....	5
Managing Extended Calendars and Cycles for r11.0 and Higher Versions of Unicenter AutoSys JM .....	5
Calendar Editor Shows “12 months” of Current Calendar Year .....	5
Improved Handling of CA Workload Automation AE Database Rollover, Rollback, and Hung Database Connections.....	5
Support for MACH_OFFLINE and MACH_ONLINE Events in “ixsendevent” Command and File->Sendevent Menu Option .....	6
The iXp Job Detail and Flow View Support “lookback” Starting Conditions .....	6
Support for Java 7 and Tomcat 7.....	6
Bug Fixes.....	6

## Chapter 2: Upgrade Considerations 7

Upgrading from iXp v7.1-r1 or lower .....	7
Upgrading from CA Workload Automation iXp v7.1 SP1 .....	7
Running Upgrade Scripts .....	8
Upgrading from v6.0 or Lower .....	8
Upgrading from v6.1-r2 or Lower .....	9
Upgrading from v6.1-r3-b11 or Lower .....	10
Upgrading from v6.2 .....	11
Updating Instance Environment Files .....	11

## Appendix A: Acknowledgements 13

Java SE Development Kit 6u34 Demos and Samples 6u34.....	13
jTDS 1.2 .....	14
Log4j 1.2.13 .....	14
Oracle JDBC Driver 11.2.0.3 .....	19

# Chapter 1: Changes to the Existing Features

---

This chapter describes changes made to existing features of the product.

## New Admin Tool setting: Instance->GUI->Maximum Alarm Response Length

This setting limits the number of characters for each alarm response entered in the iXp Alarm Manager. If users are entering multiple responses for the same alarm, the aggregated response values cannot exceed 255 characters.

## New Admin Tool setting: Instance->Database->Row Prefetch

The number of rows that is fetched at a time by the Oracle JDBC driver when performing any database query. The default value is 10. If you notice that the iXp server is experiencing slow data retrieval times, we recommend setting it to 1000.

## Managing Extended Calendars and Cycles for r11.0 and Higher Versions of Unicenter AutoSys JM

Users can now use the calendar editor to create, modify, and delete extended calendars and cycles for Unicenter AutoSys JM v11.0 and higher.

## Calendar Editor Shows “12 months” of Current Calendar Year

The calendar editor now shows dates across all 12 months of the current calendar year.

## Improved Handling of CA Workload Automation AE Database Rollover, Rollback, and Hung Database Connections

The iXp Daemon checks multiple tables and values in the CA Workload Automation AE database to support automatic handling of database rollover and rollback. Additionally, if the connection to the preferred database from which the iXp Daemon is fetching data is hung, the iXp Daemon automatically starts retrieving data from the other active database. The iXp Daemon periodically tries to switch back to the preferred database.

## Support for MACH\_OFFLINE and MACH\_ONLINE Events in “ixsendevent” Command and File->Sendevent Menu Option

Users can now issue or cancel MACH\_ONLINE and MACH\_OFFLINE events from the File->Sendevent menu option and the “ixsendevent” command. The “Machine Edit” privilege governs these events.

## The iXp Job Detail and Flow View Support “lookback” Starting Conditions

The Job Detail and Flow views support “lookback” settings in starting conditions when displaying the atomic conditions of jobs.

## Support for Java 7 and Tomcat 7

Users can now run the iXp GUI with Java 7. The iXp Daemon can now be started with Java 7 or Tomcat 7.

## Bug Fixes

- iXp was not properly handling jobs with certain starting conditions related to global variables.
- Deleting job overrides in Unicenter AutoSys JM r11.0 and higher was not working.

---

## Chapter 2: Upgrade Considerations

---

To upgrade your current version of iXp to CA Workload Automation iXp v7.2, perform the following steps:

### Upgrading from iXp v7.1-r1 or lower

1. Download the ISO image of CA Workload Automation iXp v7.2 and CA Workload Automation iXp Third-Party Requirements.
2. Stop the iXp Tomcat server process.
3. Mount the ISO image for CA Workload Automation iXp Third-Party Requirements or extract the files contained in the ISO image to a temporary directory.
4. Go to the mount point or directory where files were extracted and run “installer.sh” (UNIX) or “installer.bat” (Windows). Agree to the terms of the license agreement.
5. On UNIX/Linux, extract the tar file “ixp-thirdPartyLib-7.2.0.tar” from the ISO image to the “lib” directory under Tomcat. On Windows, extract the zip file “ixp-thirdPartyLib-7.2.0.zip” to the “lib” directory under Tomcat.
6. Mount the ISO image for CA Workload Automation iXp v7.2 or extract the files contained in the ISO image to a temporary directory.
7. On UNIX/Linux, back up the current \$IXP\_HOME/dat, \$IXP\_HOME/etc, \$IXP\_HOME/lib, and \$IXP\_HOME/webapps directories. On Windows, back up the current %IXP\_HOME%\dat, %IXP\_HOME%\etc, %IXP\_HOME%\lib, and %IXP\_HOME%\webapps directories.
8. On UNIX/Linux, extract the tar file “ixp-upgrade-7.2.0.tar” from the ISO image to the \$IXP\_HOME directory. On Windows, extract the zip file “ixp-upgrade-7.2.0.zip” to the %IXP\_HOME% directory.
9. Follow the steps listed in sections [Running Upgrade Scripts](#) and [Updating Instance Environment Files](#), depending upon your existing version of iXp, and then start the Tomcat process.

### Upgrading from CA Workload Automation iXp v7.1 SP1

1. Download the ISO image of CA Workload Automation iXp v7.2.
2. Stop the iXp Tomcat server process.
3. Mount the ISO image for CA Workload Automation iXp v7.2 or extract the files contained in the ISO image to a temporary directory.
4. On UNIX/Linux, back up the current \$IXP\_HOME/dat, \$IXP\_HOME/etc, \$IXP\_HOME/lib, and \$IXP\_HOME/webapps directories. On Windows, back up the current %IXP\_HOME%\dat, %IXP\_HOME%\etc, %IXP\_HOME%\lib, and %IXP\_HOME%\webapps directories.
5. On UNIX/Linux, extract the tar file “ixp-upgrade-7.2.0.tar” from the ISO image to the \$IXP\_HOME directory. On Windows, extract the zip file “ixp-upgrade-7.2.0.zip” to the %IXP\_HOME% directory.
6. Follow the steps listed in sections [Running Upgrade Scripts](#) and [Updating Instance Environment Files](#), depending upon your existing version of iXp, and then start the Tomcat process.

## Running Upgrade Scripts

### Upgrading from v6.0 or Lower

If you are upgrading from iXp v6.0.x or lower, you will have to first run the upgrade script “ixp-upgrade-6.1.pl”, which is located in the same “contrib” directory. This script will enable one or more of the following privileges for any or all users and/or groups.

GLOBAL READ : Ability to see Global Variables based on their names and instances.

GLOBAL DELETE : Ability to delete Global Variables based on similar criteria.

GLOBAL UPDATE: Ability to update Global Variables based on similar criteria.

CALENDAR READ : Ability to see Calendar dates based on their names and instances.

CALENDAR UPDATE : Ability to update Calendar dates based on similar criteria.

MACHINE USE : Ability to define a job to run on machines based on their names and instances.

MACHINE EDIT : Ability to define or edit machine definitions based on similar criteria.

The iXp Administration Guide provides additional details about these privileges.

By default, all of the above privileges are disabled for existing users. When a new user gets created, these privileges will be disabled as well.

The syntax of this script is as follows:

```
perl ixp-upgrade-6.1.pl [-U <user list>] [-G <group list>]  
[-m <machine permissions>] [-c <cal permissions>] [-g <global permissions>]
```

Must have at least one of -U or -G

user and group lists may be *ALL*

Must have at least one of -c or -g or -m

<cal permissions> are any of

*read, update, ALL*

<global permissions> are any of

*read, update, delete, ALL*

<machine permissions> are any of

*use, update, ALL*

For example,

```
perl ixp-upgrade-6.1.pl -G ALL -g read -c read -m use
```

```
perl ixp-upgrade-6.1.pl -G Production_Group -g ALL -c ALL -m ALL
```

```
perl ixp-upgrade-6.1.pl -U ALL -g read -c ALL -m ALL
```

## Upgrading from v6.1-r2 or Lower

If you are upgrading from v6.1-r2 or lower, you will have to run the upgrade script “ixp-upgrade-6.1r3.pl”, which is located in the same “contrib” directory. This script will enable one or more of the following privileges for any or all users and/or groups.

JOB\_ALARM\_READ : Enables users to see alarms related to their jobs.

INSTANCE\_ALARM\_READ: Enables users to see alarms related to their instances.

JOB\_LOG\_READ: Enables users to read STDOUT/STDERR, log files for their jobs.

JOB\_SCRIPT\_READ: Enables users to read Command Script files for their jobs.

The iXp Administration Guide provides additional details about these privileges.

By default, the Alarm-related privileges will be set to “true” for all existing users. When a new user gets created, these privileges will be set to “false”.

By default, the Log File related privileges will be set to “false” for all existing users. When a new user gets created, these privileges will be set to “false” too.

If you would like to explicitly enable any of the above privileges for any or all users and/or groups, you can use the script “ixp-upgrade-6.1r3.pl” in the “contrib” directory under the main iXp directory.

The syntax of this script is as follows:

```
perl ixp-upgrade-6.1r3.pl [-U <user list>] [-G <group list>]
[-I <Log File permissions>] [-a <Alarm Read permissions>]
```

Must have at least one of -U or -G

user and group lists may be *ALL*

Must have at least one of -I or -a

<Log File permissions> are any of

*logs, scripts, ALL*

<Alarm Read permissions> are any of

*jobs, instances, ALL*

For example,

```
perl ixp-upgrade-6.1r3.pl -G ALL -I logs
```

```
perl ixp-upgrade-6.1r3.pl -G Production_Group -a ALL -I ALL
```

```
perl ixp-upgrade-6.1r3.pl -U ALL -a jobs -I logs
```

The Job Detail View is now formatted differently. As a result, it is active and operational only when its width meets the minimum requirements. The user properties file has to be modified to allocate this new minimum width to the Job Detail View.

Run the following script to update the user property files with the new Job Detail View dimensions.

```
perl ixp-detailview-upgrade.pl <WIDTH>
```

where,

<WIDTH> = Minimum width for the Job Detail View (recommended value is 340).

For example,

```
perl ixp-detailview-upgrade.pl 340
```

## Upgrading from v6.1-r3-b11 or Lower

A new security privilege for users and groups has been added as follows:

**JOB\_DETAIL\_FILTER:** Enables users to see and search by certain job attributes , such as owner, machine, command.

The **JOB\_READ** privilege is now modified to show just the run and status information, along with the job attributes not covered by the **JOB\_DETAIL** privilege.

To maintain the privileges as they were in the previous versions, you can run the upgrade script “ixp-upgrade-62.pl” in the “contrib” directory. This script copies the existing **JOB\_READ** settings to the new **JOB\_DETAIL** privilege.

The syntax for the script is as follows:

```
perl ixp-upgrade-62.pl [-U] [-G]
```

where,

**[-U]** : Copy the settings for all users

**[-G]** : Copy the settings for all groups

For example,

```
perl ixp-upgrade-62.pl -U -G
```

Also, a new column has been added to the Job Console View. As a result, the props file for certain users will have to be modified to account for an additional column. To do so, you can run the upgrade script “ixp-upgrade-props-62.pl” in the “contrib” directory.

The syntax for the script is as follows:

```
perl ixp-upgrade-props-62.pl
```

The script will print out the names of users that were modified during execution.

## Upgrading from v6.2

There are two scripts that should be run to upgrade existing iXp filters and Instance configuration files.

The existing iXp filter files have to be modified to support new r11.3 statuses. This script should be executed, even if your environment does not include r11.3. The syntax of the script is as follows:

### **perl ixp-updatefilters-70.pl**

A new field has been added to the CA Workload Automation AE Instance files as follows:

**IXP\_INSTANCE\_DATABASE\_VENDOR:** Specifies the type of database being used for CA Workload Automation AE. Supported values are Oracle, Sybase, SQL Server

Also, an existing field in that file has been modified as follows:

**IXP\_INSTANCE\_VERSION:** Specifies the version of CA Workload Automation AE. Supported values are 4.0,4.5,11.0.11.1,11.3

The upgrade script modifies the **IXP\_INSTANCE\_VERSION** to the newly supported values, and adds the database vendor field. The syntax of the script is as follows:

### **perl ixp-updateInstances-70.pl**

The script will print out the names of the Instance files that were modified.

## Updating Instance Environment Files

If you are running CA Workload Automation AE with an Oracle database, perform the following steps after running the required upgrade scripts:

1. Go to “\$IXP\_HOME/etc/instance” (UNIX) or “%IXP\_HOME%\etc\instance” (Windows).
2. For each “*INST*.env” file in this directory, where *INST* is the three-letter name of a CA Workload Automation AE instance, change the value of the CLASSPATH variable and replace the fully qualified location of the “classes12.jar” file with the fully qualified location of “ojdbc5.jar” file.

The fully qualified location of “ojdbc5.jar” file is “*CATALINA\_HOME*/webapps/ixp/WEB-INF/lib/ojdbc5.jar” (UNIX) or “*CATALINA\_HOME*\webapps\ixp\WEB-INF\lib\ojdbc5.jar” (Windows), where *CATALINA\_HOME* is the base directory where the Tomcat software is located.

**Note:** The preceding step is needed since CA Workload Automation iXp v7.2 does not include “classes12.jar” file any more. Instead, it includes the “ojdbc5.jar” file. So any references to “classes12.jar” have to be replaced.

If you are running CA Workload Automation AE with a Sybase database, perform the following steps:

1. Start the Tomcat process. You will not be able to see any jobs in the GUI yet.
2. Launch the Admin Tool and go to the "Instance" tab.
3. Select the CA Workload Automation AE instance running with a Sybase database.
4. Change the JDBC driver from "com.sybase.jdbc3.jdbc.SybDriver" to "net.sourceforge.jtds.jdbc.Driver".
5. Go to the "Database" subtab. For each database connection listed in the subtab, change the beginning of each URL from "jdbc:sybase:Tds:" to "jdbc:jtds:sybase://".
6. Save and repeat for other instances running with a Sybase database.
7. Restart the Tomcat process.

# Appendix A: Acknowledgements

---

This appendix contains copyright and license agreement information from third-party software used in CA Workload Automation iXp.

## Java SE Development Kit 6u34 Demos and Samples 6u34

This product includes files from Java SE Development Kit 6u34 Demos and Samples v.6u34 which are distributed in accordance with the following license agreement:

Oracle BSD License:

## jTDS 1.2

### JTDS v.1.2

This product is distributed with JTDS v.1.2 (the LGPL Software), the use of which is governed by the following terms:

The LGPL Software is open source software that is used with this CA software program (the CA Product). The LGPL Software is not owned by CA, Inc. (CA). Use, copying, distribution and modification of the LGPL Software are governed by the GNU Lesser General Public License (LGPL) version 2.1. A copy of the LGPL license can be found in the same directory on the installation disk on which the LGPL Software is distributed. Additionally, a copy of the LGPL license can be found at <http://www.opensource.org/licenses/lgpl-2.1.php> or write to the Free Software Foundation, Inc., 59 Temple Place, Suite 330, Boston, MA 02111-1307 USA. CA makes the source code for the LGPL Software available at <http://opensrcd.ca.com>, and includes a copy of the source code on the same disk as the executable code. Use of the CA Product is governed solely by the CA end user license agreement (EULA), not by the LGPL license. You cannot use, copy, modify or redistribute any CA Product code except as may be expressly set forth in the EULA. The LGPL Software is provided AS IS WITHOUT WARRANTY OR CONDITION OF ANY KIND, EITHER EXPRESS OR IMPLIED, INCLUDING, WITHOUT LIMITATION, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. Further details of the disclaimer of warranty with respect to the LGPL Software can be found in the LGPL license itself. To the full extent permitted under applicable law, CA disclaims all warranties and liability arising from or related to any use of the LGPL Software.

## Log4j 1.2.13

This product includes Apache Log4J 1.2.13 which is distributed in accordance with the following license agreement:

Apache License  
Version 2.0, January 2004  
<http://www.apache.org/licenses/>

## TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

### Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document. "Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized

to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution." "Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

**Grant of Copyright License.** Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

**Grant of Patent License.** Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

**Redistribution.** You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

You must give any other recipients of the Work or Derivative Works a copy of this License; and

You must cause any modified files to carry prominent notices stating that You changed the files; and

You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and

If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear.

The contents of the NOTICE file are for informational purposes only and do not modify the License.

You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

**Submission of Contributions.** Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor

regarding such Contributions.

**Trademarks.** This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

**Disclaimer of Warranty.** Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

**Limitation of Liability.** In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

**Accepting Warranty or Additional Liability.** While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License.

However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

## Oracle JDBC Driver 11.2.0.3

This Product is distributed with Oracle 11G JDBC Driver release 2 from Oracle USA, Inc. ('Oracle')

The following additional terms and conditions apply to your use of the Oracle software product ("Oracle Product"):

- (1) you may only use the Oracle Product to run the CA Product;
- (2) to the extent permitted by applicable law, Oracle disclaims liability for any damages, whether direct, indirect, incidental, or consequential, arising from your use of the Oracle Product;
- (3) at the termination of this Agreement, you must discontinue use and destroy or return to CA all copies of the Product;
- (4) Oracle is not obligated to provide technical support, phone support, or updates to the Oracle Product hereunder;
- (5) CA reserves the right to audit your use of the Oracle Product and report such use to Oracle or to assign this right to audit your use of the Oracle Product to Oracle;
- (6) Oracle shall be a third party beneficiary of this Agreement.
